Making Development Sustainable Making Development Sustainable:

Making Development Sustainable Johan Holmberg, 1992-09 Although the idea of sustainable development is by now well established discussions of how to progress from concept to reality often become mired in the complexities of global politics and offer few concrete solutions While achieving sustainable development will undoubtedly require changes at the global level the authors of this book emphasize that patterns of sustainable development must be built from the bottom up They focus on methods for movement toward sustainability that can occur at the grassroots level This book presents an integrated series of essays on the policies for sustainable development from one of the leading policy research institutes for environmental and developmental issues It concentrates on the developing world and looks at the specific sectors to which policies must be applied Beginning with a discussion of what constitutes sustainable development it goes on to examine the institutional measures needed to mobilize human resources for change and the economic policies for sustainable natural resource management It then considers the policies needed in agriculture urban development industry forests drylands energy use finance population and consumption The book ends with a discussion of the potential for financing new policy initiatives and the pressing need to reduce population growth and profligate consumption Throughout it demonstrates how those directly involved are best suited to manage their environments and resources Policies for sustainable development depend upon the experience and resourcefulness of local people and require that they control their own futures **Making**
