2. **Strobe.** Press and hold the button — the flashlight will deliver light while the button is held. The flashlight will switch on in the last memorized mode (except for the Strobe). This type of operation is useful for short-time lighting and settings.

To access the Tactical operation type, unpress the tailcap to 1/4, press the button and tighten the tailcap again holding the button pressed. To return to the General type, unpress the tailcap to 1/4 and tighten it again.

While in the **General** type, you have a convenient **momentary access** to the flashlight's **Max** mode.

**Max.** Click the button in Off-state. Press and hold — to switch 3 main modes in a cycle, and release — to select one. It is memorized after switching off or next time you can access it in 1 click.

**Activation.** After switching off the last, used Mode (except for the Strobe) memorized for quick 1-click access at next switching on.

**Lowest Voltage Indication** — the headlamp is switched on for 3 seconds for the battery loading in the last mode and then clicks 3.7 volts = 3 clicks, 3.7 volts = 3 clicks, 3.7 volts = 3 clicks (3 clicks = 3 seconds off light).

Armytek Wizard Pro flashlight is supplied with indication system — a color LED built-in to the button.

**State Indication** — shows flash every 4 seconds. Shows the battery voltage even in Off-state. It can also help you to find your headlamp at night (e.g. in a bag or in a pocket).

**State Indication can be turned on and off** — unpress the button to 1/4.

With ambient temperature is +25...-30°C the headlamp delivers light in Maximal mode for about 5-7 minutes and then the brightness steps down to the Max2 mode. 10-20 seconds afterwards the brightness returns to the Maximal level again. This stepping down is useful to maintain the user's safety and the headlamp's functionality in the conditions of good air-cooling (the headlamp produces constant light even in Maximal mode).

Always follow the instructions from this manual and recommendations on battery usage. Apply only the recommended power sources.

Do not use different power sources together, i.e. old ones with new ones, charged with different types of batteries combined as the standard with the flashlight.

Do not modify or replace the flashlight and its components as it will deprive you of the warranty.

Do not allow water or any other liquid to leak into the flashlight. Do not aim a flashlight at people or animals' eyes — it can cause temporary blindness.

Do not allow children to use the flashlight without your assistance.

Armytek Optoelectronics Inc. shall not be liable for any harm done to the user if it was caused by improper use of the product.

## Care and Storage

It is recommended to clean the threads and O-ring of dirt and old grease. Remember that secure protection from water and dust cannot be provided by worn-out sealing. And fouling as well as lack of lubricant causes fast wear-out of threads and sealings.

To clean the threads do the following:

1. Unpress the tailcap and remove the sealing ring carefully with a toothpick (do not use sharp metal things as they can damage the ring).
2. Wipe the threads thoroughly with a soft cloth (tissue). Do not use solvents. If the sealing ring is worn out or damaged, replace it by a new one.
3. Clean the metal threads with a brush using ethanol. Be careful not to allow applied liquid to get inside the flashlight or seal ring or even cause fire in a case of a short circuit.

After cleaning lubricate the thread and the sealing ring with polytetrafluoroethylene-based oil (e.g., Krytox 2600). The application of automotive and other improper greases can cause sealing and damage of the sealing ring.

In case of active operation and exploitation in dusty environments it is recommended to perform cleaning and lubricating of the parts as often as required, even if it seems that there is no need.

## Service and Warranty

Armytek provides free warranty repair for 10 years from the purchase.

Warranty doesn't cover damage caused by
