Mapguide Open Source Examples:

Open Source Approaches in Spatial Data Handling Brent Hall, Michael G. Leahy, 2008-09-27 The role open source geospatial software plays in data handling within the spatial information technology industry is the overarching theme of the book. It also examines new tools and applications for those already using OS approaches to software development. *Best Practices for Managing Geospatial Data*, GeoComputation, Second Edition Robert J. Abrahart, Linda M. See, 2014-06-23 A revision of Openshaw and Abrahart's seminal work *GeoComputation* Second Edition retains influences of its originators while also providing updated state of the art information on changes in the computational environment. In keeping with the field's development this new edition takes a broader view and provides comprehensive coverage across the field of *GeoComputation*. See What's New in the Second Edition Coverage of ubiquitous computing the GeoWeb reproducible research open access and agent based modelling Expanded chapter on Genetic Programming and a separate chapter developed on Evolutionary Algorithms Ten chapters updated by the same or new authors and eight new chapters added to reflect state of the art. Each chapter is a stand alone entity that covers a particular topic. You can simply dip in and out or read it from cover to cover. The opening chapter by Stan Openshaw has been preserved with only a limited number of minor essential modifications having been enacted. This is not just a matter of respect. Openshaw's work is eloquent prophetic and his overall message remains largely unchanged. In contrast to other books on this subject *GeoComputation* Second Edition supplies a state of the art review of all major areas in *GeoComputation* with chapters written especially for this book by invited specialists. This approach helps develop and expand a computational culture one that can exploit the ever increasing richness of modern geographical and geospatial datasets. It also supplies an instructional guide to be kept within easy reach for regular access and when need arises. *GeoComputation* Robert J. Abrahart, Linda M. See, 2014-06-23 A revision of Openshaw and Abrahart's seminal work *GeoComputation* Second Edition retains influences of its originators while also providing updated state of the art information on changes in the computational environment. In keeping with the field's development this new edition takes a broader view and provides comprehensive coverage across the Advanced GIS and RS. Management Association, Information Resources,2019-03-01 Decision makers such as government officials need to better understand human activity in order to make informed decisions With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data they are better able to measure factors affecting the human population As a broad field of study geospatial research has applications in a variety of fields including military science environmental science civil engineering and space exploration Geospatial Intelligence Concepts Methodologies Tools and Applications explores multidisciplinary applications of geographic information systems to describe assess and visually depict physical features and to gather data information and knowledge regarding human activity Highlighting a range of topics such as geovisualization spatial analysis and landscape mapping this multi volume book is ideally designed for data scientists engineers government agencies researchers and graduate level students in GIS programs

Encyclopedia of GIS Shashi Shekhar,Hui Xiong,2007-12-12 The Encyclopedia of GIS provides a comprehensive and authoritative guide contributed by experts and peer reviewed for accuracy and alphabetically arranged for convenient access The entries explain key software and processes used by geographers and computational scientists Major overviews are provided for nearly 200 topics Geoinformatics Spatial Cognition and Location Based Services and more Shorter entries define specific terms and concepts The reference will be published as a print volume with abundant black and white art and simultaneously as an XML online reference with hyperlinked citations cross references four color art links to web based maps and other interactive features **Research Anthology on Usage and Development of Open Source Software**

Management Association, Information Resources,2021-06-25 The quick growth of computer technology and development of software caused it to be in a constant state of change and advancement This advancement in software development meant that there would be many types of software developed in order to excel in usability and efficiency Among these different types of software was open source software one that grants permission for users to use study change and distribute it freely Due to its availability open source software has quickly become a valuable asset to the world of computer technology and across various disciplines including education business and library science The Research Anthology on Usage and Development of Open Source Software presents comprehensive research on the design and development of open source software as well as the ways in which it is used The text discusses in depth the way in which this computer software has been

made into a collaborative effort for the advancement of software technology. Discussing topics such as ISO standards, big data, fault prediction, open collaboration, and software development, this anthology is essential for computer engineers, software developers, IT specialists, and consultants, instructors, librarians, managers, executives, professionals, academicians, researchers, and students.

