**How Journalism Uses History** Martin Conboy, 2013-09-13

*How Journalism Uses History* examines the various ways in which journalism uses history and historical sources in order to better understand the relationships between journalists, historians and journalism scholars. It highlights the ambiguous overlap between the role of the historian and that of the journalist and underlines that there no longer seems to be reason to accept that one begins only where the other ends. With Journalism Studies as a developing subject area throughout the world, journalism history is becoming a particularly vivacious field. As such, *How Journalism Uses History* argues that if historical study of this kind is to achieve its full potential, there needs to be a fuller and more consistent engagement with other academics studying the past: political, social and cultural historians in particular, but also scholars working in politics, sociology, literature and linguistics. Contributors in this book discuss the core themes which inform history's relationship with journalism from a wide range of geographical and methodological perspectives. They aim to create more ambitious conversations about using journalism both as a source for understanding the past and for clarifying ideas about its role as constituent of the public sphere in using discourse and tradition to connect contemporary audiences with history. This book was originally published as a special issue of *Journalism Practice*.

**Media, Sustainability and Everyday Life** Geoffrey

Craig, 2019-04-04 This book analyses representations of sustainable everyday life across advertising, eco reality television, newspapers, magazines and social media. It foregrounds the discursive and networked basis of sustainability and demonstrates how such media representations connect the home and local community to broader political, social and economic contexts. The book shows how green lifestyle media negotiate issues of sustainability in varying ways, reproducing the logic of existing consumer society while also sometimes providing projections of a more environmentally friendly existence. In this way, the book argues that everyday lifestyles are not an irredeemable problem for environmentalism but an important site of environmental politics.

Cosmopolitanism and the New News Media Lilie Chouliaraki,Bolette Blaagaard,2015-09-07 The Arab Spring the Occupy Wall Street movement and the Haiti earthquake are only some of the recent examples of the power of new media to transform journalism Some celebrate this power as a new cosmopolitanism that challenges the traditional boundaries of foreign reporting yet others fear that the new media simply reproduce old power relations in new ways It is this important controversy around the role of new media in shaping a cosmopolitan journalism that offers the starting point of this book By bringing together an impressive range of leading theorists in the field of journalism and media studies this collection insightfully explores how Twitter Facebook Flickr and YouTube are taking the voice of ordinary citizens into the forefront of mainstream journalism and how in so doing they give shape to new public conceptions of authenticity and solidarity This collection is directed towards a readership of students and scholars in media and communications digital and information studies journalism sociology as well as other social sciences that engage with the role of new media in shaping contemporary social life This book was originally published as a special issue of Journalism Studies Metalddata Sonia

Journalistic Skills Leen d'Haenens, Michaël Opgenhaffen, Maarten Corten, 2015-09-04 This book considers the role journalism education plays in coping with a changing media landscape. It looks at how journalists can empower themselves in an effort to excel in an evolving environment and considers whether it suffices for them to master pre-millennial basic skills or whether brand new competencies need to be incorporated. Few dramatic qualifications are spared when discussing the changes that have shaken the news environment during the noughties. Digitization has both empowered and tried professional journalists through multimedia news production, media convergence, and not least a maturing commercial internet. Moreover, digitization has also influenced and been influenced by other societal changes such as global financial tensions, evolving multicultural societies, and emerging democracies in search for a suitable journalistic paradigm. Indeed, the rather technological evolutions emphasized time and again cannot be detached from a cultural setting. This is why an investigation in required competencies benefits from an explicit socio-cultural and cross-continental perspective. As this book tackles a varied set of news ecosystems, it is our hope to offer a nuanced view on what indeed seems to be a global fluidity in journalism practice. Explicit emphasis is put on the role of journalism education as facilitator for and even innovator in required journalistic competencies. Time will tell whether or not news ecosystems will again stabilize. This volume makes a number of concrete recommendations towards journalism training and discusses a number of case studies across several continents illustrating how goals are attuned to a changed news environment. As this book links academic paradigms to concrete journalism practice and education, its reading is recommended both for practitioners and educators. This book was originally published as a special issue of *Journalism Practice*.

*Heavy Metal Generations*, 2020-04-14 This volume was first published by Interdisciplinary Press in 2012. *Heavy Metal Generations* is the fourth volume in the series of papers drawn from the 2012 Music, Metal, and Politics international conference which attracted scholars from around the globe working within a diverse range of academic disciplines to converge in Prague, Czech Republic, for three days of panel presentations, debate, and conjecture about the past, present, and future of metal music studies. The flavour of diversity, synchronicity, and interdisciplinarity that characterised the event can be gauged from the selection of chapters presented in this volume. We hope this collection contributes to the rising tide of academic work that serves to broaden and deepen heavy metal music studies, intellectual and aesthetic grounds, critical agenda, and political value by undermining old certainties and suggesting new horizons in the context of current social conditions, politics, and society.

*Picturing the Woman-Child* Morna Laing, 2021-01-28 The childlike character of ideal femininity has long been critiqued by feminists from Mary Wollstonecraft to Simone de Beauvoir. Yet women continue to be represented as childlike in the western fashion media despite the historical connotations of inferiority. This book questions why such images still hold appeal to contemporary women after three or even four waves of feminism. Focusing on the period of 1990-2015, *Picturing the Woman-Child* traces the evolution of childlike femininity in British fashion magazines including *Vogue*, *i*, *D*, and *Lula*. *Girl of my Dreams* These images draw upon a network of references from *Kinderwhore* and *Lolita* to Alice

in Wonderland and the femme enfant of Surrealism Alongside analysis of fashion photography the book presents the findings of original research into audience reception Inviting contemporary women to comment on images of the woman child provides an insight into the meaning of this figure as well as an evaluation of theory on the female gaze Both scholarly and accessible the book paves the way for future studies on how readers make sense of fashion imagery

*Explorations in Global Media Ethics* Muhammad Ayish, Shakuntala Rao, 2013-09-13 Studies of global media and journalism have repeatedly returned to discussions of ethics This book highlights the difficulty that journalists encounter when establishing appropriate ethical practices and marks the pressing importance of global media ethics as a subject of current debate A wide range of contributors both scholars and practitioners of journalism identify how changes in journalism practice developments in new media technologies legal regulations and shifting patterns of ownership all play a role in creating ethical tensions for journalists with some chapters in the book suggesting practical solutions to this pertinent issue The growing need to faithfully represent other diverse cultural groups is also considered with certain chapters discussing the impact that human rights freedom and justice have upon journalistic decision making *Explorations in Global Media Ethics* recognises that with the escalation of globalisation and a public striving for honest quality media journalists around the world face an increasing pressure to comply with and simultaneously satisfy diverse ethical practices at both a local and a more global level The book sympathises with the position of the journalist and calls for greater consideration of his ambiguous role This book was originally published as a special issue of *Journalism Studies*
