it is widely accepted that global socio political and economic developments have allowed supranational institutions functioning across nation states rather than within them to perform many state functions with regards to education policy development and implementation Yet much remains unknown and under researched about the impact of these still nascent developments on the trajectory of intercultural education This book sets out to fill in this gap by examining the intersection of globalisation and intercultural education through macro micro integration After all for modern societies to establish social cohesion education research should examine issues of citizenship democracy and intercultural education under the lens of globalisation

*The Oxford Companion to Comparative Politics* Joel Krieger, 2013 The two volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science Comparative Politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit Comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations Each of these theories and outcomes are thoroughly defined in the Companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100 new entries would thoroughly examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues

and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists

**Educational Leadership for Ethics and Social Justice** Anthony

H. Normore, Jeffrey S. Brooks, 2014-01-01 The purpose of this book is to examine and learn lessons from the way leadership for social justice is conceptualized in several disciplines and to consider how these lessons might improve the preparation and practice of school leaders In particular we examine philosophy anthropology sociology economics political science public policy and psychology Our contention is that the field of educational leadership might consider taking a step backward in order to take several forward That is educational leadership researchers might re-examine social justice both in terms of social and individual dynamics and as disciplinary specific multidisciplinary and interdisciplinary phenomenon By adopting this approach we can connect and extend long established lines of conceptual and empirical inquiry and thereby gain insights that may otherwise be overlooked or assumed This holds great promise for generating refining and testing theories of social justice in educational leadership and will help strengthen already vibrant lines of inquiry That is rather than citing a single or a few works out of their disciplinary context it might be more fruitful to situate educational leadership for social justice research in their respective traditions This could be carried out by extending extant lines of inquiry in educational leadership research and then incorporating lessons gleaned from this work into innovative practice For example why not more clearly establish lines of educational leadership and justice research into the Philosophy of Social Justice Economics of Social Justice

Political Studies of Social Justice Sociology of Social Justice Anthropology of Social Justice and the Public Policy of Social Justice as focused and discrete areas of inquiry Once this new orientation toward the knowledge base of social justice and educational leadership is laid we might then seek to explore some of the natural connections between traditions before ultimately investigating justice in educational leadership through a free association of ideas as the worlds of practice and research co construct a new language they can use to discuss educational leadership Such an endeavor may demand reconceptualization of both the processes and products of collaborative research and the communication of findings but it will demand a breaking down of methodological and epistemological biases and a more meaningful level and type of engagement between primary and applied knowledge bases