Human Machine Interaction Inaki Murtua, 2012-01-25 In this book the reader will find a set of papers divided into two sections. The first section presents different proposals focused on the human machine interaction development process. The second section is devoted to different aspects of interaction with a special emphasis on the physical interaction.

Geocomputation with R Robin Lovelace, Jakub Nowosad, Jannes Muenchow, 2019-03-22 Geocomputation with R is for people who want to analyze, visualize, and model geographic data with open source software. It is based on R, a statistical programming language that has powerful data processing, visualization, and geospatial capabilities. The book equips you with the knowledge and skills to tackle a wide range of issues manifested in geographic data, including those with scientific, societal, and environmental implications. This book will interest people from many backgrounds, especially Geographic Information Systems (GIS) users interested in applying their domain specific knowledge in a powerful open source language for data science, and R users interested in extending their skills to handle spatial data. The book is divided into three parts: I Foundations aimed at getting you up to speed with geographic data in R; II extensions which covers advanced techniques; and III applications to real world problems. The chapters cover progressively more advanced topics, with early chapters providing strong foundations on which the later chapters build. Part I describes the nature of spatial datasets in R and methods for manipulating them. It also covers geographic data import/export and transforming coordinate reference systems. Part II represents methods that build on these foundations. It covers advanced map making, including web mapping, bridges to GIS, sharing reproducible code, and how to do cross validation in the presence of spatial autocorrelation. Part III applies the knowledge gained to tackle real world problems, including representing and modeling transport systems, finding optimal locations for stores or services, and ecological modeling. Exercises at the end of each chapter give you the skills needed to tackle a range of geospatial problems. Solutions for each chapter and supplementary materials providing extended examples are available at <https://geocompr.github.io/geocompr/pkg/articles>.

Advanced Technologies, Embedded and Multimedia for Human-centric Computing Yueh-Min Huang, Han-Chieh Chao, Der-Jiunn Deng, James J. (Jong Hyuk) Park, 2013-11-13 The theme of HumanCom and EMC is focused on the various aspects of human centric computing for advances in computer science and its applications, embedded and multimedia computing, and provides an opportunity for academic and industry professionals to discuss the latest issues and progress in the area of human centric computing. And the theme of EMC Advanced in Embedded and Multimedia Computing is focused on the various aspects of embedded system, smart grid, cloud, and multimedia computing, and it provides an opportunity for academic, industry professionals to discuss the latest issues and progress in the area of embedded and multimedia computing. Therefore, this book will include the various theories and

