Maos Great Famine By Frank Dikotter Sep 20 2011:

An Analysis of Frank Dikotter's Mao's Great Famine John Wagner Givens, 2017-07-05 The power of Frank Dikotter's ground breaking work on the disaster that followed China's attempted Great Leap Forward lies not in the detail of his evidence though that shows that Mao's fumbled attempt at rapid industrialization probably cost 45 million Chinese lives. It stems from the exceptional reasoning skills that allowed Dikotter to turn years of researching in obscure Chinese archives into a compelling narrative of disaster and above all to link two subjects that had been treated as distinct by most of his predecessors: the extent of the crisis in the countryside and the actions hence the responsibility of the senior Chinese leadership. In Dikotter's view ultimate responsibility for the catastrophe lies at the door of Mao Zedong himself: the Chairman conceived and ordered the policies that led to the famine and he did nothing to reverse them or limit the damage that was being wrought when evidence for their disastrous impact reached him. Dikotter's ability to persuade his readers of the fundamental truth of these arguments despite his admission that his access to sources was necessarily limited and incomplete together with the clear structure of his presentation combine to produce a work that has had enormous influence on perceptions of Mao and of the Great Leap Forward itself.

China's Dance with the Foreign Devils Dick K. Nanto, PhD, 2016-07-15 Since 1978 in China foreign direct investment has served as a driver of change that has brought the country into the modern economic world. Mao Zedong had shut out the foreign devils: Europeans, Japanese, Americans and other outsiders. He created chaos in an economy that was long on suffering but short on foreign currency, technology and capital. In this detailed account Dick K. Nanto explores how foreign companies came in to fill the gaps in China's economy and helped it to become a manufacturing marvel. He focuses on topics such as how industrialization has created a socialist economy with Chinese characteristics that are reflected in industrial policy, governmental institutions, state-owned enterprises, the push to climb the high technology ladder, indigenous innovation and the drive to create more national champion companies. Chinese are investing abroad, entering the home turf of multinational corporations and raising issues related to national security. Foreign enterprises are now being squeezed as Beijing seeks to replace them with companies of its own. Businesspeople, entrepreneurs, international business students, politicians and anyone interested in how things get done in China will find engaging, informative and comprehensive information in China's Dance with the Foreign Devils.

The Last Vote Philip Coggan, 2013-09-05 The Last Vote is a wake up call showing why we cannot afford to take democracy for granted. From Philip Coggan, award-winning author of Paper Promises and The Money Machine: Can we afford to take democracy for granted? It's now so much a part of our lives that we could be forgiven for thinking it mainly takes care of itself. Almost half the world's population now lives in a democratic state while some Western democracies have now had universal suffrage for almost a century and have endured through even the most severe of global upheavals. In The Last Vote Philip Coggan shows how democracy today faces threats that we ignore at our own risk. Amid the turmoil of the financial crisis, high debt levels and an

ever growing gap between the richest and the rest it is easy to forget that the ultimate victim could be our democracy itself Tracing democracy's history and development from the classical world through the revolution of the Enlightenment and on to its astounding success in the nineteenth and twentieth centuries Coggan revisits the assumptions on which it is founded What exactly is democracy Why should we value it What are its flaws And could we do any better The Last Vote is a wake up call and an illuminating defence of a system which in Churchill's words is the worst possible form of government except for all the others that have been tried Reasoned lucid and balanced Coggan's argument parrots neither the agenda of left nor right but calls for us all to work together to ensure we don't end up in an even greater mess than we're in today Finally he proposes ideas for change and improvement to the system itself so the next vote we cast will not be the last Praise for Paper Promises This book stands way above anything written on the present economic crisis Nassim Taleb author of The Black Swan Bold and confident This book should be taken very seriously John Authers Financial Times The most illuminating account of the financial crisis to appear to date written with a lucidity that conveys deep insights without a trace of jargon John Gray New Statesman Philip Coggan was a Financial Times journalist for over twenty years and is now the Buttonwood columnist for the Economist In 2009 he was named Senior Financial Journalist in the Harold Wincott awards and was voted Best Communicator at the Business Journalist of the Year Awards He is the author of The Money Machine and Paper Promises winner of the Spears Business Book of the Year Award and longlisted for the Financial Times Goldman Sachs Business Book of the Year Award

