## **Grabbing Back Essays Against The Global Land Grab:**

*Grabbing Back* Alexander Reid Ross, 2014-06-09 Land grabs are a global phenomenon of our times driven by the ever increasing demands of both global corporations and the governments with which they are allied But as this powerful and timely book demonstrates ordinary citizens small farmers and ordinary citizens around the world are standing up to defend their own with passion and ingenuity and they are recording successes that are both extraordinary and inspiring Oliver Tickell Editor The Ecologist Climate change ravages the earth while wealthy elites try to grab as much of the world s diminishing resources as possible As Vandana Shiva writes land is life But land and the struggle to possess it is also power colonial and corporate power to be sure but also the power of the dispossessed to rise up and call for an end to the global land grab *Grabbing Back* maps this struggle bringing together analyses that uncover the politics of cultivation and control In this unprecedented collection on the ground activists join forces with critically acclaimed scholars to document the commodification and consumption of space from foreclosed homes to annihilated rainforests from ecotourism in Sri Lanka to the tar sands of Montana and to outline the strategies and tactics that might the destruction With contributions by Vandana Shiva Noam Chomsky Max Rameau Grace Lee Boggs Michael Hardt Ahjamu Umi Ben Dangl and many others More Praise for *Grabbing Back* Part of the reason that knowledge about the current global land grab is so uncertain is the paucity of perspectives and analysis in defining the problem This book fills the gap admirably Raj Patel author of *Stuffed and Starved* The acquisition control and exploitation of land as well as the simultaneous dispossession of land based and peasant communities is central to the processes of both colonialism and capitalism As Fanon reminds us egalitarian governance and stewardship of land is fundamental to the struggle for liberation and self determination for all oppressed peoples This makes *Grabbing Back* a necessary study for anticapitalist and anticolonial movements Harsha Walia author of *Undoing Border Imperialism* Grab back this sparkling mosaic of essays as a treasure of our new old knowledge commons Together these pieces replace dichotomies with dialectics making explicit the inseparability of land and collective life Together they restore the vital concept of social ecology in resistance to relentless and increasingly apocalyptic capitalism with emphasis on its second contradiction its impossibility on a finite resource base Maia Ramnath author of *Decolonizing Anarchism* As the forces of thanatos leave no stone unturned in their quest to dominate the entire planet this anthology provides a much needed antidote Weaving together accounts from around the world the authors advocate building grassroots movements aimed at subverting capital s incessant assault on our lives and land George Katsiaficas author of *Asia s Unknown Uprisings* Never perhaps has the land question been so crucial for anti capitalist movements as we are witnessing a global process of enclosure that privatizes lands waters forests displacing millions from their homes and placing monetary gates to what we rightly considered our commonwealth It is essential then that we understand what motivates this drive and its effects in all their social and spatial dimensions *Grabbing Back* takes us through this process identifying the reasons and actors behind

this global land grab and most important introducing us to the struggles that people are making across the world to resist being evicted from their lands and to reclaim the earth George Caffentzis Committee for Academic Freedom in Africa

*Grabbing Back Essays Against the Global Land Grab* A Ross,2014 In this unprecedented collection on the ground activists join forces with critically acclaimed scholars to document the commodification and consumption of space from foreclosed homes to annihilated rainforests from ecotourism in Sri Lanka

**Ecology and Power in the Age of Empire** Corey Ross,2017 Ecology and Power in the Age of Empire provides the first wide ranging environmental history of the heyday of European imperialism from the late nineteenth century to the end of the colonial era It focuses on the ecological dimensions of the explosive growth of tropical commodity production global trade and modern resource management strategies that still visibly shape our world today and how they were related to broader social cultural and political developments in Europe s colonies Covering the overseas empires of all the major European powers Corey Ross argues that tropical environments were not merely a stage on which conquest and subjugation took place but were an essential part of the colonial project profoundly shaping the imperial enterprise even as they were shaped by it The story he tells is not only about the complexities of human experience but also about people s relationship with the ecosystems in which they were themselves embedded the soil water plants and animals that were likewise a part of Europe s empire Although it shows that imperial conquest rarely represented the signal ecological trauma that some accounts suggest it nonetheless demonstrates that modern imperialism marked a decisive and largely negative milestone for the natural environment By relating the expansion of modern empire global trade and mass consumption to the momentous ecological shifts that they entailed this book provides a historical perspective on the vital nexus of social political and environmental issues that we face in the twenty first century world

