Lawrence Vale

Louis Kahn The Power Of Architecture:

Louis Kahn Mateo Kries, Jochen Eisenbrand, Stanislaus von Moos, 2012 The American architect Louis Kahn 1901 1974 is regarded as one of the great master builders of the twentieth century With complex spatial compositions an elemental formal vocabulary and a choreographic mastery of light Kahn created buildings of archaic beauty As the first comprehensive publication on this architect in 20 years the book *Louis Kahn The Power of Architecture* presents all of his important projects It includes essays by prominent Kahn experts and an expansive illustrated biography with many new facts and insights about Kahn s life and work In a number of interviews leading architects such as Frank Gehry Renzo Piano Peter Zumthor and Sou Fujimoto underline Kahn s significance in today s architectural discourse An extensive catalogue of works features original drawings and architectural models from the Kahn archive The compendium is further augmented by a portfolio of Kahn s travel drawings as well as photographs by Thomas Florschuetz which offer completely new views of the Salk Institute and the Indian Institute of Management

Between Silence and Light John Lobell, Louis I. Kahn, 1979 In the development of contemporary architecture few have had greater influence than Louis I Kahn whose many buildings included the Salk Institute the Yale Study Center and the Exeter Library For Kahn the study of architecture was the study of human beings their highest aspirations and most profound truths John Lobell who studied under Kahn while in architecture school sensitively edits Kahn s own words and provides commentary on Kahn s ideas and his major buildings In his work as an architect Kahn searched for beginnings the origin of joy and wonder of intelligence and intuition He sought the basic principles of being which he called Silence and Light Kahn spoke of these qualities with tremendous power and grace *Between Silence and Light* one of the few books on Kahn written for a general audience introduces us to Louis Kahn the architect and the visionary Copyright Libri GmbH All rights reserved

Louis Kahn John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy Louis I Kahn is one of the most influential and poetic architects of the twentieth century a figure whose appeal extends beyond the realm of specialists In this book noted Kahn expert John Lobell explores how Kahn s focus on structure respect for materials clarity of program and reverence for details come together to manifest an overall philosophy Kahn s work clearly conveys a kind of transcendent rootedness a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space and even how we fit into the world In *Louis Kahn Architecture as Philosophy* John Lobell seeks to reveal how Kahn s buildings speak to grand humanistic concerns Through examinations of five of Kahn s great buildings the Richards Medical Research Building in Philadelphia the Salk Institute for Biological Studies in La Jolla the Phillips Exeter Academy Library in New Hampshire the Kimbell Art Museum in Fort Worth and the Yale Center for British Art in New Haven Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn s philosophy including how Kahn wishes us to experience them An architecture

book that touches on topics that addresses the universal human interests of consciousness and creativity Louis Kahn Architecture as Philosophy helps us understand our place and the nature of well being in the built environment *Louis Kahn* Carter Wiseman,2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute the Kimbell Art Museum and the National Assembly complex in Bangladesh Louis Kahn was born in what is now Estonia immigrated to America and became one of the towering figures in his adopted country's built world His works are unmistakable in their elegance monolithic power and architectural honesty Written by Carter Wiseman one of Kahn's most respected commentators this book offers a succinct accessible examination of the life and work of one of America's greatest architects It traces the influence of his immigrant origins his upbringing in poverty his education the impact of the Great Depression and the arrival of Modernism on his life and work Finally it provides insight into why as the legacy of many of his contemporaries has receded in importance Kahn's has remained so durably influential Louis Kahn A Life in Architecture provides the best concise introduction available to this singular life and achievement **Louis I. Kahn--Architect** Charles E. Dagit, Jr.,2013-08-22 Few people in the history of art and architecture have planted a seed of inspiration that grew to become a towering oak of lasting influence There are those particularly colleagues and students of Louis I Kahn who would say that he was one of these people Certainly Kahn was one of the foremost architects of the twentieth century designing such famous landmarks as the National Assembly Building in Dhaka Bangladesh the Salk Institute in La Jolla California and the Kimbell Museum in Fort Worth Texas In this commemorative volume Charles E Dagit Jr shows the power and influence that Kahn displayed at the University of Pennsylvania department of architecture in the 1960s Since Dagit knew Kahn personally this is a factual history as well as a glimpse into Kahn's personal wisdom and humanity Beginning with a prelude that starts with the author's undergraduate years at the University of Pennsylvania Dagit launches readers on an intellectual journey of how he first met Kahn From there he details his experiences with Kahn and explores Kahn's interactions with Penn faculty members including Mario Romanach Robert Le Ricolet and Aldo Giurgola This first hand account sheds fascinating new light on one of the most prominent architects of the twentieth century **An Architecture of Place** Randall S. Lindstrom,2024-06-25 Challenging mainstream architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little