Implosion Jerry Kroth, 2014-07-12 *Implosion* denial delusion and the prospect of collapse is a penetrating look at contemporary collective delusions slithering across the American landscape A delusion is a false idea about the world a kind of intellectual trance When an individual suffers one the diagnosis of mental illness is not far behind When a nation labors under them we have a state of collective mental instability This odyssey explores five gargantuan delusions infecting the American psyche our understanding of our democratic political system the Iraq war the perception of ourselves as an empire the musical genre of hip hop and our extremely precarious financial condition In the final chapter Slip slidin to dystopia Dr Kroth reviews the seven major signs of societal collapse These factors are combined to form the American Dystopia Index When one looks at this metric the transformation of the American dream to an American nightmare seems all but assured should we not awaken from our myriad trance states in time Reviews Jerry Kroth s book *Implosion* is so exciting that I had to stop reading it for a few minutes just to calm down Kroth does for his readers just what he says the truth will do for us He presents an utterly compelling case for seven deadly symptoms which combined will bring America down and the world with it However he does it so well and documents his work so meticulously that the excitement of learning the truth renders reading *implosion* a thrilling experience As Yeats said in his prescient poem the Second Coming The centre cannot hold Kroth promises us a second coming of hope and possibility He exposes our march towards destruction and also a path for reversing that *Implosion* strips away our illusions and denials giving us the truth a chance to reverse our deadly course and also a reason to hope Harried Fraad Ph D psychoanalytic psychotherapist author of *Bringing it all back home* Duped is incredible You will want to shove it up the nose of every pompous conservative right wing born again love it or leave it jerk you have ever met Dr Kroth continues to approach the unapproachable He holds no punches in describing our American culture s blind xenophobia telling ourselves we are the best while betraying our most basic common sense as the evidence piles up at our feet We choose leaders who simply tell us what we wish we could believe and continue to act in ways that shorten our lives steal our money and leave us less secure than

Useful Complaints Jing Chen, 2016-09-09 This book develops an informational theory to account for the coexistence of China's exceptionally resilient authoritarianism and its high decentralization The nuanced information contained in citizens complaints which are filed through the petition system helps to sustain China's decentralized authoritarianism in three important ways First petitions help to alleviate the information asymmetry problem that arises when the central government has less information than lower level governments do When studying citizens petitions higher level governments can obtain valuable and accurate information about local officials performance in policy implementation public goods provision and corruption Higher level governments need this information in order to effectively utilize the cadre management system to reward good performance and punish malpractice The result of this interaction is the PRC's relatively high quality of governance and effective control of local officials There is also a second way in which citizens petitions help the government to overcome the dictator's dilemma that arises when an authoritarian regime is uncertain about how much support it really enjoys among its citizens Citizens specific grievances are revealed in these petitions and are mostly addressed in their beginning stages When citizens complaints are rooted in central policy they set the agenda for policy change in order to maintain social order There is yet a third benefit conferred upon the PRC by the petition system Thanks to the petition system the central government can present itself as the ally of citizens when it addresses the matters raised by their petitions As a result the petition system grants the central government an opportunity to hold local officials accountable scapegoat local authorities divide citizens and local officials and justly claim all the credit when its policies succeed This helps to build citizens trust in their central government and reinforces its legitimacy in their eyes In Huntington's terms the Chinese Communist Party institutionalizes mass support by addressing citizens grievances expressed through the channel of communication provided by the petition system In this sense the complaints of citizens can be very useful tools for regime maintenance The author substantiates these points with case studies and statistical analysis

Western Perspectives On The People's Republic Of China: Politics, Economy And Society Colin Mackerras, 2015-03-05 How have Westerners seen the People's Republic of China over the years The question raises many important issues which this book aims to present analyze and explain The basic conclusion is that Western perspectives are somewhat more complex than simply viewing China's realities Involved also are politics and power relations trends in journalism and scholarship as well as

individual and group personalities and psychologies Based on extensive personal experiences in China dating back to 1964 and wide ranging travel in Tibet and ethnic regions since the 1980s the author attempts to distinguish trends in different Western countries However most of the material will concern the United States which has been the dominant contributor to Western perspectives during the whole period of concern to this book The perspectives are taken up by topic including politics economy society and ethnic minorities Inherent in each topic is the way cultures see and react towards each other Images and perspectives can affect policy and have done so many times in the past which adds to the importance of this book It also takes up questions of the sources of Western perspectives both in terms of direct sources such as newspapers television or the internet and deeper ones such as social values and temperament

