Leadership Approaches to Negotiate Challenges in a Changing Education Landscape Leentjie van Jaarsveld, Kobus Mentz, Charl C. Wolhuter, 2020-12-31 The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse Such allegations are made and frequently stronger adjectives than non satisfactory are used Results of international test series in which South Africa has participated such as the 2015 TIMSS tests confirm the negative verdicts found in the public and scholarly discourse This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors one factor that can make a difference in the achievement levels obtained by learners in schools is leadership The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation blaming all ills in the education system and educational institutions on historical legacies and or contextual factors such as socio economic deprivation in the catchment areas of schools or poor resources and infrastructure This collected work was inspired by a recently published spate of articles on top performing schools including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges The book unpacks the issue of leadership in South African schools from a variety of perspectives thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa The target audience of the book is scholars of Educational Leadership The research reported in the chapters draw on a wide range of methodologies including empirical survey research questionnaires and interviews critical literature surveys and the comparative method

Education in a New South Africa Robert J. Balfour, 2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education

Education and Youth Today Yasemin Besen-Cassino, 2016-08-02 This volume brings together the most recent and

cutting edge research on the understanding of education It focuses on the lived experience of the students in the context of different educational institutions In doing so it unravels layers of inequalities in the understanding of education South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Annual Performance Plan Mpumalanga (South Africa). Department of Education, 2016 *Monitoring the Quality of Education in Schools* Vanessa Scherman, Roel J. Bosker, Sarah J. Howie, 2016-12-27 The monitoring of quality has been part of the educational landscape for many decades Originally the need to monitor arose as part of an economic process whereby policy makers wanted to discern the return on investment in education This bottom line thinking while still prominent has receded into the background in light of global changes and the emergence of a global economy Now in addition to the question what is the return on investment the more important question is are the students in schools ready to participate in the economy of a 21st century society This is underpinned by the inquiry into what knowledge and

competencies are required for students to participate meaningfully in nation building This inquiry can only be undertaken by means of monitoring evaluating where the students are and what is required so that students reach their potential In an ever changing technologically oriented world the manner in which competencies and knowledge are identified and how these need to be measured and identified is important In this book the theory and practice of underpinning the monitoring of the quality of education is described This is followed by a number of practical examples in the form of country case studies on how theory plays out in practice The book further provides common themes across developed and developing emerging economies underscoring the need for approaches which are locally relevant but internationally transferable **Annual**

Report Mpumalanga (South Africa). Department of Education, 2016

Accountability in education: meeting our

commitments UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover *Democratic Evaluation and Democracy* Donna Podems, 2017-02-01

Democratic evaluation brings a way of thinking about evaluation s role in society and in particular its role in strengthening social justice Yet the reality of applying it and what happens when it is applied particularly outside the West is unclear Set in South Africa a newly formed democracy in Southern Africa the book affords an in depth journey that immerses a reader into the realities of evaluation and its relation to democracy The book starts with the broader introductory chapters that set the scene for more detailed ones which bring thorough insights into national government local government and civil societies experience of evaluation democratic evaluation and their understanding of how it contributes to strengthening democracy or not A teaching case the book concludes by providing guiding questions that encourage reflection discussion and learning that

ultimately aims to inform practice and theory *Research for Educational Change* Jill Adler,Anna Sfard,2016-06-17

Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research Twenty Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe,Martin Prew,2015-05-05 *Twenty Years of Education Transformation in Gauteng 1994 to 2014* An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the books chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years **The Politics and Governance of Basic Education** Brian Levy,Robert Cameron,Ursula Hoadley,Vinothan Naidoo,2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational

outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning

The Sustainability of Higher Education in Sub-Saharan Africa Peter Neema-Abooki, 2024-07-02 This book delves into the role of higher education as a means of sustainable development in Sub Saharan Africa Contributions from across the region examine the strategies and technological advances available to enable students to deal with an uncertain future and are organised under two key themes Curriculum and Teaching and Higher Education and Innovations The volume brings together theoretical and practical perspectives relating them to international benchmarks while maintaining the specificities of the African context It will be of interest to students and scholars as well as practitioners whose work interrogates higher education quality assurance and sustainable development goals

Discipline in Education Johan Botha, 2021 This book addresses a perennial challenge to the success of the South African education system namely discipline This volume steers the interrogation of discipline in a new direction reflecting on ways in which recent research can benefit South African schools This includes the need for alternative discipline that will enhance education The scholarly contribution lies in its in depth exploration of the relevance of research findings to South African schools and to the twenty first century socio political environment For the first time scholarly interrogation of the issue of learner discipline in South African schools draws on indigenous knowledge systems Its post colonial and decolonial perspectives offer an ethical and moral compass for behaviour that could contribute to the well being of South African society and other societies similarly afflicted by anti social behaviour The book offers a range of perspectives on the debates on discipline and associated issues and should stimulate future discussions on discipline and indiscipline at a time when South Africa and many other societies engage with the effects of social and political transformation This scholarly book is aimed at academics and researchers The contributors include philosophers moralists corporativists education law specialists curriculum specialists specialists in education and culture advocates of ubuntu and people using meta syntheses of approaches and practices and religious practices such as a Christian ethical moral approach to parental and school discipline They draw on their insights into postcolonialism the impact of indigenous knowledge theories of agency dysfunctionality and school underperformance The book offers an intriguing depiction of opposing views on discipline

The Education Triple Cocktail Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for

schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa
 At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model
 Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high
 quality educational materials and one on one instructional coaching to help teachers transform their instructional practices
 in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early
 grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence
 based way forward This book will be of immense use to teachers students of Education policymakers and parents ICAR
