Killing The Koala And Poisoning The Prairie Australia America And The Environment:

Killing the Koala and Poisoning the Prairie Corey J. A. Bradshaw, Paul R. Ehrlich, 2015-10-05 Though separated by thousands of miles the United States and Australia have much in common Geographically both countries are expansive the United States is the fourth largest in land mass and Australia the sixth and both possess a vast amount of natural biodiversity At the same time both nations are on a crash course toward environmental destruction Highly developed super consumers with enormous energy footprints and high rates of greenhouse gas emissions they are two of the biggest drivers of climate change per capita As renowned ecologists Corey J A Bradshaw and Paul R Ehrlich make clear in *Killing the Koala and Poisoning the Prairie* both of these countries must confront the urgent question of how to stem this devastation and turn back from the brink In this book Bradshaw and Ehrlich provide a spirited exploration of the ways in which the United States and Australia can learn from their shared problems and combine their most successful solutions in order to find and develop new resources lower energy consumption and waste and grapple with the dynamic effects of climate change Peppering the book with humor irreverence and extensive scientific knowledge the authors examine how residents of both countries have irrevocably altered their natural environments detailing the most pressing ecological issues of our time including the continuing resource depletion caused by overpopulation They then turn their discussion to the politics behind the failures of environmental policies in both nations and offer a blueprint for what must be dramatically changed to prevent worsening the environmental crisis Although focused on two nations *Killing the Koala and Poisoning the Prairie* clearly has global implications the problems facing the United States and Australia are not theirs alone and the solutions to come will benefit by being crafted in coalition This book provides a vital opportunity to learn from both countries leading environmental thinkers and to heed their call for a way forward together

Environmental Management Chris Barrow, 2024-04-29 This comprehensively updated third edition explores the nature and role of environmental management and offers an introduction to this rapidly expanding and changing field It focuses on challenges and opportunities and core concepts including sustainable development The book is divided into five parts Part I Introduction to Environmental Management four introductory chapters cover the justification for environmental management its theory scope goals and scientific background Part II Practice explores environmental management in economics law and business and environmental management's relation with environmentalism international agreements and monitoring Part III Global Challenges and Opportunities examines resources challenges and opportunities both natural and human caused or human aggravated Part IV Responses to Global Challenges and Opportunities explores mitigation vulnerability resilience adaptation and how technology social change and politics affect responses to challenges Part V The Future the final chapter considers the way ahead for environmental management in the future With its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all It is an essential reference for undergraduates and postgraduates

studying environmental management and sustainability and an important resource for many students on courses including environmental science environmental studies and human geography

At Nature's Edge Gunnel Cederlöf, Mahesh Rangarajan, 2018-09-18 In an epoch when environmental issues make the headlines this is a work that goes beyond the everyday Ecologies as diverse as the Himalayas and the Indian Ocean coast the Negev desert and the former military bases of Vietnam or the Namib desert and the east African savannah all have in common a long time human presence and the many ways people have modified nature With research covering countries from Asia Africa and Australia the authors come together to ask how and why human impacts on nature have grown in scale and pace from a long pre history The chapters in this volume illumine specific patterns and responses across time going beyond an overt centring of the European experience The tapestry of life and the human reshaping of environments evoke both concern and hope making it vital to understand when why and how we came to this particular turn in the road Eschewing easy labels and questioning eurocentrism in today's climate vocabulary this is a volume that will stimulate rethinking among scholars and citizens alike Life Paul R. Ehrlich, 2023-01-17 A renowned scientist and environmental advocate looks back on a life that has straddled the worlds of science and politics Entirely entertaining Kirkus Reviews Acclaimed as a public scientist and as a spokesperson on pressing environmental and equity issues delivering his message from the classroom to 60 Minutes Paul R Ehrlich reflects on his life including his love affair with his wife Anne his scientific research his public advocacy and his concern for global issues Interweaving the range of his experiences as an airplane pilot a desegregationist a proud parent Ehrlich's insights are priceless on pressing issues such as biodiversity loss overpopulation depletion of resources and deterioration of the environment A lifelong advocate for women's reproductive rights Ehrlich also helped to debunk scientific bias associating skin color and intelligence and warned some fifty years ago about a possible pandemic and the likely ecological consequences of a nuclear war This book is a vital contribution to literature focused on the human predicament including problems of governance and democracy in the twenty first century and insight into the ecological and evolutionary science of our day It is a must read for anyone interested in understanding global change our planet's wonders and a scientific approach to the present existential threats to civilization

