The Maple® O.D.E. Lab Book Darren Redfern, Edgar

Chandler, 2012-12-06 The Maple ODE Lab Book is intended to provide a thorough introduction to using symbolic computation software to model solve explore and visualize ordinary differential equations It is best used as a supplement to existing texts see the bibliography for some of our recommended texts Maple was chosen as our software package because of its ease of use affordability and popularity at many universities and colleges around the world The version being used is Maple V Release 4 If you have a previous release of Maple some of the commands shown in this lab book will work differently or not at all but the basic groundwork for solving ODEs hasn't changed Speak to your system administrator about upgrading to Release 4 or contact Waterloo Maple Inc 450 Phillip Street Waterloo Ontario CANADA N2L 5J2 Phone 519 747 2373 FAX 519 747 5284 E mail info maplesoft com WWW http www maplesoft com 1 2 Chapter 1 Introduction How This Lab Book Is Organized Each subsequent chapter of this lab book contains information and examples of how to apply Maple to various elements of ordinary differential equations It is suggested that you read the chapters with your computer on and Maple V Release 4 running You can then execute many of the commands yourself and experiment by changing various parameters and or initial conditions observing the corresponding changes in the results **Maple V: Mathematics and its**

Applications Robert J. Lopez, 2012-12-06 The Maple Summer Workshop and Symposium MSWS 94 reflects the growing community of Maple users around the world This volume contains the contributed papers A careful inspection of author affiliations will reveal that they come from North America Europe and Australia In fact fifteen come from the United States two from Canada one from Australia and nine come from Europe Of European papers two are from Germany two are from the Netherlands two are from Spain and one each is from Switzerland Denmark and the United Kingdom More important than the geographical diversity is the intellectual range of the contributions We begin to see in this collection of works papers in which Maple is used in an increasingly flexible way For example there is an application in computer science that uses Maple as a tool to create a new utility There is an application in abstract algebra where Maple has been used to create new functionalities for computing in a rational function field There are applications to geometrical optics digital signal processing and experimental design *Maple® for Environmental Sciences* Bill Scott, 2012-12-06 What is this book about Please take this book as it is a working document It started as an idea that has grown It will never be correct but should be self-correcting In the limit if there is one the book should approach a correct state It is not the detail and the numbers that matter but the structures and the order These structures are inherently linked with the many minds that have made Maple the minds of perhaps the best mathematicians certainly some of the most useful Our environment is not separate from mathematics mathematics is but one tool of several to help with understanding the environment It is a harsh tool that requires numbers and symbolism Maple handles the symbolism superbly numbers need more consideration We have included

a substantial amount on reading and writing numbers data and dealing with floating point numbers It is the devil in the detail that continually comes back to us in working with Mathematics and Maple It becomes raw and defined Many of the things we do have rational and logical bases but we don't know what they are Often in following the code and talking with an input line to Maple the detailed way of performing a task becomes clear But not without frustration the task is invariably simple though
