Spiritual Energy Simon Richard Lee,2004-08 The New Testament contains these diverse statements 1 God is Spirit 2 God is Love 3 Love is a Fruit of the Holy Spirit amongst many others 4 The Spirit of God the Holy Spirit is Seven Spirits or a Sevenfold Spirit Simon Lee has spent the last twenty years pondering these issues and the following resulting questions which this book tries to answer in full 1 Love then is a Spirit and according to Shakespeare a many splendoured thing Can we attempt to summarise Love so rich in artistic descriptions by thousands of poets singers writers and playwrights and other Spirits in simple terms 2 What are the other Six Spirits Can we decide what they are 3 The Bible often describes The Spirit as resembling a Tree or Fountain

How do the Seven Spirits co exist in this apparently perfectly scientific description of their structure Can we describe this structure especially visualise it 4 Modern Science especially physics claims to be close to a scientific Theory of Everything There are certain holes in this theory Science ignores the spiritual and artistic in life Do the latter in fact need to be called upon to fill the scientific holes scientific camps the NUMBERS of things involved must precisely match i e the quantities of spiritual essences used to fill holes in science must be precisely correct Are they 6 Do other Holy Books in other Faiths back up these notions about a Set of Holy Spirits going together to make up the Spirit of God 7 Clearly the Spirit of God has enemies trying to supplant or replace spiritual with secular things Is the rising main enemy of the Holy Spirit today Information Technology Twenty years of thinking and research goes into Simon Lee s claim that this book provides a resounding convincingly argued answer of YES to all seven of these questions It is therefore an analysis of Spirit i e of God as a Spirit Being

Lifting the Scientific Veil Paul Sukys,1999 Lifting the Scientific Veil has been written to afford the nonscience student the same meaningful opportunity to explore germane scientific topics as is generally given the science student to learn about the humanities and social sciences Since nonscientists are generally responsible for making laws financing research or at the very least for voting it is essential that they understand the significant impact that science has on everyday life The book is designed to introduce nonscientists in an informative and comprehensible manner to four of the most significant scientific theories of the twentieth century the big bang quantum physics relativity and evolution After each theory is explained informally the book shows how that theory and related technology impact upon one s personal life Legal and political aspects of these theories are explored as well as philosophical and theological implications

Science and Religion: Fifty Years After Vatican II Kenan Osborne OFM,Ki Wook Min,2014-01-31 In the past one hundred years two major realities have changed both science and religion The world of science has been enriched by quantum physics the computation of the age of the universe archaeological data in the Middle East and a scientific stress on historical writing The world of religion has been enriched by the establishment of the World Council of Churches and the Second Vatican Council In the past fifty years major scientists and major religious leaders have met together again and again In the past fifty years religious leaders from Christianity Islam and Judaism have held a number of thought provoking conferences In this volume these gatherings are reviewed and evaluated Two major religious problems have challenged the science religion discussions namely which God should the scientists agree on the Trinitarian God Allah or Yahweh Which history of the universe sponsored by these three religions should scientists be looking for This volume raises questions and suggests some preliminary forms of serious discussion

Spiritual Being & Becoming Eric J. Kyle,2015-03-06 It is reported that there are as many as 100 billion neurons that make up the human nervous system This system is incredibly complex and yet it is a fundamental part of what makes us who we are Yet there is far more to human beings than biology Many academic disciplines study the human condition and there are many schools of thought within that study We must also appreciate that the study of human nature did not begin in contemporary times History particularly Western Christian history is full of texts that offer detailed explorations of the human condition However no consensus has yet emerged Consensus or not those working towards religious and spiritual formation are tasked with pursuing the transformation of their communities This book is an attempt to provide some of the background to support this ministerial work It seeks not only to offer a fuller understanding of some of the common views of human nature but also insights into how we might utilize this knowledge in our ministries ministries that strive towards the spiritual being and becoming of our world

The Nature of Consciousness, the Structure of Reality Jerry Davidson Wheatley,2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the merging of relativity with quantum theory The book explains the big bang theory and everything else

Skeptics and True Believers Chet Raymo,2009-05-26 Years ago noted science teacher and writer Chet Raymo embarked upon his own quest to reconcile the miracle stories he learned as a child with the science he learned as an adult Skeptics and True Believers is the culmination of that search a passionate ever inquisitive statement that science and religion can mutually reinforce the way we experience the world

Acknowledging that the scientific and the spiritual communities are increasingly split Raymo builds strong bridges between them He illustrates his argument with an array of thought provoking stories such as the remarkable migratory flight of a small bird called the red knot the long glorious glide of the Comet Hyakutake across the night sky a hilarious alien abduction that didn't happen Together they are compelling evidence that religion should embrace the reliable knowledge of the world that science provides while at the same time science should respect and nourish humankind's need for spiritual sustenance Miracles are explainable Raymo paraphrases the writer Tim Robinson it is the explanations that are miraculous For anyone drawn to reflect on life's meaning and purpose Chet Raymo's uncompromising skepticism and reverence for mystery will affirm and inspire
