Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences Philip Hui Li, Anne Forbes, Weipeng Yang, 2023-12-11 This book informs best practice for enhancing young children's STEM learning experiences in formal settings such as preschool environments and less formal settings such as home environments. It is the first collection of multidisciplinary and multinational studies on early STEM programs worldwide and presents diverse authentic and current STEM relevant scenarios that address two fundamental problems: where are we in early STEM education and where shall we go? The book explores factors that influence young learners' abilities to make informed choices in authentic problem-based STEM relevant scenarios and how those abilities have been identified, documented, and enhanced. Chapters address topics related to curriculum and pedagogy, teacher education and professional development, family environment, and inclusive education from a variety of international settings including Australia, Germany, Hong Kong, Mainland China, Singapore, and the United States. Each chapter is based around a research project and describes relevant background information from the research literature, details of how the study was designed, findings from the study, and discussion as to what the findings mean for practical implementation. **Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences** will be a key resource for researchers and practitioners of early childhood education and care, STEM education, educational psychology, educational research, and educational technology. This book was originally published as a special issue of the journal *Early Education and Development*.

Resisting the Kinder-Race Christopher P. Brown, 2021 This book explores how the current process of schooling that frames public education through economic rather than democratic terms is fundamentally flawed, why it must change, and how all members and participants within the early childhood and elementary school communities must be a part of the reform process. The work is based on the author's recent studies of stakeholders in the changed kindergarten, as well as earlier studies examining the impact of reforms on classrooms, pre- and in-service teachers, students, families, administrators, teacher educators, and other education stakeholders. By examining these issues empirically, practically, and theoretically, the author illuminates the complexity of what is currently occurring in kindergarten and other early childhood classrooms across the U.S. Then Brown skillfully puts forward ideas for change that are practical and achievable in developing systems of schooling that can educate, foster, and sustain a democratic society.

Navigating Neurodiversity John Truitt, Deborah Gennarelli, 2020-01-01 Imagine living a good deal of your life knowing you are different from people around you but you don't understand why. In addition, the things that make you different have caused difficulties with education, jobs, and relationships. **Navigating Neurodiversity: My Journey as a Twice Exceptional Adult** by John Truitt and Deborah Gennarelli takes readers on an enlightening journey of John Truitt's life and his epiphany moment when he was diagnosed as gifted with autism and other learning differences at 45 years old. **Navigating Neurodiversity** is unique because there are few books available today about twice exceptional adults. For those

readers who are neurodiverse or suspect they are you will discover John's life is an example that can help one comfortably understand and accept who they are. There may be resistance along their journey and one may lose a few battles. However, winning the war is what counts. For those readers who are neurotypical, it is important to raise awareness that many 2e individuals do not seek a cure or want to be fixed. The goal is to help everyone understand that 2e people have limitations but they also have many more strengths to appreciate. Navigating Neurodiversity has three parts. The first part is the introduction that includes background information for those who do not know a lot about neurodiversity, including autism spectrum disorder and giftedness. Part two is about John's twice exceptional life. It includes stories of family history, serving in the military, and his failures and successes in jobs and relationships. Readers will find inspiration as John reflects on the ups and downs of his unique life. Finally, part three includes tips for neurotypicals working and living with 2e adults and strategies for 2e adults to feel more fulfilled in their lives. Also included in this part is help for families of twice exceptional children. Understanding the barriers and myths and misconceptions about this group of students, in addition to learning styles, proper educational planning, and advocacy can make all the difference whether a student succeeds in school or not.
