Ecological Rationality in Spatial Planning Carlo Rega, 2020-01-16 Spatial planning defines how men use one of the most important and scarce resources on Earth land Planners therefore play a key role in countering or deepening the current

ecological crisis To foster ecological transitions planning scholars and practitioners need to be equipped with sound theories and practical tools To this end this book advocates a re foundation of spatial planning under the paradigm of ecological rationality based on the revaluation of early pioneers of ecological planning and mutual fertilization with different disciplines including decision making science ecology eco system theory land use science and political ecology The key principles of ecological rationality and its application to spatial planning are discussed and this conceptual framework is used to explain the main underlying drivers of ecological degradation and their spatial manifestations at the local level Current policy instruments in the European context which can be used to underpin ecological planning such as Green Infrastructure and the Mapping and Assessment of Ecosystem Service MAES initiative are also examined Landscape Perspectives Marc Antrop, Veerle Van Eetvelde, 2017-12-19 Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today s specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept Landscape Architecture and Design - Sustainability and Management , 2025-06-04 In Landscape Architecture and Design Sustainability and Management a creative and multidisciplinary approach is taken to rethink how we design and construct outdoor areas in order to address sustainability This book offers a thorough examination of how landscape architecture can promote ecological resilience boost human well being and establish environments that are in balance It examines how innovative and sustainable methods can direct responsible development in both urban and rural environments including topics like integrated land management green infrastructure and climate responsive design In order to inspire professionals students and decision makers to adopt new design paradigms this book emphasizes the advantages of ecological thinking teamwork and long term planning Learn how landscape architecture may be an effective tool for handling the difficulties of a world that is changing quickly and accomplishing environmental goals **Man-Elephant Conflict** Nilanjana Das Chatterjee, 2016-09-29 This book sheds new light on the causes and consequences of elephant migration in the Panchet Forest Division of Bankura District in West Bengal India an area characterized by fragmented forested landscape modified by agriculture and settlement expansion Anthropogenic activities result in the decline in quality and coverage of forests loss of biodiversity and removal of forest

corridors which ultimately restrict or modify the movement of elephants causing a forceful change of their habitats A major objective of this monograph is to identify the characteristics of man elephant conflicts in terms of land use change cropping patterns ecological characteristics of the fragmented dry deciduous forest trends and patterns of elephant migration and livelihood patterns of the inhabitants in the affected areas Readers will discover insights into changes in the behavioral pattern of elephants and local people in the conflict ridden zones and how this influences food selection Through this book we also learn about rational management strategies that can be employed on the local and national level to mitigate human elephant conflicts Ecologists landscape conservation planners and environmental managers engaged in the conservation of large vertebrates in fragmenting and human dominated landscapes will find this book valuable **Exploring the Visual**

Landscape Steffen Nijhuis,R. van Lammeren (ed.),Frank van der Hoeven,2011-09-01 It offers clues for visual landscape assessment of spaces in cities parks and rural areas The Economic Value of Landscapes C. Martijn van der Heide,Wim Heijman,2013-01-03 This book aims to explore the avenue of landscape economics and provides the building blocks from different scientific disciplines for an economic analysis of landscapes What exactly constitutes and determines the value of a landscape It focuses on the value of landscapes in its broadest sense thereby covering a variety of topics including stakeholder involvement in landscape design landscape governance and landscape perceptions from different countries Merely saying that landscapes have value or are important is not sufficient not when resources are scarce and have alternative uses Measuring and quantifying the economic value of changes in landscapes would help ensure that landscape management decisions are both economically rational and sound
