Good evening friends, family, faculty, and fellow graduates.

As we stand here today, on the brink of a new chapter in our lives, it's hard to believe that it's already been four years (or however long it took us to get here). It seems like just yesterday that we were nervously stepping onto campus, not quite sure what to expect.

But as we look back on the past four years, it's clear that we've come a long way. We've made new friends, learned new things, and grown as individuals. We've faced challenges and overcome them, and we've learned to persevere through difficult times.

And as we move on from this chapter in our lives, I encourage each and every one of us to remember the lessons we've learned and the experiences we've had. These experiences will shape who we are and how we approach the world, and they will serve us well in the years ahead.

But before we get too ahead of ourselves, let's take a moment to reflect on how we got here. I'm sure we all have different stories and experiences, but there are a few things that I think we can all relate to.

For starters, I'm sure we can all agree that college is a lot of hard work. Between classes, assignments, and exams, it's easy to get bogged down and feel overwhelmed. But despite the challenges, we've persevered and made it to this point.

I'm also sure that we've all had moments where we felt lost or unsure of ourselves. It's natural to feel that way, especially when you're trying to navigate a new environment and figure out your place in the world. But despite these moments of uncertainty, we've found our footing and discovered our passions.

And most importantly, I'm sure we can all agree that college has been an amazing experience. We've had the opportunity to learn from some of the best professors in the field, engage in meaningful discussions and debates, and be part of a community of like-minded individuals.

So, as we move on from this chapter in our lives, let's remember to be grateful for the experiences we've had and the people who have supported us along the way. To our parents, who have always believed in us and encouraged us to pursue our dreams, thank you for your unwavering love and guidance. To our teachers and mentors, who have imparted their knowledge and wisdom upon us, thank you for your invaluable guidance and encouragement. And to our friends, who have stood by us through thick and thin, thank you for your friendship and support.

Anatomy of a Crisis David M. Ayres, 2000-02-01 In 1993 the United Nations sponsored national elections in Cambodia signaling the international community s commitment to the rehabilitation and reconstruction of what was by any measure a shattered and torn society Cambodia s economy was stagnant The education system was in complete disarray Students had neither pens nor books teachers were poorly trained and classrooms were literally crumbling Few of the individuals and organizations responsible for financing planning and implementing Cambodia s post election development thought it necessary to ask why the country s economy and society were in such a parlous state The mass graves scattered throughout the countryside provided an obvious explanation The appalling state of the education system many argued could be directly attributed to the fact that among the 1 7 million victims of Pol Pot s holocaust were thousands of students teachers technocrats and intellectuals In this exacting and insightful examination of the crisis in Cambodian education David M Ayres challenges the widespread belief that the key to Cambodia s future development and prosperity lies in overcoming the dreadful legacy of Khmer Rouge He seeks to explain why Cambodia has struggled with an educational crisis for more than four decades including the years before the Khmer Rouge came to power in 1975 and thus casts the net of his analysis well beyond Pol Pot and his accomplices Drawing on an extensive range of sources Ayres clearly shows that Cambodia s

educational dilemma the disparity between the education system and the economic political and cultural environments which it should serve can be explained by setting education within its historical and cultural contexts Themes of tradition modernity change and changelessness are linked with culturally entrenched notions of power hierarchy and leadership to clarify why education funding is promised but rarely delivered why schools are built where they are not needed why plans are enthusiastically embraced but never implemented and why contracts and agreements are ignored almost immediately after they are signed Anatomy of a Crisis will be compulsory reading for anyone with an interest in education and development issues as well as Cambodian society culture politics and history **A Soldier and a Woman** Gerard J.De Groot,C

Kate Moody,2018-12-11 The People s Professors How Cuba Achieved Education for All describes how Cuba managed in spite of scarce resources to successfully educate its entire population after the revolution in 1959 It details how illiterate peasants learned to read and write how the nation s vision of education was developed how the national school system was doubled in size thousands of teachers were educated and now how Cuba is entering the realm of digital media and the internet The people of Cuba can read and write better than the citizens of most countries including the United States Moreover Cubans excel on international measures of math science the arts and healthcare This book considers Cuba s schools as well as its integrated systems such as healthcare and community mental health and makes a case for the principles that education is a human right and that teaching is the responsibility of everyone Playing the Academic Game Bryn
