Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives and democratic political integration, economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post-apartheid state's apparent neo-liberal turn. The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state. These trends include the impact of globalisation, regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy, thus unpacking the possible role that South Africa might play in regional development. This volume will be a valuable resource to academics, researchers and students in the fields of regional studies, economics and political theory as well as policymakers, planners and local economic development practitioners.

Regional Development Agencies: The Next Generation? Nicola Bellini, Mike Danson, Henrik Halkier, 2012-09-10 Across Europe, regional development agencies (RDAs) have become a central feature of regional policy both as innovative policy makers and as the implementers of programmes and initiatives originating from the national or European level. By drawing on a combination of conceptual reflection, surveys, comparative research and systematic use of critical case studies, this book provides a new point of reference by identifying key features of the current and indeed next generation of regionally based economic development organisations.

Research Directions, Challenges and Achievements of Modern Geography Jerzy Bański, Michael Meadows, 2023-12-01 This book identifies and discusses research directions, challenges and achievements in contemporary geography. It also documents the most current theoretical and methodological considerations undertaken by scientists representing various sub-disciplines of geography with particular reference to human geography. It was assumed that the thematic structure of the currently active International Geographical Union (IGU) problem commissions corresponds to the most relevant and current research directions in geography. Reflecting this assumption, the book consists of 14 chapters contributed by geographers representing 14 problem commissions of the IGU, which allows us to examine geography from different perspectives and to provide the reader with a complete overview of contemporary research issues in human geography. The first part discusses contemporary research problems and issues.

related to scientific methodology and achievements of selected geographical sub disciplines including urban geography agricultural geography transport geography and political geography among others The second part focuses on the interdisciplinarity of geography and the topics of global dimension undertaken by geographers such as global change GIS and geospatial technology marginalization and environmental change This part also discusses the internal relations between geographical specializations and their links with other related sciences including geology sociology and economics The third part discusses the holistic approaches of geography applied to particular regions territories or conditions Africa coastal systems geomorphology and local development

Regional Development and Proximity Relations André Torre,Frédéric Wallet,2014-02-28 The notion of proximity is increasing in popularity in economic and geographic literature and is now commonly used by scholars in regional science and spatial economics

Urban and Regional Planning and Development Rajiv R. Thakur,Ashok K. Dutt,Sudhir K. Thakur,George M. Pomeroy,2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed It addresses questions such as What are the factors affecting planning dynamics at local regional national and global scales With the push to adopt a market paradigm in land development and infrastructure the relationship between resource management sustainable development and the role of governance has been transformed Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia Africa and Latin America Further attempts are being made to bring planning related decision making closer to the people who are most affected by it Presenting a collection of studies from scholars around the world and highlighting recent advances in the field the book is a valuable reference guide for those engaged in urban transformations whether as graduate students researchers practitioners or policymakers

Learning Transnational Learning Åge Mariussen,Seija Virkkala,2013-05-02 Systems of innovation that are conducted within national borders can preserve inefficient solutions and prevent development This has led to a feeling that transnational learning strategies are more and more desirable In practice the field of transnational learning has been dominated by various policy making institutions such as the OECD and European Union working through different types of policy instruments and programs such as structural funds open methods of coordination as well as international research institutions and networks set up by cooperating national governments working on comparative analysis benchmarking and indicators This book lays out a set of methods which can further enhance the experience of transnational learning starting from the sociological ideas promoted by Charles Sabel of learning through monitoring and by Marie Laure Djelic and others of the translation of experiences between different countries Case studies and examples are collected from three fields industrial development tourism and local government

The Regional Development Guide, 1966-2000 National Capital Regional Planning Council (U.S.),1966 *Financialising City Statecraft and*

Infrastructure Andy Pike, Peter O'Brien, Tom Strickland, John Tomaney, 2019 Financialising City Statecraft and Infrastructure addresses the struggles of national and local states to fund finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city region risk undermining national rebalancing efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation risk taking and prospective venturing with co-ordination, planning and regulation.
