Guide to Hedge Funds Philip Coggan, The Economist, 2014-02-25 In 1990, hedge funds managed some 39 billion of assets and were almost unknown. By 2008, that figure had grown to almost 2 trillion, and hedge funds were being blamed by some for contributing to the credit crunch and demonized by others for their greed. The rise of the industry has created a new bunch of billionaires who have made themselves rich by managing other people's money. Nowadays, most people have heard the term hedge fund, but few are clear about what exactly a hedge fund is or what it does. This guide aims to put them in the picture with the clarity and lively prose that The Economist is famous for. It provides a succinct survey of the industry for all those who think they should know about hedge funds but do not. It is aimed at all those who might want or have to deal with a hedge fund: private investors, trustees of a pension fund, directors of a listed company, lawyers, and accountants who may be interested in working in the industry. It is also aimed at those who happily criticize hedge funds without really knowing what they do.
