Mapping The Silk Road And Beyond 2000 Years Of Exploring The East:

Mapping the Silk Road and Beyond Kenneth Nebenzahl, 2011-08-21 Today the world is focusing unprecedented attention on Asia and the Middle East rediscovering a cultural political and geographical landscape that has fascinated and frustrated Westerners since the time of Alexander the Great Mapping the Silk Road and Beyond traces the history of the European age of exploration and its lasting effects on these regions through an extensive series of beautifully rendered and imaginative maps drawn by explorers merchants and colonial administrators of the time The book focuses on both maritime exploration and overland discovery via the ancient Silk Road a network of trading posts that encompassed China Tibet Pakistan India Kurdistan Iraq Ethiopia Eritrea and dozens of other places known in ancient times by fabled names including Abyssinia Malacca Macassar Siam and Cathay The maps provide detailed visual keys to the fascinating history of Asia and the Middle East altogether they illuminate a cast of historical figures ranging from great leaders the Queen of Sheba Mohammed the prophet King Charles V to legendary explorers Marco Polo Columbus Magellan Sir Francis Drake Capt James Cook and influential cartographers Mapping the Silk Road and Beyond depicts over eighty maps organized in clear chronology from Alexander the Great's map of the world first created in 323 BC and reproduced in a sixteenth century atlas to maps from the nineteenth century by French and Dutch explorers that detail the growing interaction between Europeans and Eastern cultures These maps represent the finest examples in existence in museums libraries and archives around the world chosen because they depict the most important milestones in the mapping of Asia

Mapping an Atlantic World, circa 1500 Alida C. Metcalf, 2020-10-13 How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus's voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus's exploration In Mapping an Atlantic World circa 1500 Alida C Metcalf argues that the earliest surviving maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then repeated on map after map Individual maps might fall out of date

be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps **Sea of Silk** E. Jane Burns, 2014-07-14 The story of silk is an old and familiar one a tale involving mercantile travel and commercial exchange along the broad land mass that connects ancient China to the west and extending eventually to sites on the eastern Mediterranean and along sea routes to India But if we shift our focus from economic histories that chart the exchange of silk along Asian and Mediterranean trade routes to medieval literary depictions of silk a strikingly different picture comes into view In Old French literary texts from the twelfth and thirteenth centuries emphasis falls on production rather than trade and on female protagonists who make decorate and handle silk Sea of Silk maps a textile geography of silk work done by these fictional women Situated in northern France and across the medieval Mediterranean from Saint Denis to Constantinople from North Africa to Muslim Spain and even from the fantasy realm of Arthurian romance to the historical silkworks of the Norman kings in Palermo these medieval heroines provide important glimpses of distant economic and cultural geographies E Jane Burns argues in brief that literary portraits of medieval heroines who produce and decorate silk cloth or otherwise manipulate items of silk outline a metaphorical geography that includes France as an important cultural player in the silk economics of the Mediterranean Within this literary sea of silk female protagonists who work silk in a variety of ways often deploy it successfully as a social and cultural currency that enables them to traverse religious and political barriers while also crossing lines of gender and class *Mapping Our World* Peter Barber, Katherine Barnes, Dr Nigel Erskine, Rupert Gertisen, Dr Jeremy Green, Dr Susannah Helman, David Kaus, Robert J. Prehistoric Times to the Great Maya Revolt Douglas T. Peck, 2005-07-29 This book introduces an innovative and verified pattern of Maya history that follows the origin of the Olmec culture in Tabasco through its melding into and becoming the Chontal Maya Itza of the Yucatan. The Yucatan has been the focal point and geographical crossroad of profound cultural, ethnological, and sociological change and development in Mesoamerica from ancient times to the present. This far-reaching and historically significant acculturation was brought about by two widely separated epic migrations and military conquests by foreign peoples bringing radically new innovative and advanced culture to the area. The first of these was the migration and military conquest by the Olmec Chontal Maya Itza from Tabasco bringing their written language, mathematics, architectural expertise, and religion into northern and central Yucatan. This golden age of Maya civilization centered in the Yucatan lasted for a millennium during which the advanced Maya culture flowered and spread south into Honduras and Guatemala and west into the highlands of Mexico. In like manner, the second migration and military conquest of the Yucatan by Spanish conquistadors also brought new and advanced cultural norms to the area. The history of the origin, development, and impact of these two momentous events constitutes the thrust of this book and is contrary to and challenges much of the currently accepted historiography related to the subject. Contrary to current consensus, the book shows that the seafaring and mercantile-oriented Chontal Maya Itza from Yucatan were a populous worldly element of the Maya civilization who traveled and spread their cultural influence not only throughout continental Mesoamerica but ventured across the seas to the islands of the Caribbean and to the shores of Southwest Florida in the territory of the Calusa Indians. Consistent with this accomplishment, they had developed naval engineering, Metallurgy, tool design, woodworking, and ship building capabilities that enabled them to construct the large composite seaworthy vessels, not just log canoes, required. And from their expertise in mathematics and astronomy, they developed a sophisticated method of celestial navigation for their overseas voyages a millennium before celestial navigation was developed in Europe.

The Light Ages Seb Falk, 2020-11-17 Named a Best Book of 2020 by The Telegraph, The Times, and BBC History Magazine. An illuminating guide to the scientific and technological achievements of the Middle Ages through the life of a crusading astronomer monk. Falk's bubbling curiosity and strong sense of storytelling always swept me along. By the end, The Light Ages didn't just broaden my conception of science; even as I scrolled away on my Kindle, it felt like I was sitting alongside Westwyk at St Albans Abbey, leafing through dusty manuscripts by candlelight.

Alex Orlando Discover Soaring Gothic cathedrals, violent crusades, the Black Death—these are the dramatic forces that shaped the medieval era. But the so-called Dark Ages also gave us the first universities, eyeglasses, and mechanical clocks. As medieval thinkers sought to understand the world around them, from the passing of the seasons to the stars in the sky, they came to develop a vibrant scientific culture. In *The Light Ages*, Cambridge science historian Seb Falk takes us on a tour of medieval science through the

eyes of one fourteenth century monk John of Westwyk Born in a rural manor educated in England's grandest monastery and then exiled to a clifftop priory Westwyk was an intrepid crusader inventor and astrologer From multiplying Roman numerals to navigating by the stars curing disease and telling time with an ancient astrolabe we learn emerging science alongside Westwyk and travel with him through the length and breadth of England and beyond its shores On our way we encounter a remarkable cast of characters the clock building English abbot with leprosy the French craftsman turned spy and the Persian polymath who founded the world's most advanced observatory The Light Ages offers a gripping story of the struggles and successes of an ordinary man in a precarious world and conjures a vivid picture of medieval life as we have never seen it before An enlightening history that argues that these times weren't so dark after all The Light Ages shows how medieval ideas continue to color how we see the world today
