Psychological trauma is a multifaceted phenomenon with extensive involvement of biochemical and neurological changes. This book originated on the basis of clinical observations and the authors believe that trauma is the region in which psych and soma meet each other and integrate, becoming a single entity. In this text, the authors attempt to integrate the psychosocial and bio-neuro-endocrine aspects of human experience including trauma. Chapter 1 provides a psychobiological perspective of incest and sexual abuse and considers the stages of and reactions to incest that trauma clients have experienced. Chapter 2 focuses on trauma-related syndromes associated with survivors of sexual abuse. Chapter 5 explores the victims' response to trauma and examines the nontraditional treatment models for psychological trauma. Chapter 6 presents psychotherapy practices used with incest survivors and details treatment principles and goals and explains new treatment options.
