Head First Html With Css And Xhtml:

Head First HTML and CSS Elisabeth Robson, Eric Freeman, 2012 Presents information on creating Web pages using HTML and CSS

Head First HTML with CSS & XHTML Elisabeth Freeman, Elisabeth Robson, Eric Freeman, 2006 A learner's guide to creating standards based Web pages

Head First HTML5 Programming Eric Freeman, Elisabeth Robson, 2011-10-06 HTML has been on a wild ride Sure HTML started as a mere markup language but more recently HTML's put on some major muscle Now we've got a language tuned for building web applications with Web storage 2D drawing offline support sockets and threads and more And to speak this language you've got to go beyond HTML5 markup and into the world of the DOM events and JavaScript APIs Now you probably already know all about HTML markup otherwise known as structure and you know all about CSS style presentation but what you've been missing is JavaScript behavior If all you know about are structure and presentation you can create some great looking pages but they're still just pages When you add behavior with JavaScript you can create an interactive experience even better you can create full blown web applications

Head First HTML5 Programming is your ultimate tour guide to creating web applications with HTML5 and JavaScript and we give you everything you need to know to build them including how to add interactivity to your pages how to communicate with the world of Web services and how to use the great new APIs being developed for HTML5 Here are just some of the things you'll learn in **Head First HTML5 Programming** Learn how to make your pages truly interactive by using the power of the DOM Finally understand how JavaScript works and take yourself from novice to well informed in just a few chapters Learn how JavaScript APIs fit into the HTML5 ecosystem and how to use any API in your web pages Use the Geolocation API to know where your users are Bring out your inner artist with Canvas HTML5's new 2D drawing surface Go beyond just plugging a video into your pages and create custom video experiences Learn the secret to grabbing five megabytes of storage in every user's browser Improve your page's responsiveness and performance with Web workers And much more

Head First Html With Css & Xhtml Freeman, 2005-01-01 Tired of reading HTML books that only make sense after you're an expert Then it's about time you picked up **Head First HTML CSS** and really learn HTML You want to learn HTML so you can finally create those Web pages you've always wanted so you can communicate more effectively with friends family fans and fanatic customers You also want to do it right so you can actually maintain and expand your Web pages over time and so your Web pages work in all the browsers and mobile devices out there Oh and if you've never heard of CSS that's okay we won't tell anyone you're still partying like it's 1999 but if you're going to create Web pages in the 21st century then you'll want to know and understand CSS

Head First JQuery Ryan Benedetti, Ronan Cranley, 2011-09-21 Explains how to build complex scripting functionality with minimal coding providing coverage of functions ranging from incorporating Ajax apps and overcoming the limits of HTML and CSS to building plug-ins and using animation

Head First Ajax Rebecca M. Riordan, 2008-08-26 Ajax is no longer an experimental approach to website development but the key to building browser

based applications that form the cornerstone of Web 2.0. Head First Ajax gives you an up to date perspective that lets you see exactly what you can do and has been done with Ajax. With it you get a highly practical in depth and mature view of what is now a mature development approach. Using the unique and highly effective visual format that has turned Head First titles into runaway bestsellers, this book offers a big picture overview to introduce Ajax and then explores the use of individual Ajax components including the JavaScript event model, DOM, XML, JSON and more as it progresses. You'll find plenty of sample applications that illustrate the concepts along with exercises, quizzes and other interactive features to help you retain what you've learned. Head First Ajax covers:

- The JavaScript event model
- Making Ajax requests with XMLHttpRequest objects
- The asynchronous application model
- The Document Object Model (DOM)
- Manipulating the DOM in JavaScript
- Controlling the browser with the Browser Object Model
- XHTML Forms
- POST Requests
- XML Syntax and the XML DOM tree
- XML Requests
- Responses
- JSON an alternative to XML
- Ajax architecture patterns
- The Prototype Library

The book also discusses the server side implications of building Ajax applications and uses a black box approach to server side components. Head First Ajax is the ideal guide for experienced web developers comfortable with scripting, particularly those who have completed the exercises in Head First JavaScript and for experienced programmers in Java, PHP and C who want to learn client side programming.

Head First JavaScript Michael Morrison, 2007-12-20. So you're ready to make the leap from writing HTML and CSS web pages to creating dynamic web applications. You want to take your web skills to the next level. And you're finally ready to add programmer to the resume. It sounds like you're ready to learn the Web's hottest programming language: JavaScript. Head First JavaScript is your ticket to going beyond copying and pasting the code from someone else's web site and writing your own interactive web pages. With Head First JavaScript you learn:

- The basics of programming from variables to types to looping
- How the web browser runs your code and how you can talk to the browser with your code
- Why you'll never have to worry about casting, overloading or polymorphism when you're writing JavaScript code
- How to use the Document Object Model to change your web pages without making your users click buttons

If you've ever read a Head First book you know what to expect: a visually rich format designed for the way your brain works. Head First JavaScript is no exception. It starts where HTML and CSS leave off and takes you through your first program into more complex programming concepts like working directly with the web browser's object model and writing code that works on all modern browsers. Don't be intimidated if you've never written a line of code before. In typical Head First style, Head First JavaScript doesn't skip steps and we're not interested in having you cut and paste code. You'll learn JavaScript, understand it and have a blast along the way. So get ready: dynamic and exciting web pages are just pages away.