Global Burning Eve Darian-Smith,2022-04-19 How extreme right antidemocratic governments around the world are prioritizing profits over citizens stoking catastrophic wildfires and accelerating global climate change Recent years have seen out of control wildfires rage across remote Brazilian rainforests densely populated California coastlines and major cities in Australia What connects these separate events is more than immediate devastation and human loss of life In Global Burning Eve Darian Smith contends that using fire as a symbolic and literal thread connecting different places around the world allows us to better understand the parallel and related trends of the growth of authoritarian politics and climate crises and their interconnected global consequences Darian Smith looks deeply into each of these three cases of catastrophic wildfires and finds key similarities in all of them As political leaders and big business work together in the pursuit of profits and power anti environmentalism has become an essential political tool enabling the rise of extreme right governments and energizing their populist supporters These are the governments that deny climate science reject environmental protection laws and foster exclusionary worldviews that exacerbate climate injustice The fires in Australia Brazil and the United States demand acknowledgment of the global systems of inequality that undergird them connecting the political erosion of liberal democracy with the corrosion of the environment Darian Smith argues that these wildfires are closely linked through capitalism colonialism industrialization and resource extraction In thinking through wildfires as environmental and political phenomenon Global Burning challenges readers to confront the interlocking powers that are ensuring our future ecological collapse

The Lie of Global Prosperity Seth Donnelly,2015-08-27 A deconstruction of the neoliberal placations about global

capitalism exposing the inequalities of global poverty We re making headway on global poverty trills Bill Gates Decline of Global Extreme Poverty Continues reports the World Bank How did the global poverty rate halve in 20 years inquires The Economist Seth Donnelly answers It didn t In fact according to Donnelly virtually nothing about these glad tidings proclaiming plummeting global poverty rates is true It s just that trend setting neoliberal experts and institutions need us to believe that global capitalism now unfettered in the wake of the Cold War and bolstered by Information Technology has ushered in a new phase of international human prosperity This short book deconstructs the assumption that global poverty has fallen dramatically and lays bare the spurious methods of poverty measurement and data on which the dominant prosperity narrative depends Here is carefully researched documentation that global poverty and the inequalities and misery that flourish within it remains massive afflicting the majority of the world s population Donnelly goes further to analyze just how global poverty rather than being reduced is actually reproduced by the imperatives of capital accumulation on a global scale Just as the global environmental catastrophe cannot be resolved within capitalism rooted as it is in contemporary mechanisms of exploitation and plunder neither can human poverty be effectively eliminated by neoliberal advances

**Debriefing Elsipogtog** Miles Howe, 2015-05-01 T00:00:00Z In 2009 the New Brunswick provincial government provided a licence to search over a million hectares of land to Texas based Southwestern Energy for the purposes of natural gas extraction For years tens of thousands of New Brunswickers signed petitions wrote letters demonstrated and sought legal recourse against the deal and the threat of hydraulic fracturing it brought with it but the province responded only with diminished regulations and increased police presence In the spring of 2013 Elsipogtog First Nation the largest Indigenous community in New Brunswick became the focal point of this resistance Emboldened to its

potential to make political change and accompanied by unexpected settler and Indigenous allies Elsipogtog First Nation employed new tactics in the effort to expel Southwestern Energy And after months of blockades which resulted in the destruction of company property and numerous arrests the protestors were finally successful in forcing the gas giant to leave the province Written by journalist Miles Howe who was embedded in the community from the beginning of the 2013 struggle Debriefing Elsipogtog offers a riveting firsthand on the ground and behind the scenes account of this story Through an examination of the political forces and motivations that led to one seventh of New Brunswick being leased to the Texas based company the diminishment of regulatory oversight and a compromised Indigenous consultation process Howe explores not only how people allied to build this movement but also how the state intervened to undermine resistance and willfully ignored inherent treaty rights and responsibilities The success of this grassroots movement in turning back the fifth largest natural gas extraction company in North America is truly a testament to the power people hold when they join together to oppose capitalist exploitation and environmental destruction
