Love Canal Revisited Race Class And Gender In Environmental Activism:

Love Canal Revisited Elizabeth D. Blum, 2008-03-19 Thirty years after the headlines Love Canal remains synonymous with toxic waste When this neighborhood of Niagara Falls New York burst upon the nation's consciousness the media focused on a working class white woman named Lois Gibbs who gained prominence as an activist fighting to save families from the poison buried beneath their homes Her organization the Love Canal Homeowners Association challenged big government and big business and ultimately won relocation But as Elizabeth Blum now shows the activists at Love Canal were a very diverse lot Blum reveals that more lurks beneath the surface of this story than most people realize and more than mere toxins She takes readers behind the headlines to show that others besides Gibbs played important roles and to examine how race class and gender influenced the way people from African American women to middle class white Christian groups experienced the crisis and became active at Love Canal Blum explores the often rocky interracial relationships of the community revealing how marginalized black women fought to be heard as they defined their environmental activism as an ongoing part of the civil rights struggle And she examines how the middle class Ecumenical Task Force consisting of progressive educated whites helped to negotiate legal obstacles and to secure the means to relocate and compensate black residents Blum also demonstrates how the crisis challenged gender lines far beyond casting mothers in activist roles Women of the LCHA may have rejected feminism because of its anti family stance but they staunchly believed in their rights And the incident changed the lives of working class men who found their wives in the front lines rather than in the kitchen In addition male bureaucrats and politicians ran into significant opposition from groups of both men and women who pressed for greater emphasis on health rather than economics for solutions to the crisis No previous account of Love Canal has considered the plight of these other segments of the population By doing so Blum shows that environmental activism opens a window on broader social movements and ideas such as civil rights and feminism Her book moves the story of Love Canal well beyond its iconic legacy the Superfund Act that makes polluters accountable to highlight another vital legacy one firmly rooted in race class and gender

This Is Our Land Cody Ferguson, 2015-08-27 In the last three decades of the twentieth century the environmental movement experienced a quiet revolution In This is Our Land Cody Ferguson documents this little noted change as he describes the efforts of three representative grassroots groups in Montana Arizona and Tennessee revealing how quite ordinary citizens fought to solve environmental problems Here are stories of common people who confronting environmental threats to the health and safety

of their families and communities bonded together to protect their interests These stories include successes and failures as citizens learned how to participate in their democracy and redefined what participation meant Equally important Ferguson describes how several laws passed in the seventies such as the National Environmental Policy Act gave citizens the opportunity and the tools to fight for the environment These laws gave people a say in the decisions that affected the world around them including the air they breathed the water they drank the land on which they made their living and the communities they called home Moreover Ferguson shows that through their experiences over the course of the 1970s 80s and 90s these citizen activists broadened their understanding of this is our land to mean this is our community this is our country this is our democracy and this is our planet As they did they redefined political participation and expanded the ability of citizens to shape their world Challenging us to see activism in a new way This is Our Land recovers the stories of often unseen citizens who have been vitally important to the environmental movement It will inspire readers to confront environmental threats and make our world a safer more just and more sustainable place to live

The City That Ate Itself Brian James Leech, 2018-02-28 Winner of the Mining History Association Clark Spence Award for the Best Book in Mining History 2017 2018 Brian James Leech provides a social and environmental history of Butte Montana s Berkeley Pit an open pit mine which operated from 1955 to 1982 Using oral history interviews and archival finds The City That Ate Itself explores the lived experience of open pit copper mining at Butte s infamous Berkeley Pit Because an open pit mine has to expand outward in order for workers to extract ore its effects dramatically changed the lives of workers and residents Although the Berkeley Pit gave consumers easier access to copper its impact on workers and community members was more mixed if not detrimental The pit s creeping boundaries became even more of a problem As open pit mining nibbled away at ethnic communities neighbors faced new industrial hazards widespread relocation and disrupted social ties Residents variously responded to the pit with celebration protest negotiation and resignation Even after its closure the pit still looms over Butte Now a large toxic lake at the center of a federal environmental cleanup the Berkeley Pit continues to affect Butte s search for a postindustrial future

Environmental Racism in the United States and Canada Bruce E. Johansen, 2020-04-14 From Flint Michigan to

Standing Rock North Dakota minorities have found themselves losing the battle for clean resources and a healthy environment This book provides a modern history of such environmental injustices in the United States and Canada From the 19th century extermination of the buffalo in the American West to Alaska s Project Chariot a Cold War initiative that planned to use atomic bombs to blast out a harbor on Eskimo land to the struggle for recovery and justice in Puerto Rico following Hurricane Maria in 2017 this book provides readers with an enhanced understanding of how poor and minority people are affected by natural and manmade environmental crises Written for students as well as the general reader with an interest in social justice and environmental issues this book traces the relationship between environmental discrimination race and class through a comprehensive case history of environmental injustices Environmental Racism in the United States and Canada Seeking Justice and Sustainability includes 50 such case studies that range from local to national to international crises

Women and Climate Change Nicole Detraz,2023-02-14 How ideas of gender and climate change intersect with our path to a livable future When you think climate change who comes to mind Who s doing the science the reporting the protesting the suffering In Women and Climate Change Nicole Detraz asks where women in the Global North figure in the picture what that means and why it matters Her answers fill critical gaps in what we know about the politics of climate change and gender Representations of climate change like perceptions of gender can make a profound difference in understanding expectations and actions around social cultural and political issues Interviewing women living in the Global North who work in the climate change sphere Detraz examines the crucial links between notions of climate change and gender in particular how women are portrayed in climate change debates Where is their presence or absence recognized What tasks are they expected to perform What factors influence their roles The answers provide a nuanced account of the characteristics conditions and positions associated with women s activities in and experiences of climate change a multifaceted portrayal of women that also demonstrates the generalization and essentializing that can hinder goals of sustainability and gender justice Because gender is a social construction Detraz reminds us change is possible Her book offers the suggestion and the hope that identifying connections between ideas of gender and climate change might also alter our vision of a livable future

