

Whole Body Vibration in Agriculture

Whole Body Vibration (WBV) occurs when the shaking motion of a vehicle is transmitted through the body of the operator

The vibration energy from the vehicle is transferred to the operator through the **FEET, SEAT or BACKREST**

WBV can come from any vehicle on which you sit or drive

Some examples of farm vehicles include ATVs, trucks, and tractors

Health Effects of WBV

Muscle fatigue and cramping

Speech interference

Disruption of balance and perception

Increased heart rate and blood pressure

Increased breathing rate

Low back pain and damage to the spine

Best practices for preventing WBV:

Perform routine maintenance on vehicle and seat suspensions

Consider retro-fitting suspension seats for older vehicles

Ensure seat suspension system is adjusted for body weight

Reduce vehicle speed over rough terrain

Rotate workers for tasks with continuous vehicle operation or take breaks
