Mental Health Policy and Practice Today Ted R. Watkins, James W. Callicutt, 1997-02-26
Mental Health Policy and Practice Today is the only textbook available in recent years that reflects the dynamic nature of mental health practice in today's rapidly changing society This book begins with an overview of societal and cost issues related to mental health problems including the formats now used for mental health delivery and the public planning and agencies involved It then focuses on the expanding base of knowledge in mental health Important areas of neuroscientific and social research are covered along with the significant contributions of psychoeducation and self help and advocacy groups Ten groups are specifically discussed including the homeless whose numbers have risen to crisis proportions in recent years in part due to their mass expulsion from institutional care It then guides the reader through implications for the 21st century including the influences of technology and funding shifts to managed care Finally it concludes with an exploration of issues that will need to be resolved based on the analysis of current policy practice and future projections Readers will appreciate the multiple perspectives of this book and the blending of contributors expertise in both research and service in the trenches The broad spectrum of topics covered makes this book not only an effective text for traditional and specialized courses in the mental health professions but also an informative and stimulating resource for the current practitioner It is an essential timely book that illustrates that policy and practice in the mental health fields must be reconciled

The Science of Paediatrics: MRCPCH Mastercourse Tom Lissauer, Will Carroll, 2016-03-21
This book is innovative and original in assisting the reader to apply the principles of science to paediatric practice Professor Neena Modi Former President Royal College of Paediatrics and Child Health The Science of Paediatrics MRCPCH Mastercourse provides essential background preparation for the MRCPCH Theory and Science examination It contains an up to date review of the application of science to everyday paediatric clinical practice whether it is interpreting clinical signs or investigations prescribing drugs or identifying best management Although this understanding is essential in order to make informed clinical

decisions it is difficult to obtain as it is not usually covered in clinical textbooks MRCPCCH exam format questions embedded in each chapter to test understanding Emphasis on embryology to explain many congenital abnormalities An overview of the relevant anatomy and physiology Focus on the application and interpretation of investigations Examples of recent advances in science and clinical research that have benefitted the children's care All clinical specialties covered by paediatric specialists Chapters covering evidence based paediatrics statistics ethics and quality improvement

Emphasizing the Interpersonal in Psychotherapy Claude Villeneuve, 2013-05-13 With today's recent mental health care reforms many psychotherapists are being forced to reexamine the relevance of their practices Economic pressures managed care and the discrepancy between what a therapist hopes to accomplish and what the relative limitations of his or her treatments are makes the future of psychotherapy uncertain This provocative new book examines the failings of current individual psychotherapies and offers a model based on larger interpersonal schemes This resource will be invaluable not only to therapists who are faced with the need to modify their practices but also to any mental health practitioner who hopes to develop a more effective form of psychotherapy