Profit Mark Stoll,2022-11-08 Profit getting more out of something than you put into it is the original genius of homo sapiens who learned how to unleash the energy stored in wood exploit the land and refashion ecosystems As civilization developed we found more and more ways of extracting surplus value from the earth often deploying brutally effective methods to discipline people to do the work needed Historian Mark Stoll explains how capitalism supercharged this process and traces its many environmental consequences The financial innovations of medieval Italy created trade networks that with the European discovery of the Americas made possible vast profits and sweeping cultural changes to the detriment of millions of slaves and indigenous Americans the industrial age united the world in trade and led to an energy revolution that changed lives everywhere But when efficient production left society awash in goods a new sort

of capitalism predicated on endless individual consumption took its place This story of incredible ingenuity and villainy begins in the Doge's palace in medieval Venice and ends with Jeff Bezos aboard his own spacecraft Mark Stoll's revolutionary account places environmental factors at the heart of capitalism's progress and reveals the long shadow of its terrible consequences

concept and content of citizenship one of the fundamental institutions that structures human relations In what is the first introduction of its kind this book provides an accessible stimulating and multidimensional overview of the many ways in which concern for the environment driven primarily by the preoccupation with sustainability is reshaping our understanding of citizenship Environment and Citizenship is structured into three parts Part I introduces the reader to the concept and theories of citizenship and explores the impact that environmental concerns is having on contemporary formulations of citizenship both traditional e g national liberal and republican and emerging e g cosmopolitan ecological and ecofeminist Part II explores the practical manifestations of environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century

The Wild and the Toxic Jennifer Thomson, 2019-03-27 Health figures centrally in late twentieth century environmental activism There are many competing claims about the health of ecosystems the health of the planet and the health of humans yet there is little agreement among the likes of D C lobbyists grassroots organizers eco anarchist collectives and science based advocacy organizations about whose health matters most or what health even means In this book Jennifer Thomson untangles the complex web of political social and intellectual developments that gave rise to the multiplicity of claims and concerns about environmental health Thomson traces four strands of activism from the 1970s to the present the environmental lobby environmental justice groups radical environmentalism and bioregionalism and climate justice activism By focusing on health environmentalists were empowered to intervene in the rise of neoliberalism the erosion of the regulatory state and the decimation of mass based progressive politics Yet as this book reveals an individualist definition of health ultimately won out over more communal understandings Considering this turn from collective solidarity toward individual health helps explain the near paralysis of collective action in the face of planetary disaster

Technology and the Environment in History Sara B. Pritchard, Carl A. Zimring, 2020-10-13 New perspectives on how envirotech can help us engage with the surrounding world in ways that are more sustainable for humanity and the planet Today s scientists policymakers and citizens are all confronted by numerous dilemmas at the nexus of technology and the environment Every day seems to bring new worries about the dangers posed by carcinogens superbugs energy crises invasive species

genetically modified organisms groundwater contamination failing infrastructure and other troubling issues

In Technology and the Environment in History Sara B Pritchard and Carl A Zimring adopt an analytical approach to explore current research at the intersection of environmental history and the history of technology an emerging field known as envirotech

Technology and the Environment in History They discuss the important topics historical processes and scholarly concerns that have emerged from recent work in thinking about envirotech Each chapter focuses on a different urgent topic

Food and Food Systems How humans have manipulated organisms and ecosystems to produce nutrients for societies throughout history

Industrialization How environmental processes have constrained industrialization and required shifts in the relationships between human and nonhuman nature

Discards What we can learn from the multifaceted forms complex histories and unexpected possibilities of waste

Disasters How disaster which the authors argue is common in the industrialized world exposes the fallacy of tidy divisions among nature technology and society

Body How bodies reveal the porous boundaries among technology the environment and the human

Sensescapes How environmental and technological change have reshaped humans and potentially nonhumans sensory experiences over time

Using five concepts to understand the historical relationships between technology and the environment porosity systems hybridity biopolitics and environmental justice Pritchard and Zimring propose a chronology of key processes moments and periodization in the history of technology and the environment Ultimately they assert envirotechnical perspectives help us engage with the surrounding world in ways that are we hope more sustainable and just for both humanity and the planet

Aimed at students and scholars new to environmental history the history of technology and their nexus this impressive synthesis looks outward and forward identifying promising areas in more formative stages of intellectual development and current synergies with related areas that have emerged in the past few years including environmental anthropology discard studies and posthumanism

Razing Kids Jeffrey C. Sanders, 2020-12-10 Children are the future Or so we like to tell ourselves In the wake of the Second World War Americans took this notion to heart Confronted by both unprecedented risks and unprecedented opportunities they elevated and perhaps exaggerated the significance of children for the survival of the human race

Razing Kids analyzes the relationship between the postwar demographic explosion and the birth of postwar ecology In the American West especially workers policymakers and reformers interwove hopes for youth environment and the future They linked their anxieties over children to their fears of environmental risk as they debated the architecture of wartime playgrounds planned housing developments and the impact of radioactive particles released from distant hinterlands They obsessed over how riot riddled cities War on Poverty era rural work camps and pesticide laden agricultural valleys would affect children Nervous about the world they were making their hopes and fears reshaped postwar debates about what constituted the social and environmental good
