Installation . . . as easy as 1, 2, 3

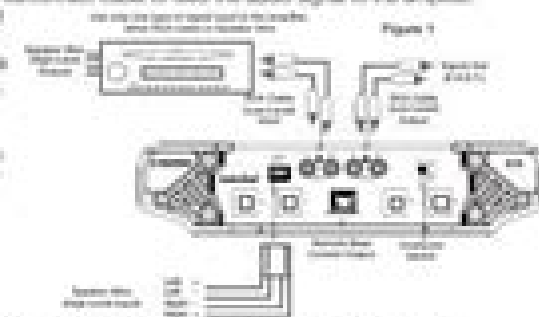

1. Mounting Choose a structurally sound location to mount your Kicker amplifier. The controls on the top of the amplifier need to be accessible for adjustment. Make sure there are no items behind the area where the wires will be driven. Choose a location that allows at least 4" (10cm) of open ventilation for the amplifier. If possible, mount the amplifier in the climate-controlled passenger compartment. Drill four holes using a 3/64" (0.9mm) drill bit and use the supplied #8 screws to mount the amplifier.

2. Wiring Disconnect the vehicle's battery to avoid an electrical short. Then connect the ground wire to the amplifier. Make the ground wire short, 24" (60cm) or less, and connect it to a paint-and-corrosion-free solid-metal area of the vehicle's chassis. Adding an additional ground wire between the battery's negative post and the vehicle chassis of the same gauge (or larger) is recommended.

Use a twisted pair of RCA (low-level) interconnect cable to feed the audio signal to the amplifier.

Only use speaker wire (high-level) inputs if your source unit does not have RCA type outputs. Either input method will provide a low-level output signal at the RCA output, which effectively passes the audio signal to another amplifier or component (P.A.S.T.). Keep the RCA cable away from factory wiring harnesses and other power wiring. If you need to cross this wiring, cross it at a 90 degree angle.

Install a fuse within 12" (30cm) of the battery and in line with the power cable connected to your amplifier. If you ever need to remove the amplifier from the vehicle after it has been installed, the ground wire should be the last wire disconnected from the amplifier—just the opposite as when you installed it. See the chart below for power and ground wire size, and fusing recommendations.

3. Configuration The following diagrams show the most common configurations for your Kicker ZX series amplifier.

Model ZX350.2	Fuse 50A	Power/Ground Wire 10GA
Model ZX450.2	Fuse 60A	Power/Ground Wire 10GA
Model ZX550.2	Fuse 70A	Power/Ground Wire 10GA
Model ZX650.2	Fuse 120A	Power/Ground Wire 2GA

Two Channel Operation (Stereo) These ZX amplifiers are capable of operating into a minimum impedance of 2 ohms per channel in stereo operation. See Figure 2.

Bridged Operation (Mono) ZX.2 series amplifiers are capable of operating into a minimum impedance of 4 ohms when in bridged operation. See Figure 3.

Stereo and Mono Operation Simultaneously (SAM) The ZX.2 series amplifiers are capable of operating into a minimum impedance of 4 ohms mono and 2 ohms per channel in stereo simultaneously with the use of passive crossovers. See Figure 4.
