Smith,2022-02-16 Many of the people who are saying the schools are not providing students with the knowledge and skill
levels needed for today s or tomorrow s workforce when they were in school were high achievers Many were the best and
brightest their schools had to offer They also received their education during an era criticized as having not provided them
with the knowledge and skills levels adequate for then or today s needs As defective products of the problem they are not
capable of meeting the challenge of effecting meaningful and lasting educational curriculum change This brings up the
question of what qualifies this author then to speak with authority on how to affect meaningful and lasting educational
reform The answer is that he is not part of all this Many of the reformers recognize him as the guy who would punch them in
the arm and take their lunch money The author was also the class clown His teachers said he was failing because he
daydreamed in class They said he was failing because he did not turn in his homework They said that while he had learned to
walk and talk on his own without any help from them that he had some organic problem keeping him from learning What all
these teachers and counselors and evaluators and probation officers and school board members and parents and foster
parents and everyone else never ever said is that he was struggling with division because he had not mastered the times
tables They just did not know perhaps really did not care He knew this and in the early part of the fifth grade he decided his
life would be better and easier if he submitted to learning the multiplication tables For this reason he is essentially self
educated and so has a particularly different point of view from these other self described poorly prepared products of the
education system In addition to being outside the public education system another factor in his qualifications to evaluate the
nation s educational efforts is his shoes they are steel toed **Resource Management Journal** ,1982 Farmer
