 point grading model is not always a reliable way to evaluate student learning But is there another way to more accurately
 and equitably grade students and provide high quality information to parents while fostering student learning If so why
 haven t school districts across the country changed their practices In Changing the Grade author and educator Jonathan
 Cornue presents a detailed model for developing a more reliable standards based grading system including 30 steps to guide
 you through the process In addition to identifying and addressing the barriers to change such as concerns about how
 colleges and employers will interpret an alternative grading model Cornue offers a concrete structure for changing the
 grading system providing guidance on Thinking in a new way about why grades are given and the purpose of a report card
 grade Identifying what needs to be changed and what actions must be taken to facilitate the change Building a team of
 stakeholders including teachers principals and guidance counselors to lead the change process Developing the new
 standards based grading structure Designing standards based assignments and assessments that align with a new grading
 structure Avoiding grade inflation and Getting buy in from teachers and other staff members principals administrators the
 board of education and the community by demonstrating that the change process is intentional research based student
 focused and permanent The book also includes helpful samples of standards based gradebooks homework assignments
 rubrics and report cards If you are interested in making a systemic and systematic shift to a high quality grading structure
 that is far less subjective than many commonly found in schools consider Changing the Grade Specifications Grading
 Linda B. Nilson,2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to
 grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to
 their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and
 employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and
 unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a
 hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This
 new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading
 time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and
 the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while
 upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering
 their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of
 which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the

bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards 2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel 4 Fosters Higher Order Cognitive Development and Creativity 5 Discourages Cheating 6 Reduces Student Stress 7 Makes Students Feel Responsible for Their Grades 8 Minimizes Conflict Between Faculty and Students 9 Saves Faculty Time and Is Simple to Administer 10 Makes Expectations Clear and Simplifies Feedback for Improvement 11 Assesses Authentically 12 Achieves High Inter Rater Agreement

The Theory and Practice of Grading Writing Frances Zak, Christopher C. Weaver, 1998-02-05 CHOICE 1998 Outstanding Academic Books Grading is one of the thorniest issues writing teachers must deal with yet surprisingly little has been written on this topic As writing teachers move increasingly toward practices that focus on writing as a process they face a growing need to reconsider their systems of grading to determine whether or not these systems support their pedagogies The authors interrogate the grading of individual papers as well as portfolios and the assigning of end of term grades This collection explores the issues and problems that have emerged as conventional grading practices have lagged behind and been challenged by new theories of language While the book will be of interest to theorists Zak and Weaver have also made the book relevant and useful to teachers whose primary interest is the practical consequences of theory in their classrooms Where theoretical discussion takes place the language is clear and accessible Many of the authors write directly from personal experience telling stories of the classroom or writing of new techniques and approaches they have tried They speak with the voices of teachers and the tone and content of their words convey a sense of the immediacy of the topic

Charting a Course to Standards-Based Grading Tim R. Westerberg, 2016-08-24 What s the best way to ensure that grading policies are fair accurate and consistent across classrooms How can schools transition to a grading system that better reflects what students are actually learning Tim R Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment Destination 1 critically examines such popular grading mechanisms as the zero extra credit the semester killer project averaging mixing academic performance with work ethic and refusing to accept late work and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students Destination 2 invites educators to put assessment and grading into the larger context of a districtwide guaranteed and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades Destination 4 competency based education involves a total rethinking of the nature and structure of school leading to individualized education for all students However far they choose to go administrators and teacher leaders can turn to Charting a Course to Standards Based Grading for the quick wins and long term support and guidance they need to make the trip well worth the effort
