It is particularly timely given China's growing influence and the increased recognition of the importance of early childhood education for human capital development globally. Across international contexts, there is limited knowledge of China's early childhood curricular reforms, and this book offers insight into the socio-cultural and political influences that have driven the nation's tremendous investment in the technology infrastructure, the ambitious goals for implementation into the education of young children, and barriers to these integration efforts. Each chapter sheds light on a distinct aspect of this complex landscape, providing valuable insights and opening new avenues for exploration. It sheds light on the socio-cultural and political influences that have shaped China's ambitious goals for technology integration in the education of young children. By addressing the barriers and challenges faced in these integration efforts, the book provides critical knowledge for policymakers, researchers, and educators seeking to enhance early childhood education practices in China and beyond. Furthermore, this volume contributes to the global understanding of China's early childhood curricular reforms and the significant investments made in technology infrastructure. As China continues to play an influential role in the global landscape, understanding its early childhood curricular reforms and technology integration efforts becomes increasingly important. This book contributes to the international knowledge base by offering insights into the socio-cultural and political influences driving China's investment in technology infrastructure and the challenges faced in its implementation. It serves as a valuable resource for researchers, policymakers, and educators worldwide seeking to enhance early childhood education practices, promote digital literacy, and harness the potential of digital technologies in early learning environments.

Debates on Early Childhood Policies and Practices Theodora Papatheodorou, 2012-05-16 Globally, Early Years policies and documents have set out aspirational outcomes and benefits for children, their families, and the wider society. These policies have emphasised the place of early childhood provision within the wider global agenda by tackling inequality and disadvantage early on in children's lives. However, these strategies have also raised further debates regarding the way they have informed and shaped curricula, frameworks, and pedagogical approaches. The international team of contributors to this book argue that if these issues are not explicitly acknowledged, understood, critiqued, and negotiated, emerging policies and documents may potentially lead to disadvantaging, marginalising, and even pathologising certain childhoods. Divided into two parts, the volume demonstrates the dialectic nature of both policy and practice. The chapters in this wide-ranging text explore and articulate the philosophical premises and values that underpin current early childhood policy, curricula, and pedagogies; explicitly acknowledge and articulate some of the potential conflicts and challenges they present; provide examples of divergent and creative pedagogical thinking; highlight opportunities for enabling pedagogical cultures and encounters. Debates on Early Childhood Policies and Practices is aimed at a wide readership, including academics and researchers in early years education, policy makers,

undergraduate and postgraduate students practitioners and early childhood professionals
