**Manuel de créativité** Fabien Lafay, 2025-01-28 N'avez-vous jamais rien créé ? Vous pensez n'avoir rien inventé de votre vie ? Et si la création était en nous ? Elle est inhérente à notre qualité d'être humain. Tous les enfants créent. Nous avons toutes et tous créé des jeux, des scénarii, des univers dans lesquels nous avons joué. En grandissant, il semble que cela se moule ou se limite de plus en plus pour la majorité des personnes. Imagine-t-on moins de choses ? Voit-on le monde avec plus de connaissances, ce qui limite de facto l'imaginaire ? Entre-t-on peu à peu dans des moules et des standards de pensée qui font que nous n'osons plus nous écarter des chemins existants ? Dans ce livre consacré à la créativité, qui ne propose pas moins de 90 jeux, techniques, conseils ou astuces, le fil rouge est l'imagination. Elle permettra d'explorer les différentes manières par lesquelles la créativité s'acquiert et se développe pour nous diriger vers la culture générale pour nourrir et alimenter notre imagination avant de se consacrer tout ce qui peut entraver le processus créatif et le renforcer grâce à divers outils et quelques correctifs. Quel sera l'avenir de votre créativité ?

**Role-Playing Games of Japan** Björn-Ole Kamm, 2020-08-28 This book engages non digital role playing games such as table top RPGs and live action role plays in and from Japan to sketch their possibilities and fluidities in a global context. Currently non digital RPGs are experiencing a second boom worldwide and are increasingly gaining scholarly attention for their inter media relations. This study concentrates on Japan but does not emphasise unique Japanese characteristics as the practice of embodying an RPG character is always contingently realised. The purpose is to trace the transcultural entanglements of RPG practices by mapping four arenas of conflict: the tension between reality and fiction; stereotypes of escapism; mediation across national borders and the role of scholars in the making of role playing game practices.

**3D-TV System with Depth-Image-Based Rendering** Ce Zhu, Yin Zhao, Lu Yu, Masayuki Tanimoto, 2012-08-15 Riding on the success of 3D cinema blockbusters and advances in stereoscopic display technology, 3D video applications have gathered momentum in recent years. 3D TV System with Depth Image Based Rendering: Architectures, Techniques and Challenges surveys depth image based 3D TV systems which are expected to be put into applications in the near future. Depth image based rendering (DIBR) significantly enhances the 3D visual experience compared to stereoscopic systems currently in use. DIBR techniques make it possible to generate additional viewpoints using 3D warping techniques to adjust the perceived depth of stereoscopic videos and provide for auto stereoscopic displays that do not require glasses for viewing the 3D image. The material includes a technical review and literature survey of components and complete systems solutions for technical issues and implementation of prototypes. The book is organized into four sections: System Overview, Content Generation, Data Compression and Transmission, and 3D Visualization and Quality Assessment. This book will benefit researchers, developers, engineers and innovators as well as advanced undergraduate and graduate students working in relevant areas.
