Archaeology as a Weapon:

Long-lasting legacies of colonialism and nationalism in Israel, Palestine, Cyprus and Greece Marie-Louise

Winbladh,2025-07-22 In Israel Palestine Cyprus and Greece the reconstruction of the past through archaeology has been used to strengthen national identity Narratives about the past and origin myths have been constructed for political purposes Cyprus and Palestine have both suffered from British colonialism since the early twentieth century which has had a profound influence on their cultural heritage Through nationalism archaeology has been exploited by far right movements and political parties to claim ownership of heritage and has become an efficient political tool In Israel archaeology and religion have been exploited to construct the Israeli state and still play a crucial role The country claims to be the conqueror of Palestine under the protection of God who they believe gave them possession of the land Western religious groups are convinced that it is the religious duty of Christians to support the modern nation state of Israel Biblical archaeology has become an ultra religious American speciality marked by fraud and pseudoresearch Notorious smuggling scandals were staged by American Christian multibillionaires buying artefacts looted from the National Museum of Iraq and other countries Looting plundering and blacklisting are among the most serious problems in Cyprus causing irreparable damage to artefacts monuments and society Palestine s rich archaeological historical and religious heritage has been undermined by occupation and land confiscation Hundreds of sites have been looted during the Israeli occupation and an illegal trade of ancient artefacts has occurred on a large scale Populism is frequently associated with extreme nationalism and racism Over the past few years white nationalists and supremacists have seized the history of Greece and Rome White nationalists and neo Nazis in the US have used the slogan Classics Made Great Again showing their obsession with ancient sculptures and their alleged whiteness When visiting Jerusalem the Trump administration promoted an evangelical program where the politics of moral superiority is associated with white Christian supremacy

Cosmopolitanism and the Legacies of Dissent Tamara Caraus,Camil Alexandru

Parvu,2014-07-17 The core idea shared by all cosmopolitan views is that all human beings belong to a single community and the ultimate units of moral concern are individual human beings not states or particular forms of human associations Nevertheless the attempts to ground a political theory on overarching universal principles is in contradiction with the plurality of social cultural political religious interpretative standpoints in the contemporary world Is dissent cosmopolitan Is there a legacy of dissent for a theory of cosmopolitanism This book is a comparative historical analysis of dissident thought and practice for contemporary debates on cosmopolitanism Divided into two parts the editors and contributors explore the contribution of paradigmatic dissidents like Gandhi Martin Luther King Havel Sakharov Mandela Liu Xiaobo Aung San Suu Kyi towards a post universalist cosmopolitan theory Part Two examines the inherent cosmopolitanism of the seemingly peripheral dissent of contemporary forms of protests resistance direct action like NO TAV movement and Occupy Wall Street

A timely book which allows for a much needed new engagement in contemporary debates of cosmopolitanism we learn how practical resistance to totalizing hegemonic claims is generated and how dissident thinking might contribute to new enriched ways of conceiving the non totalizing foundations of cosmopolitanism An innovative look at what lessons can scholars of cosmopolitanism learn from dissent dissident movements and what the role of dissent in cosmopolitan democracy could be
