Neuromarketing's Role in Sustainable Finance

Taneja, Sanjay, Chahal, Bhupinderpal Pal Singh, Johri, Amar, Ozen, Ercan, Kumar, Pawan, 2024-10-18 Neuromarketing plays a significant role in sustainable finance by tapping into the emotional and cognitive factors that influence investor decisions regarding socially and environmentally responsible investments. It helps financial institutions understand how individuals respond to sustainability messages enabling them to craft more persuasive campaigns that resonate with investors' values. By leveraging insights into behavior and decision making processes, neuromarketing enhances the appeal of sustainable finance, encourages greener investment choices, and helps align financial practices with the growing demand for ethical long-term impact solutions. *Neuromarketing's Role in Sustainable Finance* explores the intersection of neuromarketing and sustainable finance, revealing how insights from cognitive neuroscience can drive environmentally responsible investment behaviors. It examines subconscious factors influencing consumer decisions toward green investments, offering theoretical frameworks and practical applications to understand and promote ethical financial choices. Covering topics such as behavioral finance, environmental awareness, and investor patterns, this book is an excellent resource for scholars, researchers, financial professionals, marketers, business professionals, academicians, graduate and postgraduate students, and more.

Environmental Finance and Green Banking Samsul Alam, Sergey Sosnovskikh, 2023-05-31 Environmental finance and green banking are central drivers of the transition to a sustainable economy and essential components in solutions to climate change. This book presents the latest research on theory and practices in these interdisciplinary fields, incorporating both public and corporate finance. It introduces three parts: environmental investing and financing, green banking, and environmental policies in the public sector. The book explores the current trends, dynamics, and ways forward for environmental finance and green banking, including fundamental theories, e.g., environmental Kuznets curve, and comparisons between traditional and green bond efficiency, corporate governance practices, and disclosure. Green central banking, climate finance, sustainable strategies, green Islamic banking, and public climate fund management in multi-country contexts. The contributors to this book highlight significant challenges ahead while recognizing potential opportunities such as the revolution in green investments and trading in green bonds. This book is a welcome addition to the literature on environmental economics and finance and the economics of sustainability and climate change.
