architectural trips Like the first volume this book is organized by subject Together the two books can provide hours of opportunities for educators and students to travel throughout the world and back and forth in time to study natural phenomena and participate in cultural and scientific activities with practicing If Einstein Ran the Schools Thomas Armstrong Ph.D.,2019-10-11 Many world class thinkers and creators have been concerned about the state of education in the United States Discover their thoughts on how children really learn and what teachers must do to optimally tap children s latent abilities During the last three decades education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills However during this period that author Thomas Armstrong calls the miseducation of America a number of troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third grade Rather than focus on what s wrong with the education system that has produced these outcomes Armstrong lays out what creative thinkers know about how children should be educated In an extended thought experiment he asks what would happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent thinkers and creators like Albert Einstein Pablo Picasso Martin Luther King Jr Rachel Carson Doris Lessing Jane Goodall and other seminal culture builders What might they say about the best way to educate a child If Einstein Ran the Schools suggests that the answers to this intriguing question should guide future efforts to reform our nation s schools The American Organist ,2008 **Arts Digest** ,1927 **Tensions and Triumphs in the Early Years of Teaching** Susi Long,2006 The results of a seven year research study identify the challenges new teachers face and how all concerned can help keep new teachers in the profession Like thousands before them the seven teacher authors of this book started their first teaching jobs full of energy and excitement They were eager to implement the thoughtful practices and ideas they learned in their methods courses in order to make a lasting difference in their students lives and to make a positive change in the profession Then reality hit After a few weeks in the classroom some of the teachers found that their excitement and confidence were replaced by self doubt isolation and disappointment Instead of challenging the status quo in their school systems some of the teachers found themselves slipping toward it as they tried to bring their teaching visions to life In a climate where nearly half of new teachers leave the profession in the first five years many early career teachers are facing the same disillusionment and challenges That s why these seven teachers got together with a university researcher to study what life is really like for new teachers The authors recount their experiences from the preservice year through the first six years of teaching They share moments of joy and success but they also tell hard stories about obstacles that drive the knowledge enthusiasm and energy of new teachers underground and cause many to leave the profession Their stories will resonate with both new and experienced teachers offer important advice for job seekers and provide much needed insights for university faculty school administrators colleagues of new teachers and district leaders to think about how they can better embrace the energy and innovation that

new teachers bring while supporting them in moments of insecurity and vulnerability New teachers will know they are not alone and that even when they feel the least empowered they actually do have a voice and can use it to effect change
