Shayler, Colin Burgess, 2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA s exploration and knowledge of the

space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF s highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co opted into NASA s space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions

Nineteen specially adapted Lancaster bombers take off from an RAF airfield in Lincolnshire England each with a huge nine thousand pound cylindrical bomb strapped underneath it Their mission to destroy three hydroelectric dams that power the Third Reich s war machine It was a suicide mission from the outset First the men had to fly extremely low at night and in tight formation over miles of enemy occupied territory Then they had to drop with pinpoint precision a complicated spinning cylindrical bomb that had never before been used operationally More than that the entire operation had to be put together in less than ten weeks in order to hit the dams when water levels were still high enough for the bombs to be effective The visionary aviation engineer Barnes Wallis hadn t even drawn up plans for his concept when the bouncing bomb was green lighted What followed was an incredible race against time that despite numerous setbacks became one of the most successful and significant bombing raids of all time Holland has delved into the new trove of declassified documents to shed light on this weapons program the politics of its development and the eventual mission The Wall Street Journal An impeccably researched work in the style of a fast paced techno thriller Publishers Weekly Extremely detailed but never dull Holland offers a definitive nuts and bolts history Kirkus Reviews A well written study of engineering and invention operating under great pressure For all World War II history buffs Library Journal starred review

Eject! Eject! John Nichol, 2023-05-25 Eject Eject When the call is made to abandon an aircraft it s only the beginning of the story From the Sunday Times bestselling writer John Nichol author of Spitfire Lancaster and Tornado comes a brilliant new book that reveals the astonishing story of an invention that has saved many thousands of lives around the world including his own the ejection seat Nichol tells the remarkable tale of how the ejection seat was first conceived during the Second World War as countless lives were lost in accidents and in battle In the wake of the war that technological race to save aircrew lives using explosive seats continued at an incredible pace Nichol tells the story of the brave men who risked their lives testing those early devices and interviewed the first British pilot to eject back in 1949 when ejection from pulling the handle to being under the parachute took thirty seconds Today that figure is down to around one second Packed with interviews with aircrew who know exactly how it feels to Bang Out from an aircraft at high speed both in peace and in war the book gives the reader a vivid sense of what that life saving experience feels like but also features the moving accounts of what happens next from the viewpoint of both the crews and their families who often have little or no information about whether or not their loved ones have survived Because ejecting is just the start of a journey Packed with dramatic action incredible science and moving recollections Eject Eject is an essential read

Hurricane John Dibbs, Tony Holmes, Gordon Riley, 2017-05-18 2017 marks the 80th anniversary of the remarkable Hawker Hurricane formally entering service The RAF s first monoplane fighter it dragged the Air Force into a position where it could defend Britain in her hour of need The true workhorse of the RAF the Hurricane came into its own in the hot summer months of 1940 valiantly defending the skies above Britain Outnumbering Spitfires three to one the Hurricane also downed far more enemy aircraft Without the obvious elegance of the Me 109 or the Spitfire the Hurricane

was nonetheless beloved by its pilots for its ability to simultaneously take a battering and inflict serious damage from its remarkably stable gun platform This stunning book reveals the Hurricane in all its glory from fascinating first hand accounts from the men who flew her to the truly breath taking images from John Dibbs of the Hurricanes still in flight today This lavishly illustrated edition is a must have for all fans of aviation history **Dogfight** David Owen,2015-06-20 Innumerable books have been published on the two most famous fighter aircraft of all time the Supermarine Spitfire and the Messerschmitt Bf109 But books setting out to tell the story of both aircraft are very much rarer probably fewer than the fingers of one hand Yet their joint story is one which bears retelling since both were essential to the air campaigns of World War Two Incredibly the men who designed them lacked any experience of designing a modern fighter R J Mitchell had begun his career working on industrial steam locomotives Willy Messerschmitt had cut his aeronautical teeth on light and fragile gliders and sporting planes Yet both men not only managed to devise aircraft which could hold their own in a world where other designs went from state of the art to obsolete in a staggeringly short time but their fighters remained competitive over six years of front line combat Despite the different ways their creators approached their daunting tasks and the obstacles each faced in acceptance by the services for which they were designed they proved to be so closely matched that neither side gained a decisive advantage in a titanic struggle Had either of them not matched up to its opponent so well then the air war would have been a one sided catastrophe ending in a quick defeat for the Allies or the Axis powers and the course of twentieth century history would have been changed beyond recognition WALNECK'S CLASSIC CYCLE TRADER, OCTOBER 2001 Causey Enterprises, LLC, *An Educational Guide in Air Transportation* Ralph E. Hinkel,Leo Baron,1944

Under the Radar James Hamilton-Paterson,2013-04-30 1961 A squadron of Vulcan aircraft Britain s most lethal nuclear bomber flies towards the east coast of the United States Highly manoeuvrable the great delta winged machines are also equipped with state of the art electronic warfare devices that jam American radar systems Evading the fighters scrambled to intercept them the British aircraft target Washington and New York reducing them to smoking ruins They would have done at least if this were not an exercise This extraordinary raid which actually took place opens James Hamilton Paterson s remarkable novel about the lives of British pilots at the height of the Cold War when aircrew had to be on call 24 hours a day to fly their nuclear armed V bombers to the Western USSR and devastate the lives of millions This is the story of Squadron Leader Amos McKenna a Vulcan pilot who is suffering from desires and frustrations that are tearing his marriage apart and making him question his ultimate loyalties Relations with the American cousins are tense the future of the RAF bomber fleet is in doubt And there is a spy at RAF Wearsby who is selling secrets to his Russian handlers in seedy East Anglian cafes A macabre Christmas banquet at which aircrew under intolerable pressures go crazy with tragic consequences and a dramatic and disastrous encounter with the Americans in the Libyan desert are among the high points of a novel that surely conveys the beauty and danger of flying better than any other in recent English literature
