Lost Opportunities Learning In Out Of School Time Explorations Of Educational Purpose:

LOST Opportunities Bronwyn Bevan, Philip Bell, Reed Stevens, Aria Razfar, 2012-07-26 Learning in informal settings is attracting growing attention from policymakers and researchers yet there remains at the moment a dearth of literature on the topic Thus this volume which examines how science and mathematics are experienced in everyday and out of school time OST settings makes an important contribution to the field of the learning sciences Conducting research on OST learning requires us to broaden and deepen our conceptions of learning as well as to better identify the unique and common qualities of different learning settings We must also find better ways to analyze the interplay between OST and school based learning In this volume scholars develop theoretical structures that are useful not only for understanding learning processes but also for helping to create and support new opportunities for learning whether they are in or out of school or bridging a range of settings The chapters in this volume include studies of everyday and situated processes that facilitate science and mathematics learning They also feature new theoretical and empirical frameworks for studying learning pathways that span both in and out of school time and settings Contributors also examine structured OST programs in which everyday and situated modes of learning are leveraged in support of more disciplined practices and conceptions of science and mathematics Fortifying much of this work is a leading focus on educational equity a desire to foster more socially supportive and intellectually engaging science and mathematics learning opportunities for youth from historically non dominant communities Full of compelling examples and revealing analysis this book is a vital addition to the literature on a subject with a fast rising profile

Understanding Children's Informal Learning Roseanna Bourke, John O'Neill, Judith

Loveridge, 2024-02-19 Learning and personal development are integral to being a person and learning and teaching are integral to life as a social being Understanding Children's Informal Learning presents children's informal learning out of school and explores how this knowledge can enhance teaching and learning practice in the classroom

Leading Schools in Challenging Times Bruce Anthony Jones, Anthony Rolle, 2016-03-01 Over the past 30 years our public school system has received an unprecedented amount of attention as this concerns methods of school reform and policy strategies for bringing about this reform During the 1980s the emphasis of school reform was on transparency through school community partnerships Business and philanthropy for example became involved with issues of schooling that was unheard of prior to this period The 1980s also gave rise to issues of school finance and student performance that went beyond traditional views that tended to focus on finance adequacy to views that focused more on school finance arrangements that would lead to actual equitable outcomes in student performance The 1990s witnessed the emergence of the comprehensive school reform movement whereby curriculum outsourcing occurred at rates that had never occurred before With this movement the role of teachers and school leaders in the creation of school curriculum diminished as school districts increasingly purchased vendor related curriculum packages which included teacher and leader training modules and methods of curriculum assessment On

the heels of the increasing tendency of school districts to outsource school curriculum to curriculum vendors came a rise in demands for school accountability and school outcomes This was particularly evident with the passage of No Child Left Behind Act NCLB 2001 NCLB was also developed within a political context that called for demands in the academic improvement of schools and school districts that housed historically disenfranchised students These demands were particularly important as the nation experienced and continues to experience dramatic increases in student racial and ethnic diversity This volume entitled *Leading Schools in Challenging Times Eye to the Future* discusses varying types of school leadership in the context of key topics that have been at the center of on going school reform in the United States These topics include challenges opportunities and issues associated with our administrator and teacher leadership pipeline preparation and development leadership and school finance reform leadership and changing student and population demographics leadership and the role of community issues of leadership policy public accountability and school performance outcomes The authors also explicate these issues with a view to the future and the status of leadership in our public school system

learning and training environments emphasizing the valuable resources offered by these advances Focusing on technical considerations lessons learned and real world examples this book is ideally designed for instructors researchers upper level students and policy makers interested in the effectiveness of wearable applications Breaking Images Brian Greer,David Kollosche,Ole Skovsmose,2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book s emphasis on education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject *Reframing Science Teaching and Learning* David Stroupe,2017-02-03 Responding to recent reform efforts such as the Next Generation Science Standards which call for students to learn science practices this book proposes a conceptual reframing of the roles of teachers and students in formal and informal science learning settings Inviting the field to examine the state of science practice it provides concrete examples of how students supported by the actions of educators take on new roles shifting from passive recipients of information to active participants in conceptual social epistemic and material features of science work Each chapter provides an examination of how and why science practice evolves in learning communities in which students and teachers negotiate disciplinary work an analysis of how specific pedagogical and social actions taken by someone with authority a teacher or other educator provides opportunities for students to shape science practices a set of concrete recommendations for working with young students in formal and informal learning settings and a set of suggestions and questions to catalyze future research about and the evolving relationships between educators students and science practices in the field of science education Showing how and why the conceptual ideas presented are important and providing specific actionable suggestions for teachers and other educators for their daily work this book includes both elementary and secondary learning sites Open(ing) Education Dianne Conrad,Paul Prinsloo,2020-01-20 There is no shortage of scholarly research that reflects the growing importance of open education whether referring to issues surrounding access to education

formal informal or postformal different copyright licencing regimes e g Creative Commons alternative forms of educational delivery such as Massive Open Online Courses MOOCs or alternative pathways to learning curriculum development and delivery and or assessing and accrediting learning So what can another publication add to our understanding of open education It has become clear that thinking in terms of the binaries of open versus closed can no longer account and do justice to the wide range of possibilities and the varying factors that destabilise some definitions and practices In *Opening Education Theory and Practice* the authors therefore map open as emerging from a dynamic network or ecology of often mutually constitutive factors resulting in a range of possibilities The chapters in this book provide us with glimpses of open opening and opened with none of these being permanent states of affairs but rather contingent serendipitous often uncertain and fluid This book is unique not only with regard to its variety of approaches to mapping the various possibilities between open and closed but also with regard to the global spread of its many contributing authors
