Godwired Rachel Wagner, 2012-03-12 Godwired offers an engaging exploration of religious practice in the digital age It considers how virtual experiences like stories games and rituals are forms of world building or cosmos construction that serve as a means of making sense of our own world Such creative and interactive activity is arguably patently religious This book examines the nature of sacred space in virtual contexts technology as a vehicle for sacred texts who we are when we go online what rituals have in common with games and how they work online what happens to community when people worship online how religious worlds and virtual worlds nurture similar desires Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity today's virtual religion marks a radical departure from traditional religious practice it is ephemeral transient rapid disposable hyper individualized hybrid and in an ongoing state of flux

Gaming and the Divine Frank G. Bosman, 2019-03-04 This book formulates a new theological approach to the study of religion in gaming Video games have become one of the most important cultural artifacts of modern society both as mediators of cultural social and religious values and in terms of commercial success This has led to a significant increase in the critical analysis of this relatively new medium but theology as an academic discipline is noticeably behind the other humanities on this subject The book first covers the fundamentals of cultural theology and video games It then moves on to set out a Christian systematic theology of gaming focusing on creational theology Christology anthropology evil moral theology and thanatology Each chapter introduces case studies from video games connected to the specific theme In contrast to many studies which focus on online multiplayer games the examples considered are largely single player games with distinct narratives and end of game moments The book concludes by synthesizing these themes into a new theology of video games This study addresses a significant aspect of contemporary society that has yet to be discussed in any depth by theologians It is therefore a fantastic resource for any scholar engaging with the religious aspects of digital and popular culture

Virtually Sacred Robert M. Geraci, 2014-06-13 Robert Geraci argues that virtual worlds and video games have become a locus for the satisfaction of religious needs providing many users with communities a meaningful experience of history and human activity and a sense of transcendence

Playing with Religion in Digital Games Heidi A. Campbell, Gregory P. Grieve, 2014-04-28 Shaman paragon God mode modern video games are heavily coded with religious undertones From the Shinto inspired Japanese video game Okami to the internationally popular The Legend of Zelda and Halo many video games rely on religious themes and symbols to drive the narrative and frame the storyline Playing with Religion in Digital Games explores the increasingly complex relationship between gaming and global religious practices For example how does religion help organize the communities in MMORPGs such as World of Warcraft What role has censorship played in localizing games like Actraiser in the western world How do evangelical Christians react to violence gore and sexuality in some of the most popular games such as Mass Effect or Grand Theft Auto With contributions by scholars and gamers from all over the world this collection offers a unique perspective to the intersections of religion and the virtual world

The HTML of Cruciform Love John Frederick, Eric Lewellen, 2020-01-01 Despite an increasing portion of our lives being conducted online the topic of the internet is vastly underrepresented in the current literature on technology and theology The HTML of Cruciform Love challenges outdated misconceptions about internet theology and asserts that there is no topic more pertinent to our daily walk as contemporary followers of Jesus Christ than the theological implications of the internet age These twelve essays investigate the themes of community and character formation in the digital realm A host of interrelated sub themes are represented including the application of patristic theology to contemporary internet praxis a demonology of the internet and virtue ethics in cyberspace while other studies consider the influence of internet technology on aesthetics personhood and the self Together the essays work towards a collaborative constructive cruciform theology of the internet as something more than a supplementary component to our personal lives rather it is a vital medium for the digital communion of the saints through the HTML of cruciform love
