Passing Strange Martha A. Sandweiss, 2009-02-05 Read Martha A Sandweiss s posts on the Penguin Blog The secret double life of the man who mapped the American West and the woman he loved Clarence King was a late nineteenth century celebrity a brilliant scientist and explorer once described by Secretary of State John Hay as the best and brightest of his generation But King hid a secret from his Gilded Age cohorts and prominent family in Newport for thirteen years he lived a double life the first as the prominent white geologist and writer Clarence King and a second as the black Pullman porter and steelworker named James Todd The fair blue eyed son of a wealthy China trader passed across the color line revealing his secret to his black common law wife Ada Copeland only on his deathbed In *Passing Strange* noted historian Martha A Sandweiss tells the dramatic distinctively American tale of a family built along the fault lines of celebrity class and race a story that spans the long century from Civil War to civil rights

Peak Pursuits Caroline Schaumann, 2020-07-28 An interdisciplinary cultural history of exploration and mountaineering in the nineteenth century European forays to mountain summits began in the late eighteenth and early nineteenth centuries with the search for plants and minerals and the study of geology and glaciers Yet scientists were soon captivated by the enterprise of climbing itself enthralled with the views and the prospect of conquering alpine summits Inspired by Romantic notions of nature early mountaineers idealized their endeavors as sublime experiences all the while deliberately measuring what they saw As increased leisure time and advances in infrastructure and equipment opened up once formidable mountain regions to those seeking adventure and sport new models of masculinity emerged that were fraught with tensions This book examines how written and artistic depictions of nineteenth century exploration and mountaineering in the Andes the Alps and the Sierra Nevada shaped cultural understandings of nature and wilderness in the Anthropocene

Carleton Watkins Tyler Green, 2020-10-20 A fascinating and indispensable book Christopher Knight Los Angeles Times Best Books of 2018 The Guardian Gold Medal for Contribution to Publishing 2018 California Book Awards Carleton Watkins 1829 1916 is widely considered the greatest American photographer of the nineteenth century and arguably the most influential artist of his era He is best known for his pictures of Yosemite Valley and the nearby Mariposa Grove of giant sequoias Watkins made his first trip to Yosemite Valley and Mariposa Grove in 1861 just as the Civil War was beginning His photographs of Yosemite were exhibited in New York for the first time in 1862 as news of the Union s

disastrous defeat at Fredericksburg was landing in newspapers and while the Matthew Brady Studio's horrific photographs of Antietam were on view Watkins's work tied the West to Northern cultural traditions and played a key role in pledging the once wavering West to Union. Motivated by Watkins's pictures Congress would pass legislation signed by Abraham Lincoln that preserved Yosemite as the prototypical national park, the first such act of landscape preservation in the world. Carleton Watkins' *Making the West American* includes the first history of the birth of the national park concept since pioneering environmental historian Hans Huth's landmark 1948 *Yosemite: The Story of an Idea*. Watkins's photographs helped shape America's idea of the West and helped make the West a full participant in the nation. His pictures of California, Oregon, and Nevada, as well as modern-day Washington, Utah, and Arizona, not only introduced entire landscapes to America but were important to the development of American business, finance, agriculture, government policy, and science. Watkins's clients, customers, and friends were a veritable who's who of America's Gilded Age, and his connections with notable figures such as Collis P. Huntington, John and Jessie Benton Frémont, Eadweard Muybridge, Frederick Billings, John Muir, Albert Bierstadt, and Asa Gray reveal how the Gilded Age helped make today's America. Drawing on recent scholarship and fresh archival discoveries, Tyler Green reveals how an artist didn't just reflect his time but acted as an agent of influence. This telling of Watkins's story will fascinate anyone interested in American history, the West, and how art and artists impacted the development of American ideas, industry, landscape, conservation, and politics.

Double Exposure Robert Sullivan, 2024-04-23 One of *The New Yorker*'s best books of the year so far. A Kirkus Reviews Best Nature Book of 2024. Singular. Virtuoso. *Double Exposure* is the best book I've read about America in many, many years. Corey Seymour Vogue a best book of 2024. Extraordinary. A transformative experience for the reader. Lucy Sante. A large-hearted, wide-angled book I couldn't put it down. Ian Frazier. A personal exploration of the American West and the work of one of America's greatest photographers. Timothy O'Sullivan is America's most famous war photographer. You know his work even if you don't know his name. *A Harvest of Death*, taken at Gettysburg, is an icon of the Civil War. He was also among the first photographers to elevate what was then a trade to the status of fine art. The images of the American West he made after the war, while traveling with the surveys led by Clarence King and George Wheeler, display a prescient awareness of what photography would become years later. Ansel Adams would declare his work surrealistic and disturbing. At the same time, we know very little about O'Sullivan himself. Nor do we know really know much more about the landscapes he captured. Robert Sullivan's *Double Exposure* sets off in pursuit of these two enigmas. This book documents the author's own road trip across the West in search of the places many long forgotten or paved over that O'Sullivan pictured. It also stages a reckoning with how the changes wrought on the land were already under way in the 1860s and 70s and how these changes were a continuation of the Civil War by other means. Sullivan, known for his probing investigations of place in the pages of *The New Yorker* and books like *Rats* and *My American Revolution*, has produced a work that like O'Sullivan's magisterial photos of geysers and hot

Lannoo, 2018-08-10 Field biology is enjoying a resurgence due to several factors the most important being the realization that there is no ecology no conservation and no ecosystem restoration without an understanding of the basic relationships between species and their environments an understanding gleaned only through field based natural history With this resurgence modern field biologists

find themselves asking fundamental existential questions such as Where did we come from What is our story Are we part of a larger legacy In *This Land Is Your Land* seasoned field biologist Michael J Lannoo answers these questions and more in a tale rooted in the people and institutions of the Midwest It is a story told from the ground up a rubber boot based natural history of field biology in America Lannoo illuminates characters such as John Wesley Powell William Temple Hornaday and Olaus and Adolph Murie homegrown midwestern field biologists who either headed east to populate major research centers or went west to conduct their fieldwork along the frontier From the pioneering work of Victor Shelford Henry Chandler Cowles and Aldo Leopold to contemporary insights from biologists such as Jim Furnish and historians such as William Cronon Lannoo's unearthing of American and particularly midwestern field biologists reveals how these scientists influenced American ecology conservation biology and restoration ecology and in turn drove global conservation efforts through environmental legislation and land set asides *This Land Is Your Land* reveals the little known legacy of midwestern field biologists whose ethos and discoveries have enabled us to preserve and understand not just their land but all lands
