A Curious Curriculum Mick Waters, Claire Banks, 2022-10-31 Written by Claire Banks and Mick Waters A Curious

Curriculum Teaching foundation subjects well details the insightful and transformational steps that a school can take towards designing and delivering a rich rigorous and wide ranging curriculum Foreword by Mary Myatt Rather than being a model curriculum that can be uprooted and planted in any school the book is a model schools can use to design their own curriculum one that not only encourages children to be active participants in their own learning but also to see the benefits of being part of a bigger wider family of learners The authors concentrate on the foundation subjects particularly history geography and science but also design and technology DT and art and design areas that are often challenging for teachers in primary schools Subjects are brought together and explored under big ideas and crucially the emphasis is on avoiding the superficial and trivial and rooting teaching in extending and challenging children In A Curious Curriculum Claire Banks and Mick Waters share the story of one multi academy trust MAT which designed and delivered a shared educational vision a rationale for excellence in the curriculum and the resources and support given to help reduce teachers workload Claire and Mick present a clear model both for supporting a group of schools or leading one school offering a fresh perspective on working on a MAT wide curriculum as well as providing a range of snapshot examples of the curriculum in action in the form of documents plans photos and the learners own work The book shares transferrable lessons from the trust s journey to success setting out an educational philosophy that pairs pedagogy with a well structured curriculum designed with learners best interests at its heart All children deserve an engaging exciting curriculum designed to spark their curiosity feed their imagination and develop their skills and knowledge With clear timelines and an honest and transparent dialogue about the challenges and benefits of working together collaboratively and the importance of external expertise A Curious Curriculum is an essential read for all school leaders Suitable for executive leaders head teachers curriculum coordinators and subject leaders in primary school settings

Educational Curricula Jennifer N. Casey, 2008 In formal education a curriculum plural curricula is the set of courses and their content offered at a school or university As an idea curriculum stems from the Latin word for race course referring to the course of deeds and experiences through which children grow and mature in becoming adults Crucial to the curriculum is the definition of the course objectives that usually are expressed as learning outcomes and normally include the program s assessment strategy These outcomes and assessments are grouped as units or modules and therefore the curriculum comprises a collection of such units each in turn comprising a specialised specific part of the curriculum So a typical curriculum includes communications numeracy information technology and social skills units with specific specialised teaching of each This book presents research on educational curricula from around the world

Optimizing Higher Education Learning Through Activities and Assessments Inoue-Smith, Yukiko, McVey, Troy, 2020-06-26 The mission of higher education in the 21st century must focus on optimizing learning for all students In a shift from prioritizing effective teaching to active learning it is understood that computer enhanced environments provide a variety of ways to reach a wide range of learners who have differing backgrounds ages learning needs and expectations

Integrating technology into teaching assumes greater importance to improve the learning experience. *Optimizing Higher Education Learning Through Activities and Assessments* is a collection of innovative research that explores the link between effective course design and student engagement and optimizes learning and assessments in technology enhanced environments and among diverse student populations. Its focus is on providing an understanding of the essential link between practices for effective activities and strategies for effective assessments as well as providing examples of course designs aligned with assessments positioning college educators both as leaders and followers in the cycle of lifelong learning. While highlighting a broad range of topics including collaborative teaching, active learning and flipped classroom methods, this book is ideally designed for educators, curriculum developers, instructional designers, administrators, researchers, academicians and students.

Urban Agriculture for Growing City Regions Undine Giseke, Maria Gerster-Bentaya, Frank Helten, Matthias Kraume, Dieter Scherer, Guido Spars, Fouad Amraoui, Abdelaziz Adidi, Said Berdouz, Mohamed Chlaida, Majid Mansour, Mohamed Mdafai, 2015-09-07. This book demonstrates how agriculture can play a determining role in integrated climate optimised urban development. Agriculture within urban growth centres today is more than an economic or social left over or a niche practice. It is instead a complex system that offers multiple potentials for interaction with the urban system. Urban open space and agriculture can be linked to a productive green infrastructure, this forms new urban rural linkages in the urbanizing region and helps shape the city. But in order to do this, agriculture has to be seen as an integral part of the urban fabric and it has to be put on the local agenda. *Urban Agriculture for Growing City Regions* takes the example of Casablanca, one of the fastest growing cities in North Africa, to investigate this approach. The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects, design solutions and multifunctional modules. These synergies assure greater resource efficiency, particularly regarding the use and reuse of water, and they strengthen regional food security and the social integration of multiple spheres. A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production. The book will have a long lasting legacy and is essential reading for researchers, planners, practitioners and policy makers who are working on urban development and urban agricultural strategies.

Playful Science Investigations in Early Childhood Azra Moeed, Stephen Dobson, Sankari Saha, 2024-01-01. This book showcases a case study of the development of a generalist early childhood education (ECE) teacher into a confident and competent teacher of science in early childhood with support from a mentor. It argues that with guided mentoring and later timely support of a mentor as and when required, ECE teachers can deliver the curriculum, teach science by providing opportunities to explore and then build on children's interest through intentionally planned activities, dialogue, and discourse. It presents a comprehensive literature review and research design, including theoretical frames and methodology. It includes a chapter on teacher development and discusses different approaches to science investigations practiced by the teacher in the case study. The book provides evidence of children's science learning and presents the findings as response to research questions. It also includes a model of teaching as inquiry in the context of early childhood education.
