Myths and Memories Cindy Lane,2015-02-27 This book examines the perceptions of European travelling writers about southern Western Australia between 1850 and 1914 Theirs was a narrow vision of space and people in the region shaped by their individual personalities their position in society and the prevailing discourses and ideologies of the age Christian Enlightenment and Romantic philosophies had a major influence on their responses to the land its cultivation and conservation and its aesthetic qualities and on their views of both

indigenous and settler colonial society their class and assumptions of race and ethnicity The travelling men and women perpetuated an idealised view of a colonised landscape and a pioneer community that eliminated class struggle and inequality even though an analysis of their observations suggests otherwise Nevertheless although limited their narratives are invaluable as a reflection of opinions attitudes and knowledge prevalent during an age of imperialism Their perspectives reveal unique viewpoints that differ from those of immigrants who wrote about their hopes and fears in making a new life for themselves These travellers were economically secure literate and educated foundations which provide an insight into the way power and privilege implicit in their writings governed the way they imagined Western Australia in the colonial and immediate post federation period The tinted lenses through which European travelling writers narrowly observed space and people presented a mythical imagined sense of southern Western Australia

A Critical History of Psychology Thomas Hardy Leahey, 2025-05-27 This fully updated and refreshed 9th edition places social economic and political forces of change alongside psychology's internal theoretical and empirical arguments It utilizes a critical lens to illuminate the way in which the external world has shaped the development of psychology and in turn how psychology from antiquity to modernity has shaped society The text approaches the material from an integrative rather than wholly linear

perspective carefully examining how issues in psychology reflect and affect concepts that lie outside the field of psychology's technical concerns as a science and profession. Key features of this edition include a newly reconsidered structure including five additional interludes exploring historical background narratives and the rise of modernity to allow for flexible and adaptable textbook use. Expanded exploration of the two psychologies: the Way of Ideas driven by epistemology and unique to Europe and The Way of Human Nature, a universal concern to find a science of human behavior and its management. Including scientific, applied, and professional psychology as well as coverage of the social sciences and social policy implications, this book is appropriate for high-level undergraduate and graduate students.

Christianity and Rabbinic Judaism Jonas Alexis, 2013-01-10. Our way must be never knowingly support lies. Having understood where the lies begin, step back from that gangrenous edge. Let us not glue back the flaking scale of the Ideology, not gather back its crumbling bones, nor patch together its decomposing garb, and we will be amazed how swiftly and helplessly the lies will fall away, and that which is destined to be naked will be exposed as such to the world. Alexander Solzhenitsyn. Enlightenment writer Voltaire was amazed that twelve fishermen, some of them unlettered from an obscure place in the world called Galilee, challenged an empire through self-denial and patience and eventually established Christianity. He seriously thought that twelve philosophers or intellectuals himself included would do the opposite and crush Christianity. Voltaire's self-appointed cheerleaders such as Diderot, Helvétius, d'Holbach, D'Alembert, Lamettrie, and Baron Cloots, among others, tried to do just that and wrote volumes of work trying to tear down the basis of Christianity and erect an edifice of their own. Diderot, in particular, declared, "I would sacrifice myself perhaps if I could annihilate forever the notion of God." Cloots wrote, "We shall see the heavenly royalty condemned by the revolutionary tribunal of victorious Reason." Lamettrie produced *Man A Machine* and an entire French encyclopedia was written between 1751 and 1772 by those philosophers because Christianity, to a large degree, had to go. Voltaire would send letters to his disciples and friends saying, "crasez linfme." Rousseau, of course, was a disciple of Voltaire and declared that Voltaire's work inspired him. The French Revolution failed. Yet like all significant revolutions before and after that period, the French Revolution indirectly had a theological root, which was then a categorical and metaphysical rejection of Logos. That theological substratum has jumped from one era to the next and had and still has historical, political, economic, and spiritual ramifications. This book is about the historical and theological struggle of that conflict, which had its inception at the foot of the cross.

Bourgeois Equality Deirdre Nansen McCloskey, 2020-03-04. How standards of living have skyrocketed since 1800 and the political philosophy that made it possible. Persuasive, richly detailed, and erudite. Financial Times. There's little doubt that most humans today are better off than their forebears. Stunningly so, the economist and historian Deirdre McCloskey argues in this concluding volume of her trilogy celebrating the oft-derided virtues of the bourgeoisie. The poorest of humanity, McCloskey shows, will soon be joining the comparative riches of Japan and Sweden and Botswana. Why? Most economists, from Adam Smith and Karl Marx to Thomas Piketty, say the Great Enrichment since 1800