more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines Architecture, Power and National Identity Lawrence Vale, 2014-05-01

The first edition of *Architecture Power and National Identity* published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton, 2020-09-08

An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

The Architecture of Ruins Jonathan Hill, 2019-03-25

The *Architecture of Ruins* Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to

the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Louis I. Kahn's Jewish Architecture Susan G. Solomon,2015-05-01 In 1961 famed architect Louis I Kahn 1901 1974 received a commission to design a new synagogue His client was one of the oldest Sephardic Orthodox congregations in the United States Philadelphia s Mikveh Israel Due to the loss of financial backing Kahn s plans were never

realized Nevertheless the haunting and imaginative schemes for Mikveh Israel remain among Kahn's most revered designs Susan G Solomon uses Kahn's designs for Mikveh Israel as a lens through which to examine the transformation of the American synagogue from 1955 to 1970 She shows how Kahn wrestled with issues that challenged postwar Jewish institutions and evaluates his creative attempts to bridge modernism and Judaism She argues that Kahn provided a fresh paradigm for synagogues one that offered innovations in planning decoration and the incorporation of light and nature into building design *Studies in Construction History: the proceedings of the Second Construction History Society Conference* James Campbell, Karey Draper, Amy Boyington, Gabriel Byng, Amy DeDonato, Wendy Andrews, 2015 The proceedings of second conference of the Construction History Society which took place on 20 and 21 March 2015 at Queens College Cambridge featuring 28 peer reviewed papers covering a wide variety of subjects on the theme of construction history Architectural Graphics Manuel A. Ródenas-López, José Calvo-López, Macarena Salcedo-Galera, 2022-04-27 This book reports on several advances in architectural graphics with a special emphasis on education training and research It gathers a selection of contributions to the 19th International Conference on Graphic Design in Architecture EGA 2022 held on June 2-4 2022 in Cartagena Spain with the motto Beyond drawings The use of architectural graphics **Contemporary Urban Landscapes of the Middle East** Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millenniums The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design **The Embodied Image** Juhani Pallasmaa, 2011-05-16 The Embodied Image The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the

many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind

Miracles in Concrete Estonian Museum of Architecture, 2022-08-01 The first comprehensive tribute to Louis Kahn's and Moshe Safdie's structural engineer The Estonian American civil engineer August Komendant 1906 1992 worked with numerous famous architects and engineers on several of the 20th century's most iconic buildings Concrete was Komendant's passion through decades He used his expertise in designing structures as different as the Kadriorg Stadium grandstand in Tallinn Estonia Elmar Lohk 1938 the Habitat 67 experimental housing complex in Montr al Canada Moshe Safdie 1967 and the Kimbell Art Museum in Fort Worth Texas USA Louis I Kahn 1972 Komendant combined technical expertise with a keen sense of aesthetics as an engineer he valued the timeless and enduring qualities of architecture He knew that miracles require more than spreadsheets and a budget the creative impulse is essential One of the most innovative civil engineers of the 20th century Specialized in the use of reinforced concrete and various other concrete technologies Structural engineer to architects such as Louis I Kahn Moshe Safdie and Eero Saarinen
