Transforming Agricultural Education for a Changing World National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Board on Agriculture and Natural Resources,Committee on a Leadership Summit to Effect Change in Teaching and Learning,2009-11-16 During the next ten years colleges of agriculture will be challenged to transform their role in higher education and their relationship to the evolving global food and agricultural enterprise If successful agriculture colleges will emerge as an important venue for scholars and stakeholders to address some of the most complex and urgent problems facing society Such a transformation could reestablish and sustain the historical position of the college of agriculture as a cornerstone institution in academe but for that to occur a rapid and concerted effort by our higher education system is needed to shape their academic focus around the reality of issues that define the world s systems of food and agriculture and to refashion the way in which they foster knowledge of those complex systems in their students Although there is no single approach to transforming agricultural education a commitment to change is imperative **World Kids**
