**The Greatest of All Leathernecks** Joseph Arthur Simon,2019-09-11 Joseph Arthur Simon s The Greatest of All Leathernecks is the first comprehensive biography of John Archer Lejeune 1867 1942 a Louisiana native and the most innovative and influential leader of the United States Marine Corps in the twentieth century As commandant of the Marine Corps from 1920 to 1929 Lejeune reorganized revitalized and modernized the force by developing its new and permanent mission of amphibious assault Before that transformation the corps was a constabulary infantry force used mainly to protect American business interests in the Caribbean a mission that did not place it as a significant contributor to the United States defense establishment The son of a plantation owner from Pointe Coupee Parish Lejeune enrolled at Louisiana State University in 1881 aged fourteen Three years later he entered the U S Naval Academy afterward serving for two years at sea as a midshipman In 1890 he transferred to the Marines where he ascended quickly in rank During the Spanish American War Lejeune commanded and landed Marines at San Juan Puerto Rico to rescue American sympathizers who had been attacked by Spanish troops A few years later he arrived with a battalion of Marines at the Isthmus of Panama part of Colombia at the time securing it for Panama and making possible the construction of the Panama Canal by the United States He went on to lead Marine expeditions to Cuba and Veracruz Mexico During World War I Lejeune was promoted to major general and given command of an entire U S Army division After the war Lejeune became commandant of the Marine Corps a

role he used to develop its new mission of amphibious assault transforming the corps from an ancillary component of the U S military into a vibrant and essential branch He also created the Marine Corps Reserve oversaw the corps s initial use of aviation and founded the Marine Corps Schools the intellectual planning center of the corps that currently exists as the Marine Corps University As Simon masterfully illustrates the mission and value of the corps today spring largely from the efforts and vision of Lejeune

**First to Fight** Estate of V H. Krulak,1999-02-22 In this riveting insider s chronicle legendary Marine General Brute Krulak submits an unprecedented examination of U S Marines their fights on the battlefield and off their extraordinary esprit de corps Deftly blending history with autobiography action with analysis and separating fact from fable General Krulak touches the very essence of the Corps what it means to be a Marine and the reason behind its consistently outstanding performance and reputation Krulak also addresses the most basic but challenging question of all about the Corps how does it manage to survive even to flourish despite overwhelming political odds and as the general writes an extraordinary propensity for shooting itself in the foot To answer this question Krulak examines the foundation on which the Corps is built a system of intense loyalty to God to country and to other Marines He also takes a close look at Marines in war offering challenging accounts of their experiences in World War II Korea and Vietnam In addition he describes the corps relationship to other services especially during the unification battles following World War II and offers new insights into the decision making process in times of crisis First published in hardcover in 1984 this book has remained popular ever since with Marines of every rank

*U.S. Naval Gunfire Support in the Pacific War* Donald K. Mitchener,2021-07-28 On November 20 1943 the U S military invaded the Tarawa Atoll of the Gilbert Islands as part of the first American offensive in the Central Pacific region during World War II This invasion marked more than one first as it was also the introductory test of a doctrine developed during the interwar years to address problems inherent in situations in which amphibious assaults required support by naval gunfire rather than land based artillery In this detailed study Donald K Mitchener documents and analyzes the prewar development of this doctrine as well as its application and evolution between the years 1943 1945 The historical consensus is that the test at Tawara was successful and increased the efficiency with which U S forces were able to apply the doctrine in the Pacific theater for the remainder of the Second World War Mitchener challenges this view arguing that the reality was much more complex He reveals that strategic concerns often took precedence over the lessons learned in the initial engagement and that naval planners failure to stay up to date with the latest doctrinal developments and applications sometimes led them to ignore these lessons altogether U S Naval Gunfire Support in the Pacific War presents an important analysis that highlights the human cost of misinterpreting strategic and tactical realities