practical applications in human centric computing and embedded and multimedia computing **Environmental Modelling, Software and Decision Support** Anthony J. Jakeman,Alexey A. Voinov,Andrea E. Rizzoli,Serena H. Chen,2008-09-11 The complex and multidisciplinary nature of environmental problems requires that they are dealt with in an integrated manner Modeling and software have become key instruments used to promote sustainability and improve environmental decision processes especially through systematic integration of various knowledge and data and their ability to foster learning and help make predictions This book presents the current state of the art in environmental modeling and software and identifies the future challenges in the field State of the art in environmental modeling and software theory and practice for integrated assessment and management serves as a starting point for researchers Identifies the areas of research and practice required for advancing the requisite knowledge base and tools and their wider usage Best practices of environmental modeling enables the reader to select appropriate software and gives the reader tools to integrate natural system dynamics with human dimensions **Quantitative Intelligence Analysis** Edward Waltz,2014-10-16 Quantitative Intelligence Analysis describes the model based method of intelligence analysis that represents the analyst s mental models of a subject as well as the analyst s reasoning process exposing what the analyst believes about the subject and how they arrived at those beliefs and converged on analytic judgments It includes Specific methods of explicitly representing the analyst s mental models as computational models dynamic simulations and interactive analytic games the structure of an analyst s mental model and the theoretical basis for capturing and representing the tacit knowledge of these models explicitly as computational models detailed description of the use of these models in rigorous structured analysis of difficult targets model illustrations and simulation descriptions the role of models in support of collection and operations case studies that illustrate a wide range of intelligence problems And a recommended curriculum for technical analysts *Representing, Modeling, and Visualizing the Natural Environment* Nick Mount,Gemma Harvey,Paul Aplin,Gary Priestnall,2008-12-22 The explosion of public interest in the natural environment can to a large extent be attributed to greater public awareness of the impacts of global warming and climate change This has led to increased research interest and funding directed at studies of issues affecting sensitive natural environments Not surprisingly much of this work has re **Big Data and Computational Intelligence in Networking** Yulei Wu,Fei Hu,Geyong Min,Albert Y. Zomaya,2017-12-14 This book presents state of the art solutions to the theoretical and practical challenges stemming from the leverage of big data and its computational intelligence in supporting smart network operation management and optimization In particular the technical focus covers the comprehensive understanding of network big data efficient collection and management of network big data distributed and scalable online analytics for network big data and emerging applications of network big data for computational intelligence **OpenLayers 2.10 Beginner's Guide** Erik Hazzard,2011-03-18 Create optimize and deploy stunning cross browser web maps with the OpenLayers JavaScript web mapping library **Analyzing the Role of Citizen Science in Modern**

Research Ceccaroni, Luigi, Piera, Jaume, 2016-10-25 As the need for sustainable development practices around the world continues to grow it has become imperative for citizens to become actively engaged in the global transition By evaluating data collected from various global programs researchers are able to identify strategies and challenges in implementing civic engagement initiatives Analyzing the Role of Citizen Science in Modern Research focuses on analyzing data on current initiatives and best practices in citizen engagement and education programs across various disciplines Highlighting emergent research and application techniques within citizen science initiatives this publication appeals to academicians researchers policy makers government officials technology developers advanced level students and program developers interested in launching or improving citizen science programs across the globe *Recent Advances in Environmental Science from the Euro-Mediterranean and Surrounding Regions* Amjad Kallel, Mohamed Ksibi, Hamed Ben Dhia, Nabil Khélifi, 2017-12-12 This volume includes the papers presented during the 1st Euro Mediterranean Conference for Environmental Integration EMCEI which was held in Sousse Tunisia in November 2017 This conference was jointly organized by the editorial office of the Euro Mediterranean Journal for Environmental Integration in Sfax Tunisia and Springer MENA Publishing Program in Germany It aimed to give a more concrete expression to the Euro Mediterranean integration process by supplementing existing North South programs and agreements with a new multilateral scientific forum that emphasizes in particular the vulnerability and proactive remediation of the Euro Mediterranean region from an environmental point of view This volume gives a general and brief overview on current research focusing on emerging environmental issues and challenges and its applications to a variety of problems in the Euro Mediterranean zone and surrounding regions It contains over five hundred and eighty carefully refereed short contributions to the conference Topics covered include 1 innovative approaches and methods for environmental sustainability 2 environmental risk assessment bioremediation ecotoxicology and environmental safety 3 water resources assessment planning protection and management 4 environmental engineering and management 5 natural resources characterization assessment management and valorization 6 intelligent techniques in renewable energy biomass wind waste solar 7 sustainable management of marine environment and coastal areas 8 remote sensing and GIS for geo environmental investigations 9 environmental impacts of geo natural hazards earthquakes landslides volcanic and marine hazards and 10 the environmental health science natural and social impacts on Human health Presenting a wide range of topics and new results this edited volume will appeal to anyone working in the subject area including researchers and students interested to learn more about new advances in environmental research initiatives in view of the ever growing environmental degradation in the Euro Mediterranean region which has turned environmental and resource protection into an increasingly important issue hampering sustainable development and social welfare