came from accumulated capital McCloskey disagrees fiercely Our riches she argues were made not by piling brick on brick bank balance on bank balance but by piling idea on idea Capital was necessary but in the same way that oxygen is necessary for a fire Nor were institutions the drivers the World Bank orthodoxy of add institutions and stir hasn t worked McCloskey builds a powerful case for the initiating role of ideas ideas for electric motors and free elections of course but more deeply the bizarre and liberal ideas of equal liberty and dignity for ordinary folk Liberalism arose from theological and political revolutions in northwest Europe yielding a unique respect for betterment and its practitioners and upending ancient hierarchies Commoners were encouraged to have a go and the bourgeoisie took up the Bourgeois Deal and we were all enriched Few economists or historians write like McCloskey her ability to invest the facts of economic history with the urgency of a novel or of a leading case at law is unmatched She summarizes modern economics and modern economic history with verve and lucidity yet sees through to the really big scientific conclusion Not matter but ideas Big books don t come any more ambitious or captivating than Bourgeois Equality *Cultural History of Reading* Sara E. Quay, Gabrielle R. Watling, 2008-11-30 What is it about some books that makes them timeless Cultural History of Reading looks at books from their earliest beginnings through the present day in both the U S and regions all over the world Not only fiction and literature but religious works dictionaries scientific works and home guides such as Mrs Beeton s all have had an impact on not only their own time and place but continue to capture the attention of readers today Volume 1 examines the history of books in regions throughout the world identifying both literature and nonfiction that was influenced by cultural events of its time Volume 2 identifies books from the pre colonial era to the present day that have had lasting significance in the United States History students and book lovers alike will enjoy discovering the books that have impacted our world [Edinburgh Companion to Contemporary Liberalism](#) Mark Evans, 2019-07-29 This is the premier collection of material on a comprehensive range of topics in contemporary liberalism It shows how liberalism can tackle wide ranging practical concerns that urgently demand attention in twenty first century politics [Enduring Controversies in Military History](#) Spencer C. Tucker, 2017-09-21 This provocative examination of major controversies in military history enables readers to learn how scholars approach controversial topics and provides a model for students in the study and discussion of other historical events Why did Alexander the Great s empire fall apart so soon after his death How did France win the Hundred Years War despite England winning its major battles Was slavery the primary cause of the American Civil War Would it have benefited the Allies militarily to have gone to war against Germany in 1938 rather than in 1939 Should women be allowed to serve in combat positions in the U S military All of these questions and many other historical controversies are addressed in this thought provoking reference book By exploring every angle of some of the most contentious debates involving military history this book builds students critical thinking skills by supplying a complete background of the controversial topic to provide context and also by providing multiple perspective essays written by top scholars in the field The perspective essays

present arguments for different positions on the controversy Readers will consider the cases for and against whether Hannibal should have marched on Rome after his momentous victory at Cannae whether the United States was justified in using the atomic bomb in Japan whether Adolf Hitler was primarily responsible for the Holocaust and whether torturing prisoners during the War on Terror is warranted among many other historical military debates

The Trouble with Ownership Jody Greene, 2011-06-07 Copyright and intellectual property issues are intricately woven into any written work but the precise nature of this relationship has plagued authors printers and booksellers for centuries What does it mean to own the products of our intellectual labors in our own time And what was the meaning three centuries ago when copyright laws were first put into place Jody Greene argues that while owning one's book is critical to the

development of modern notions of authorship studies of authorial property rights have in fact lost sight of the most critical valence of owning in early modern England that is owning up to or taking responsibility for one's work Greene puts forth what she calls a paranoid theory of copyright under which literary property rights are a means of state regulation to assign responsibility for printed works to identify one person who will step forward and claim the work in exchange for the right to reap the benefits of the literary marketplace Blending research from legal historical and literary archives and drawing on the troubled authorial careers of figures such as Roger L Estrange Elizabeth Cellier Daniel Defoe John Gay and Alexander Pope *The Trouble with Ownership* looks to the literary culture of early modern England to reveal the intimate relationship between proprietary authorship and authorial liability

Enlightened Colonialism Damien Tricoire, 2017-08-11 This book further qualifies the postcolonial thesis and shows its limits To reach these goals it links text analysis and political history on a global comparative scale Focusing on imperial agents their narratives of progress and their political aims and strategies it asks whether Enlightenment gave birth to a new colonialism between 1760 and 1820 Has Enlightenment provided the cultural and intellectual origins of modern colonialism For decades historians of political thought philosophy and literature have debated this question On one side many postcolonial authors believe that enlightened rationalism helped delegitimize non European cultures On the other side some historians of ideas and literature are willing to defend at least some eighteenth century philosophers whom they consider to have been anti colonialists Surprisingly enough both sides have focused on literary and philosophical texts but have rarely taken political and social practice into account
