4.3 Favorite Color Graph

O: TLWBAT classify, count, and order categories by count

V: all, bar graph, fewer, graph, lease, less, more, most, none, some

M: graph, squares of paper

P: Teacher will give each child a piece of white paper and all children will color the paper their favorite color. When finished, sort the children according to color. Ask: *How can we find the most popular color?* Class will count each color group. Ask about a color not picked. (remind children that 0 represents none.)

Prompt discussion:

How could we share with others what we learned about our favorite colors? How can we save this information so we could talk about it another day? or compare it with another class?

Suggest creating a graph. Class will decide what to title the graph and what the axes will say. Conclude by counting all colors and discussing: *most popular, least, how many more than, what does this tell us, why do we use title and labels, if we compared another class...do you think it will be the same?*

Have class graphs and record findings.

A: teacher observation, graph

Differentiation: higher order questions (Ex: how many green and red are there?), small group instruction as needed, repeat and rephrase directions, provide visuals and additional teacher modeling

4.5 Ten Frame Quick Looks

O: TLWBAT understand addition by decomposing numbers on a ten frame.

TLWBAT match groups to their numeral by playing a memory game.

M: Smart board, ten frame and number cards - math masters G8.9, 18, 19

P: Display smart board. Explain that we will take a quick look at ten frames and describe what we see. Students will identify the number and then discuss ways to decompose the numbers on the frame. SW then play a game matching ten frames and numerals.

A: Teacher Observation, Game play using checklist

Differentiation: Small group instruction as needed, repeat and rephrase directions, provide visuals and additional teacher modeling

Danzig,Kathryn M. Borman,Bruce A. Jones,William F. Wright,2017-09-25 Many new approaches to school improvement are being proposed in the current climate of assessment and school accountability This book explores one of these approaches a new model of leadership training known as Learner Centered Leadership LCL It is built around the fundamental idea that learning and learning communities are natural processes that when properly harnessed can lead to the highest levels of professional engagement

and problem solving Key features of this exciting new approach to school leadership include the following Broad based and Generative The book s narratives vividly illustrate the extraordinary ability of LCL to generate new approaches to leadership development For example encouraging and assisting school leaders to reflect on their own leadership attributes relative to the implementation of the school mission to ensure high teacher efficacy and student learning In this respect the volume contributes significantly to the field of school leadership and professional development by extending above and beyond a narrow focus on instructional leadership Practice Oriented By creating communities that encourage conversation and analysis the new data driven models of school improvement are more likely to be successfully implemented Without analytical discourse the process of interpreting school data and transforming it into practice would be largely lost Conceptually Appropriate The realization that everyone within a school students teachers administrators belongs to the same learning community minimizes status differences and encourages teamwork The LCL administrator is much less likely to be authoritarian and power oriented and much more likely to be transformative and student outcome focused This book is appropriate for master s level courses and certification seminars and for inservice workshops dealing with school leadership
