Targeting Investments in Children Phillip B. Levine, David J. Zimmerman, 2010-10-15 A substantial number of American children experience poverty about 17 percent of those under the age of eighteen meet the government's definition and the proportion is even greater within minority groups Childhood poverty can have lifelong effects resulting in poor educational labor market and physical and mental health

outcomes for adults These problems have long been recognized and there are numerous programs designed to alleviate or even eliminate poverty as these programs compete for scarce resources it is important to develop a clear view of their impact as tools for poverty alleviation Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric their impact on earnings in adulthood The volume's contributors explore a variety of issues such as the effect of interventions targeted at children of different ages and study a range of programs including child care after school care and drug prevention The results will be invaluable to educational leaders and researchers as well as policy makers **Handbook of Research on Educational Administration** Joseph Murphy, Karen Seashore

Louis, 1999-04-26 Over the past ten years a variety of leadership theories and practices have both influenced and responded to widespread changes in education This volume examines the technical managerial and institutional dimensions of leadership and shows how they relate to changing views of teaching and learning to new forms of school organization and governance and to shifting trends in the social and community climate of schooling **International Encyclopedia of**

Education, 2009-04-17 The field of education has experienced extraordinary technological societal and institutional change in recent years making it one of the most fascinating yet complex fields of study in social science Unequaled in its combination of authoritative scholarship and comprehensive coverage International Encyclopedia of Education Third Edition succeeds two highly successful previous editions 1985 1994 in aiming to encapsulate research in this vibrant field for the twenty first century reader Under development for five years this work encompasses over 1 000 articles across 24 individual areas of coverage and is expected to become the dominant resource in the field Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing over 100 countries capturing a complete portrait of this evolving field A totally new work revamped with a wholly new editorial board structure and brand new list of meta sections and articles Developed by an international panel of editors and authors drawn from senior academia Web enhanced with supplementary multimedia audio and video files hotlinked to relevant references and sources for further study Incorporates ca 1 350 articles with timely coverage of such topics as technology and learning demography and social change globalization and adult learning to name a few Offers two content delivery options print and online the latter of which provides anytime anywhere access for multiple users and superior search functionality via ScienceDirect as well as multimedia content including audio and video files **Educational Inequality and School Finance** Bruce D. Baker, 2021-02-09

In Educational Inequality and School Finance Bruce D Baker offers a comprehensive examination of how US public schools receive and spend money Drawing on extensive longitudinal data and numerous studies of states and districts he provides a vivid and dismaying portrait of the stagnation of state investment in public education and the continuing challenges of

achieving equity and adequacy in school funding Baker explores school finance the school and classroom resources derived from school funding and how and why those resources matter He provides a critical examination of popular assumptions that undergird the policy discourse around school funding notably that money doesn't matter and that we are spending more and getting less and shows how these misunderstandings contribute to our reluctance to increase investment in education at a time when the demands on our educational system are rising Through an introduction to the concepts of adequacy equity productivity and efficiency Baker shows how these can be used to evaluate policy reforms He argues that we know a great deal about the role and importance of money in schools the mechanisms through which money matters for student outcomes and the trade offs involved and he presents a framework for designing and financing an equitable and adequate public education system with balanced and stable sources of revenue Educational Inequality and School Finance takes an issue all too often relegated to technical experts and makes it accessible for broader public empowerment and engagement **What**

Comes After Lunch? Thomas Downes, Kieran M. Killeen, 2024-02-01 Faced with the problem of how to measure the magnitude of economic disadvantage in the populations served by schools or districts researchers addressing school finance topics have invariably turned to the fraction of students eligible for free or reduced lunches FRPL But the facile dependence on FRPL may be problematic A large and growing literature in learning sciences and in the field of education itself has pivoted towards studies that explore the relationship between social emotional health and the learning of children The growing body of research on social emotional health and learning e.g. Gershoff Abernethy and Lennon 2007 suggests that more refined measures of wealth income and hardship more fully account for the effects of economic disadvantage than does FRPL Historically research in school finance has not utilized these refined measures but instead has depended on FRPL The Community Eligibility Provision CEP a recent change in how student eligibility for free lunch is determined may have the unintended and yet fortuitous consequence that it will force school finance researchers to use more sophisticated measures of student hardship The CEP makes it possible for schools serving low income populations to classify all students as eligible for free or reduced price lunch Koedel and Parsons 2021 argue that while FRPL might have been a workable measure of student disadvantage prior to CEP post CEP the extent of a school's or a district's population that is disadvantaged is no longer measured accurately by FRPL The CEP made accurate FRPL counts less critical for many schools and districts post pandemic legislation Vock 2023 in a number of states to make school meals free for all students in those states has increased the number of districts for which accurate counts are unimportant Fazlul Koedel and Parsons 2023 go on to argue that even prior to CEP FRPL failed to provide an accurate measure of a school or district's poverty This new policy environment makes it imperative to explore alternatives to FRPL and the implications for school finance The book aims to provide a timely collection of new research on a measurement issue that is central to much research on K-12 education finance The book is meant to serve scholars in education finance and policy who need a refined perspective on the context of schooling The book