The Economic Government of the World Martin Daunton, 2023-11-14 Foreign Affairs Best Books of the Year 2023 An epic history of the people and institutions that have built the global economy since the Great Depression In this vivid landmark history the distinguished economic historian Martin Daunton pulls back the curtain on the institutions and individuals who have created and managed the global economy over the last ninety years revealing how and why one economic order breaks down and another is built During the Great Depression trade and currency warfare led to the rise of economic nationalism a retreat from globalization that culminated in war From World War II came a new liberal economic order Squarely reflecting the interests of the West in the Cold War liberalism faced collapse in the 1970s and was succeeded by neoliberalism financialization and hyper globalization Now as leading nations are tackling the fallout from Covid 19 and threats of inflation food insecurity and climate change Daunton calls for a return to a more just and equitable form of globalization Western imperial powers have overwhelmingly determined the structures of world economic government often advancing their own self interests and leading to ruinous resource extraction debt poverty and political and social instability in the Global South He argues that while our current economic system is built upon the politics of and between the world s biggest economies a future of global recovery and the reduction of economic inequality requires the development of multilateral institutions Dramatic and revelatory *The Economic Government of the World* offers a powerful analysis of the origins of our current global crises and a path toward a fairer international order

History, Empathy and Conflict Philip Towle, 2018-05-15 This book argues that popular culture has been transformed in a silent revolution from emphasising history s heroes to its victims While city squares and stations were named in the nineteenth century after military victories now the equivalent airports are named after the victims of violence Where war reports used to focus on the leadership of the generals and the bravery of the troops now they are mostly about casualties refugees and destruction *History Empathy and Conflict* examines the diplomatic consequences of such a revolution in sensibility Many governments have responded by apologising for their country s historic actions History teaching in schools has sometimes been revised to reflect the new emphasis and to build confidence between nations and respect for domestic minorities Not least of the reasons for these changes is the difficulty or impossibility of making restitution for past

wrongs But history can also be used by the media and governments to justify intervention to protect victims of civil wars only to come to be seen as victimisers themselves The past is always difficult to interpret but is the basis of all our decisions and all institutions try to twist it to their own convenience Sympathy with history's victims is a great moral advance but it can be used by dissatisfied nations to justify their revisionist policies and with the election of President Trump in 2016 all the Great Powers claim to be history's victims

Constructing a Place of Critical Architecture in China Guanghui

Ding, 2016-03-09 For the past 30 years The Chinese journal Time Architecture Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal's publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use them

NATO Reconsidered Wesley B. Truitt, 2020-10-27 Is NATO still in the best interest of the United States This provocative work argues that the focus on NATO distracts the U S from the vital foreign policy challenges of the 21st century most notably China's rise in power Since its beginning in 1949 NATO the North Atlantic Treaty Organization has been at the center of U S foreign policy The alliance was crucial during the decades of the Cold War and the United States collaborated closely with NATO during crises in Kosovo Afghanistan and Libya But does the NATO alliance still serve the best interests of the U S The NATO of today one that has expanded to 30 member countries risks involving the U S in unwanted military activities of the future actions that were not intended in the original Atlantic alliance In addition the real challenges for foreign policy of 21st century are not in Europe but in the expanding economic powerhouses in Asia especially China NATO Reconsidered argues that the changes in world politics in recent decades requires that the more than 70 year old alliance

should no longer be the principal focus of U S foreign policy

Thayer,2022-09-30 This book examines the contours of the Sino American confrontation and its future trajectories It delineates the two major causes of the friction in Sino American relations change in the balance of power in China s favor and the conflicting ideologies of the two states and emphasizes why it is imperative for the U S to hold on to its ideological principles It demonstrates the ultimate and irreconcilable gap in the visions the two competitors have for international politics and consequently why conflict certainly cold and very possibly hot is inevitable The authors also suggest measures which the U S can adopt to sustain its leadership and deter China s ideology and vision for the future of global politics A significant contribution to the study of Sino American relations the volume will be of interest to scholars and researchers of international relations foreign policy and U S and Chinese politics It will be of great interest to think tanks public policy professionals and the interested general reader
