

Choose your transponder for your own kind of flying

The King KT 76 Transponder provides 250 watts nominal transmitter power, which is mandatory in the FAA's proposed rule for operation above 15,000 feet. You can fly at any altitude with the KT 76.

The KT 78 Transponder, on the other hand, was designed specifically for pilots who always fly below 15,000 feet. With its 150 watts nominal transmitting power, the KT 78 is limited by the FAA's proposed rule to operation at altitudes under 15,000 feet.

The transmitting power is the only difference between these two King transponders.

Ground radar sweep "interrogates" aircraft at 10-15 second intervals.

Transponder-pulsed transmitter replies to radar station.

The FAA's Advanced Radar Tracking System (ARTS) displays aircraft information alpha-numerically on the radarscope. This information can include flight number, altitude, groundspeed, track number and the transponder code used by the target aircraft.
