The Search for Wholeness and Diaspora Literacy in Contemporary African American Literature Silvia Castro-Borrego, 2011-05-25 This volume has as a cohesive argument the exploration of the different manifestations of the search for wholeness and spirituality in the writings of contemporary African American women writers covering different literary genres such as fiction both novels and short stories drama and poetry Together with the issue of spirituality the African American search for wholeness is analyzed as a source of creativity and agency As expressed in the contemporary literature of black women writers starting in the 1980s the search for wholeness reflects a beauty realized through the healing of the spirit and the body and is a process that takes on dimensions of reconciling the past and the present the mythical and the real the spiritual and the physical all in the context of an emerging world view that welcomes synthesis and expects both synthesis and generative contradictions The book will be a valuable collection for scholars of African American literature comparative American Ethnic literature American literature and spirituality as well as women's studies In addition it will be an important text for both undergraduate and graduate students in those fields As Professor Johnella Butler 2006 points out the African American search for wholeness is tightly linked to the search for freedom and agency Ever since the 19th century African American writers have given expression to an African American self which functions in Western civilization simultaneously as a colonized other and an assertive self Due to the continuous ordeal of the African Diaspora this self is caught in between the binaries proposed by the material and the spiritual world seeking a balance where the person can become whole The search for wholeness feeds from cultural roots that imply the presence of ancestral spiritualism rememory and double consciousness Contemporary black women writers reflect the metaphor of building spiritual bridges

seeking the possibilities of building a bridge to the archetypal African past that is carried in their memories as a presence that offers sustenance via spiritual reconnection Their works seek to bridge the gap between the myths and traditions of the past and contemporary African American culture The texts included in this collection are examples of writing as an exercise of what V v Clark calls Diaspora literacy The texts written by contemporary African American women writers explicitly show how to recognize and read the cultural signs left scattered along the road of progress In this way material acquisition is achieved along with cultural dispossession becoming a metaphor for the history of the African in America The powerful message is that one should not exclude the other

Patient, Heal Thyself Robert M. Veatch,2009 Robert Veatch is one of the most distinguished American bioethicists having in many ways helped to create that field His new book is on a theme he has developed for thirty years his view that a fundamental and radical change is sweeping through the American health care system but has so far received relatively little attention This change is so fundamental and far reaching that Veatch claims we are in the early stages of a new medicine that will replace what we think of as modern medical practice The change is in how we think about medical decision making Whereas modern medicine s core idea was that medical decisions should be based on the cold hard facts of science the province of the doctor the new medicine reflects the notion that medical decisions impose value judgments Since physicians can claim no expertise on making those value judgments the pendulum has swung greatly toward the patient in evaluating alternatives and making decisions about their treatment While the doctor s expertise is consulted the patient is in control In short doctor no longer knows best Veatch shows how this is only true for value loaded interventions abortion

euthanasia genetics but coming to be true for almost every routine procedure in medicine everything from setting broken arms to choosing drugs for cholesterol or osteoporosis Veatch uses a range of fascinating contemporary and historical examples to reveal how values underly almost all medical procedures and illustrate his case that this change is inevitable and a positive trend for patients