Shepherding Nature J. Michael Scott, John A. Wiens, Beatrice Van Horne, Dale D. Goble, 2020-03-19 With stories about species on the brink this book explores the causes and consequences of conservation reliance and its implications

Global Burning Eve Darian-Smith, 2022-04-19 How extreme right antidemocratic governments around the world are prioritizing profits over citizens stoking catastrophic wildfires and accelerating global climate change Recent years have seen out of control wildfires rage across remote Brazilian rainforests densely populated California coastlines and major cities in Australia What connects these separate events is more than immediate devastation and human loss of life In *Global Burning* Eve Darian Smith contends that using fire as a symbolic and literal thread connecting different places around the world allows us to better understand the parallel and related trends of the growth of

authoritarian politics and climate crises and their interconnected global consequences Darian Smith looks deeply into each of these three cases of catastrophic wildfires and finds key similarities in all of them As political leaders and big business work together in the pursuit of profits and power anti environmentalism has become an essential political tool enabling the rise of extreme right governments and energizing their populist supporters These are the governments that deny climate science reject environmental protection laws and foster exclusionary worldviews that exacerbate climate injustice The fires in Australia Brazil and the United States demand acknowledgment of the global systems of inequality that undergird them connecting the political erosion of liberal democracy with the corrosion of the environment Darian Smith argues that these wildfires are closely linked through capitalism colonialism industrialization and resource extraction In thinking through wildfires as environmental and political phenomenon *Global Burning* challenges readers to confront the interlocking powers that are ensuring our future ecological collapse

Population, Agriculture, and Biodiversity J. Perry Gustafson, Peter H. Raven, Paul R. Ehrlich, 2020-05-04 This timely collection of 15 original essays written by expert scientists the world over addresses the relationships between human population growth the need to increase food supplies to feed the world population and the chances for avoiding the extinction of a major proportion of the world's plant and animal species that collectively makes our survival on Earth possible These relationships are highly intertwined and changes in each of them steadily decrease humankind's chances to achieve environmental stability on our fragile planet The world population is projected to be nine to ten billion by 2050 signaling the need to increase world food production by more than 70 percent on the same amount of land currently under production and this without further damaging our fragile environment The essays in this collection written by experts for laypersons present the problems we face with clarity and assess our prospects for solving them calling for action but holding out viable solutions

Rethinking Leadership for a Green World Andrew Taylor, 2022-03-20 First James Lovelock and recently Prince William and David Attenborough believe that we have reached a tipping point in the process of climate change Whether they are right or not it is certainly true that the impact of humankind upon the ecology of the earth has reached a point where real changes in human behaviour are required If managers are to be enablers of planetary survival then we need to develop a new approach to risk which explicitly includes ecological limits upon economic behaviour This implies a fundamental reorientation of their role in allocating resources to minimise risk and maximise reward This book brings together some of the brightest contemporary thinkers on leadership complexity and sustainability to consider the big ideas that we will need to make the changes required and to outline the major themes that can inform a new approach to constructing a green world It looks at how to ensure that local models of sustainability are able to flourish in the context of global networks and presents specific case studies of markets and organisations that offer insights into the development integrated solutions and the leadership

lessons we can learn Combining both theory and practice this book serves to guide business managers and provides deeper insight and critical perspectives on some of the key issues facing leaders moving towards the green economy It also provides useful supplementary reading for students in business and environmental studies **Video Source Book** ,2006 A guide to programs currently available on video in the areas of movies entertainment general interest education sports recreation fine arts health science business industry children juvenile how to instruction Biology Digest ,1991-12
