Pratt, 2016-03-29 New Guinea the largest tropical island supports a spectacular bird fauna characterized by cassowaries megapodes pigeons parrots kingfishers and owl nightjars as well as the iconic birds of paradise and bowerbirds Of the nearly 800 species of birds recorded from New Guinea more than 350 are found nowhere else on Earth This comprehensive annotated checklist of distribution taxonomy and systematics of the birds of New Guinea is the first formal review of this avifauna since Ernst Mayr's Checklist published in 1941 This new book brings together all the systematic taxonomic and distributional research conducted on the region's bird families over the last 70 years Bruce Beehler and Thane Pratt provide the scientific foundation for the names geographic distributions and systematic arrangement of New Guinea's bird fauna All technical information is annotated and a geographic gazetteer and bibliography are included This book is an ideal complement to the Birds of New Guinea field guide also published by Princeton and is an essential technical reference for all scientific libraries ornithologists and those interested in bird classification The first complete revision of the New Guinea bird fauna since 1941 Accounts for 75 bird species new to the region Includes a geographic gazetteer bibliography and explanations of taxonomic and systematic classifications **Clark's Horse Review**, 1901 **Global Port Cities in North America** Boris Vormann, 2014-11-27 As the material anchors of globalization North America's global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public Landscapes and Landforms of England and Wales Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few

million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection **Heathland** Clive

Chatters,2021-03-04 In Clive we have an ever fascinating guide to Britain s heathery districts not only marvelling at the wildlife of such wild places but also celebrating their diverse origins uses and cultural resonances Andrew Byfield Heathlands are so much more than simply purple carpets of heather They are ancient landscapes found throughout Britain that support a complex of inter related species and an immense diversity of habitats They also possess a unique human history defined by the struggle between pastoralism and the competing demands of those who seek exclusive use of the land In this latest addition to the British Wildlife Collection Clive Chatters introduces us to Britain s heathlands and their anatomy He then takes the reader on a geographical heathland tour from the maritime sub arctic of the Shetlands to the mild wetness of the Atlantic coast with an in memoriam nod to those heaths that have been erased from common memory and understanding He concludes with a review of how people have perceived and used heathland wildlife over the ages and sets out a future vision for this iconic landscape its unique habitats and the species that live there Most of our heaths are pale shadows of their former selves However Chatters argues it is not inevitable that the catastrophic losses of the recent past are the destiny of our remaining heaths Should we wish their place in the countryside as an integral part of British culture can be secured
