

Figure 1 Rear Panel Connection Facilities

PREPARATION FOR USE

• MECHANICAL INSTALLATION

The Model 2238B Stereo Receiver can be installed in two basic ways: In a beautiful walnut veneer cabinet for placement on a table or shelf, or mounted in your own cabinetry or custom installation.

• MARANTZ WALNUT VENEER CABINET

An optional walnut veneer cabinet, Model WC-122, may be obtained from your Marantz dealer. The case provides for proper ventilation, and can be placed on furniture, or on a bookshelf. Complete instructions for installation are provided with the WC-122.

• CUSTOM INSTALLATION

When planning a custom installation, allow adequate spacing between the Model 2238B, cabinet surfaces, and other components for adequate ventilation.

To install the Model 2238B Stereo Receiver in a custom cabinet, cut an opening 16-7/8 inches wide by 5-1/8 inches high. Since the front panel of the Model 2238B is larger than the cutout, it will neatly hide the edges of the cut. Remove the plastic feet from the bottom of the unit and slide it through the opening. To support the weight of the Model 2238B, adequate bracing across the rear of the cabinet must be located to provide contact with the rear of the unit.

CONNECTING THE MODEL 2238B

Figure 1 shows the location of input and output jacks on the rear panel. These jacks are for "permanent" connections. Front panel jacks and their use will be discussed later.

All connections to the rear panel should be made with the power to the entire system turned off. The rear panel signal connections are arranged in stereo pairs. All signal connections to the Model 2238B, with the exception of the FM antenna and loudspeakers, should be made with shielded audio cables. To avoid confusion, connect one cable at a time between the 2238B and the other components of your system. This is the safest way to avoid cross-connecting channels or confusing signal sources with destinations.

• PHONO INPUTS

The PHONO jacks are intended for use with magnetic phono cartridges and have a 47,000 ohm input impedance.

If a hum is heard when playing records, this is an indication that the record player or its connections are incorrectly grounded. Connect a separate ground wire from the turntable or record changer frame to the CHASSIS GROUND binding post of the Model 2238B. If this is ineffective, try reversing the polarity of the turntable's power plug.

If hum persists, consult the instruction booklets for the turntable and/or phono cartridge.

Marantz 2238b Owners Manual
