Church in the Land of Desire Edward Rommen,2021-03-18 According to William Leach religious communities that have come to North America have not been able to withstand the damaging influence of its consumer oriented society which has subverted ecclesial customs values and practices Rather than resisting most of these groups have sought to integrate Christianity into the new culture By doing so they run the risk of marginalizing the church and fundamentally altering its teachings and practice Of course the real danger does not reside in the occasional use of isolated elements of our culture the unreflected application of any technology available the replacement of traditional ecclesial practices with the techniques of the business world or even the substitution of ecclesial foundations of authority

Rather danger lies in a set of fundamental principles that together define a basic orientation which is naturally and almost mindlessly attracted to these secular devices sees no harm in them justifies and amplifies their effects and effectively supplants the mind of Christ which is supposed to govern the church This study analyzes and documents the effects of that mindset and calls us back to the biblical and traditional alternatives that alone can bring healing and recovery to the church
