city with the heart of a small town Here in the closing years of the 20th century is Baltimore with all its unexpected triumphs crushing troubles idiosyncratic characters and lively neighborhoods Michael Olesker's Baltimore offers a front row seat at the daily skirmishes that mark the city's life Olesker draws intimate portraits of major politicians and local celebrities of big names like William Donald Schaefer and Kurt Schmoke Barbara Mikulski and Bea Gaddy Artie Donovan and Brooks Robinson Barry Levinson and John Waters He gives equal time to players along the fringes Block denizens professional gamblers petty street hustlers and to the generally unsung heroes who keep the city vibrant and kicking With articles about the price neighborhoods pay over racial conflicts and about the small deals that are made to get communities through a given day Michael Olesker's Baltimore deepens our understanding of the city's people and their resilience Olesker is hard edged and straightforward but also warmhearted in his portrayal of Baltimore's colorful characters and their settings In a style that combines police blotter with Sunday feature writing he tells brief stories that show why to visitors and residents alike Baltimore feels like home Baltimore is a city of tribal rituals of neighbors sharing steamed crabs in the back yard and downtown waitresses who call their customers Hon without worrying about any vast sociological implications and worshipful football fans who believe the snatching of their beloved Colts was the worst kidnapping since the Lindbergh baby from Michael Olesker's Baltimore

Food Safety and Natural Toxins Mary Fletcher,Gabi Netzel,2020-11-13 Natural toxins are poisonous secondary metabolites produced by living organisms which are typically not harmful to the organisms themselves but can impact on human or animal health when consumed Common sources of such toxins include poisonous plants fungi algae and bacteria and the diversity of these biological systems presents challenges to analytical chemists in identification in addition to wide ranging food safety implications when present as contaminants in food commodities The propensity for such toxins to be present in both animal feed and human food has led to the introduction of regulations for a small number of the most potent natural toxins particularly mycotoxins Implementation of these regulations necessitates the establishment of high throughput analytical chemistry methods with increasingly lower limits of detection The impacts of plant toxins are not limited to grazing livestock but can be carried through the food chain with some toxins such as indospicine being demonstrated to accumulate in tissues of grazing animals causing secondary poisoning in animals consuming meat from this livestock This Special Issue focuses on the analysis of natural toxins and their incidence from source organisms to food and feed commodities in addition to their implications for food safety