is also meant to serve students and faculty from programs in public administration public policy community development and applied economics education administration educational leadership and policy studies who are studying content related to education policy the economics of education state and local public finance and taxation Some upper level undergraduate students may also benefit from this resource **ENDORSEMENTS** Fundamental to understanding the efficacy of many policies and interventions is having a clear picture of student poverty The increasing uncertainty about the validity of student poverty measures due to changes in the free and reduced price lunch program in schools thus creates challenges for researchers and policymakers alike This book offers insights into how to think about the ongoing utility of existing and new measures of students economic and social disadvantage a topic that is both timely and important Dan Goldhaber American Institutes for Research and University of Washington Understanding differences across schools in what they provide for students and particularly the extent to which students living in poverty have access to differential opportunities is essential for effective policy making Yet policy makers and education decision makers have not had accurate measures of their students economic resources especially since changes in the subsidized lunch program This important book offers needed suggestions for a range of new and reliable measures and related directions for research to improve education decision making Susanna Loeb Stanford University

State and Local Public Finance Ronald C. Fisher, 2018-09-03 Now in its 4th edition **State and Local Public Finance** provides a comprehensive and sophisticated analysis of state and local government public finance practices and issues using the basic tools of economics For this new edition there is a focus on the most important services provided in the state local sector education health and welfare public safety and transportation This textbook provides an examination and analysis of public finance practices and problems in a federal fiscal system focusing on the fiscal behaviour and policies of state and local governments The author presents detailed descriptions of significant institutions Modern economic theory is applied to examine the way these institutions are used to produce and finance services and to provide evaluation of alternative policies Although the emphasis is on U S institutions and issues much of the economic analysis can be applied to any federal system or to fiscal decentralization This fully revised new edition sees updates throughout to data topics and applications The Headlines and Applications sections reflect the most current policy issues affecting state and local governments These include the effects of the Great Recession on state and local governments changes in the tax treatment of internet purchases the Affordable Care Act and implications for Medicaid spending by state governments demographic changes and the implications for state local finances the implications of changes in automobile technology for transportation financing and the potential for increased gambling activity This text will continue to be invaluable reading for those who study public finance local government finance urban economics and public policy and public administration

The Political Economy of Higher Education Finance Julian L. Garritzmann, 2016-08-17 This book analyzes the political economy of higher education finance across a range of OECD countries exploring why some students pay extortionate tuition

fees whilst for others their education is free What are the redistributive consequences of these different tuition subsidy systems Analysing the variety of existing systems Garritzmann shows that across the advanced democracies Four Worlds of Student Finance exist Historically however all countries higher education systems looked very much alike in the 1940s The book develops a theoretical model the Time Sensitive Partisan Theory to explain why countries have evolved from a similar historical starting point to today s very distinct Four Worlds The empirical analyses combine a wide variety of qualitative and quantitative evidence studying higher education policies in all advanced democracies from 1945 2015 *Research in Education* ,1974

Decentralization and decentralized education finance in Egypt (2007-2013) F. Henry Healey,Rafik Hanna,Hany Attalla,2016-01-07 Over the period 2007 2013 a series of undertakings were made to introduce fundamental elements of decentralized education finance to Egypt In 2009 8 4M Egyptian pounds EGP of the Government of Egypt s GOE budget was decentralized to every primary school in three pilot governorates By 2013 EGP 1 2B of the GOE s money had been decentralized nationwide This paper describes what these undertakings strived to achieve what specifically was done to achieve these objectives the degree to which these objectives were achieved the reasons why they were achieved to the degree they were with particular attention paid to the institutional and political context within which these undertakings unfolded The account of the technical work that was undertaken to decentralize these funds is important but more important is the account of the interplay between the technical work the fact that this work supported a GOE led initiative and the volatile political environment pre revolution revolution and post revolution Egypt in which the work was done for it is here where important lessons about reform emerge **Inclusive Educational Administration** Mary Konya

Weishaar,Phillip M. Weishaar,John C. Borsa,2014-01-30 The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new nor is the assumption that administrator preparation programs should foster the development of an inclusive approach yet this critical educational partnership has not reached its full potential Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system some promising points of consensus have emerged competitive grants college and career readiness multi tiered systems of support common core standards a rewards based rather than punitive system for school improvement the critical role of effective teachers and principals increased school choice options and evidence based learning strategies particularly in high need schools The third edition stresses the importance of these key points Each chapter features case studies that simulate real life situations readers are likely to encounter in their careers as administrators Within the safety of the classroom they will rehearse controversial scenarios involving inclusive school governance school reform identification and placement conflict resolution program evaluation fiscal issues transportation and discipline Enhanced practice situations and role play exercises emphasize the special education administrator s role in resolving difficult situations The case study approach is an effective learning tool for aspiring special and regular education

administrators and instructors alike fostering enthusiastic classroom discussion and critical thinking about potential solutions to today's complex problems in inclusive educational administration

Volatility in State Spending for Higher Education Jennifer A. Delaney, 2023-10-30 The severity of cuts and the unpredictability in state funding for higher education have garnered headlines across the nation since the turn of the present century In this context the authors in this new groundbreaking volume argue that too little attention is paid to the consequences of volatility in funding as most discussions focus on levels of funding Their research addresses an important blind spot in the academic literature since predictability matters to institutions students families and states In addition the risks of operating in an uncertain financial environment have led to behaviors that are not always in the best interests of states institutions faculty students or the public good
