Appendix J and K to Marine Corps Warfighting Publications 5-1(MCWP 5-1), Marine Corps Planning Process (MCPP) the Accelerated Marine Corps Planning Process (AMCPP) and Rehearsal Types, Techniques, and Considerations ,2002 The Marine Corps Warfighting Publication 5 1 MCWP 5 1 was published in January 2000 and is the principle planning manual in the Marine Corps However the new process is directed at too high of a level to be the principle planning doctrine for the lower level units Therefore I have

developed two appendices to the MCWP 5 1 to improve the document s relevance to the regimental and battalion level The two appendices are The Accelerated Marine Corps Planning Process AMCPP and Rehearsal Types Techniques and Considerations The AMCPP is a technique for scaling MCPP to operationally realistic time constraints However it is not just doing MCPP fast The AMCPP hinges on the commander with the advice of his staff making a decision very early in the process then improving the decision with the remainder of the process The end result is a solid and flexible plan that can be executed rapidly At the regimental and battalion level rehearsals are the key to achieving an implicit understanding of the plan and improving the probability for success However this portion of the planning process is often squandered due to poor rehearsal technique or failure to target the rehearsal to the appropriate audience Therefore this appendix offers several rehearsal techniques and planning considerations that if adopted will enhance the doctrinal instructions in this area

Movement Ben Zweibelson,2023-06-09 This book explains the history and development of the military design movement featuring case studies from key modern militaries Written by a practitioner the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield It is the first book to thoroughly explain what military design is where it came from and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters The work explains the tangled origins of commercial design and that of designing modern warfare the rise of various design movements and how today s military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations Why does our species conceptualize war as such and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy The book explains design stories from the Israel Defense Force the US Army the US Marine Corps the Canadian Armed Forces and the Australian Defence Force for the first time and includes the theory doctrine organizational culture and key actors involved Ultimately this book is about how small communities of practice are challenging the foundations of modern defence thinking This book will be of much interest to students of military and strategic studies defence studies and security studies as well as design educators and military professionals Counterintelligence U.S. Marine Corps,2007-09-01 The United States Marine Corps is the largest such
