The Last Man Who Knew Everything Andrew

Robinson,2023-05-09 No one has given the polymath Thomas Young 1773 1829 the all round examination he so richly deserves until now Celebrated biographer Andrew Robinson portrays a man who solved mystery after mystery in the face of ridicule and rejection and never sought fame As a physicist Young challenged the theories of Isaac Newton and proved that light is a wave As a physician he showed how the eye focuses and proposed the three colour theory of vision only confirmed a century and a half later As an Egyptologist he made crucial contributions to deciphering the Rosetta Stone It is hard to grasp how much Young knew This biography is the fascinating story of a driven yet modest hero who cared less about what others thought of him than for the joys of an unbridled pursuit of knowledge with a new foreword by Martin Rees and a new postscript discussing polymathy in the two centuries since the time of Young It returns this neglected genius to his proper position in the pantheon of great scientific thinkers

Breaking the Maya Code (Third Edition) Michael D.

Coe,2012-02-27 The inside story of one of the great intellectual breakthroughs of our time the first great decipherment of an ancient script now revised and updated In the past dozen years Maya decipherment has made great strides in part due to the Internet which has made possible the truly international scope of hieroglyphic scholarship glyphic experts can be found not only in North America Mexico Guatemala and western Europe but also in Russia and the countries of eastern Europe The third edition of this classic book takes up the thorny question of when and where the Maya script first appeared in the archaeological record and describes efforts to decipher its meaning on the extremely early murals of San Bartolo It includes iconographic and epigraphic investigations into how the Classic Maya perceived and recorded the human senses a previously unknown realm of ancient Maya thought and perception There is now compelling documentary and historical evidence bearing on the question of why and how the breaking of the Maya code was the achievement of Yuri V Knorosov a Soviet citizen totally isolated behind the Iron Curtain and not of the leading Maya scholar of his day Sir Eric Thompson What does it take to make such a breakthrough with a script of such complexity as the Maya We now have some answers as Michael Coe demonstrates here

The Matter of Voice Karmen MacKendrick,2016-05-02 Philosophers for millennia have tried to silence the physical musicality of voice in favor of the purity of ideas without matter souls without bodies Nevertheless voices resonate among bodies among texts and across denotation and sound they are singular as unique as fingerprints but irreducibly collective too They are material somatic and musical But voices are also meaningful they give body to concepts that cannot exist in abstractions essential to sense yet in excess of it They can be neither reduced to neurology nor silenced in abstraction They complicate the logos of the beginning and emphasize the enfleshing of all words Through explorations of theology and philosophy pedagogy translation and semiotics all interwoven with song The Matter of Voice works toward reintegrating our thinking about both speaking and authorial voice as fleshy combinings of meaning and music
