March Sea Operational Shermans American:

The March To The Sea: The Operational Role Of Sherman's Right Wing Major F. Edward Schwabe Jr. U.S.

Army, 2015-11-06 Examines the operations of Sherman's 15th and 17th Corps during the march through Georgia in the Fall of 1864 with emphasis on their respective roles in support of Sherman's strategy. The study focuses on the role of the march within the context of overall Union strategy, the special preparations for the movement to the coast and the actions of the 15th and 17th Corps during the latter two thirds of the march, 23 November to 10 December 1864. The operations of the 15th Corps are particularly emphasized to highlight its role in forcing the rapid collapse of Confederate opposition in front of Sherman's advance. The study concludes that though largely ignored and overshadowed by the actions of the left wing and Union cavalry, the accomplishments of the right wing, particularly the 15th Corps, were a more important validation of Sherman's strategic gamble. After feinting toward Macon, the 15th and 17th Corps disappeared into a sparsely settled wilderness, marching unopposed for over one hundred miles through some of the poorest regions of Georgia. But its movements during this period served to fragment and paralyze Confederate efforts to delay Sherman's advance and played a significant role in enabling the Union Army to rapidly gain the coast and to open communications with the U.S. Navy. At the same time, the study defines the logistical needs of Sherman's army as its greatest vulnerability, one which the Confederates were unable to exploit.

Sherman's March to the Sea Willow Archer, In the autumn of 1864, as the American Civil War entered its fourth devastating year, General William Tecumseh Sherman stood at a crossroads that would define both his legacy and the future conduct of warfare. The Union had achieved significant military victories, including Sherman's own capture of Atlanta in September, but the Confederacy remained defiant and capable of prolonged resistance. Traditional military campaigns had proven insufficient to break Southern will, leading Sherman to contemplate a revolutionary approach to warfare that would target not just Confederate armies but the entire economic and psychological foundation of the rebellion. Sherman's evolution from conventional military commander to architect of total war reflected his growing understanding that the Civil War was not merely a conflict between armies but a struggle between entire societies. His experiences in Georgia had convinced him that the Confederate war effort depended as much on civilian morale and economic resources as on military strength. The plantations that fed Confederate armies, the railroads that transported supplies, and the civilian population that supported the war effort were all legitimate targets in Sherman's expanded conception of military necessity. The strategic situation facing the Union in late 1864 presented both opportunities and challenges that would shape Sherman's decision to march through Georgia to the sea. General Ulysses Grant's Virginia campaign had locked Robert E. Lee's Army of Northern Virginia in a bloody stalemate around Petersburg, while other Union forces were engaged in similar grinding campaigns throughout the South. Sherman recognized that breaking this strategic deadlock required a fundamentally different approach that would strike at the
